Annual Adjustment Reference Definitions:

N/A = Not Applicable

[A] = In the absence of a formal study recommendation or action by the city commission, the fee or charge shall be administratively increased effective October 1st of each fiscal year. The percentage increase shall be the percentage increase, if any, in the Consumer Price Index for the Miami-Fort Lauderdale-West Palm Beach, Florida area, all items, all urban consumers, not seasonally adjusted (Series ID: CUURS35BSA0) from December of the calendar year two years prior to the current calendar year to December of the preceding calendar year as published by the Bureau of Labor Statistics of the United States Department of Labor. The fee or charge calculated under this method shall be rounded up to the nearest dollar. The first increases under these provisions, if any, shall become effective on October 1, 2019. The annual permit fee / business taxes as referenced in Section 102-379(d) of the City Code shall be increased by a scheduled 5% effective October 1, 2019, rounded to the nearest dollar amount, and the above annual indexing provisions shall apply for subsequent fiscal years.

[B] = In the absence of a formal study recommendation or action by the city commission, the fee or charge shall be administratively increased effective October 1st of each fiscal year. The percentage increase shall be the percentage increase, if any, in the Consumer Price Index for the Miami-Fort Lauderdale-West Palm Beach, Florida area, all items, all urban consumers, not seasonally adjusted (Series ID: CUURS35BSA0) from December of the calendar year two years prior to the current calendar year to December of the preceding calendar year as published by the Bureau of Labor Statistics of the United States Department of Labor. The fee or charge calculated under this method shall be rounded up to the nearest cent. The first increases under these provisions, if any, shall become effective on October 1, 2019.

[C] = Pass-Through of Purchased Wholesale Water Charges. The Purchased Water Pass-Through Rate, which is applied to all water consumers being billed for potable water service, shall be increased or decreased by the city by applying a pass-through adjustment factor for any change in the average annual rates charged to the city for wholesale potable water purchased from the Miami-Dade Water and Sewer Department ("WASD") to the Purchased Water Pass-Through Rate charged by the city (the "Purchased Water Pass-Through Adjustment").

(1) *Adjustment schedule.* The implementation of the adjustment to the Purchased Water Pass-Through Rate for any month that a change in wholesale potable water rates by WASD is effectuated ("Water Cost Recovery") shall occur without a public hearing. Water Cost Recovery shall be employed each time that WASD adjusts the average annual wholesale

potable water rates that are billed to the city. Any adjustment to the Purchased Water Pass-Through Rate based on the determination of the change in wholesale rates shall be implemented in the month immediately following the determination of the Purchased Water Pass-Through Adjustment. The Purchased Water Pass-Through Rate as shown on Appendix A and as may be further adjusted automatically in the future by the implementation of the provisions of this section and which are then in effect shall be increased or decreased by the city by applying a Purchased Water Pass-Through Adjustment established in accordance with this subsection to the then effective Purchased Water Pass-Through Rate prior to such application. Nothing herein shall preclude the city from making additional changes to the monthly water user rates for service.

- (2) *Applicability of Purchased Water Rates.* The Purchased Water Pass-Through Rate shall be in addition to any water consumption rates for all retail and wholesale customers that are billed for potable water service by the city. The following are the customers that shall be subject to the application of the Purchased Water Pass-through Rate and shall be subject to the pass-through for changes in the cost of purchased water from WASD (the "Applicable Customers"):
- (i) The retail water customer classes that are billed the water consumption charge referenced in this section.
 - (ii) All separate utilities or local governments that may receive wholesale potable water service provided by the city currently or in the future that are not considered to be retail customers.
- (3) *Calculation of Purchased Water Pass-Through Adjustment.* The Purchased Water Pass-Through Adjustment shall be calculated using the following formula:

$$PWPTA = ((IWWC - PWWC) * (1 / (1 - (DF + T + O))))$$

Where:

PWPTA = The Purchased Water Pass-Through Adjustment to be used for Water Cost Recovery to determine the monetary adjustment in the Purchased Water Pass-through Rate to be applied the Applicable Customers. The PWPTA represents the respective dollar increase or decrease to account for changes in wholesale potable water rates charged by WASD to the city that is added or subtracted, respectively to the Purchased Water Pass-Through Rate.

IWWC = The increased annual average wholesale or purchased water rate charged by WASD expressed on a dollar per 1,000-gallons basis that became effective for the month immediately after the PWWC.

PWWC = The prior annual average wholesale or purchased water rate charged by WASD expressed on a dollar per 1,000-gallons basis immediately prior to the billing of the adjusted wholesale or purchased water rate defined as the IWWC.

DF = The fee paid to the Department of Environmental Resources Management (DERM) which is based on a percent of rate revenues billed by the city.

T = Any and all taxes or tax equivalents that may be paid by the water system that is based on revenues billed by the city, including any payment in lieu of tax imposed by the city on its water system.

O = Any and all charges that may be paid by the city on behalf of the water system that is based on revenues billed by the city, including any funding of renewals and replacement fund deposits that is determined as a percent of revenues billed.

- (4) *Determination of Purchased Water Pass-Through Rate.* The Purchased Water Pass-Through Rate shall be determined based on the addition or subtraction of the Purchased Water Pass-Through Adjustment to the rates in effect immediately preceding such adjustment and shall be rounded to the nearest cent. The Purchased Water Pass-Through Adjustment application shall be based on the following formula:

$$APWTR = PWPTR + PWPTA$$

Where:

APWTR = The Adjusted Purchased Water Pass-Through Rate that is to be placed in effect after the application of the Purchased Water Pass-Through Adjustment to all Applicable Customers billed for potable water service.

PWPTR = The Purchased Water Pass-Through Rate in effect immediately prior to the application of the PWPTA.

PWPTA = The Purchased Water Pass-Through Adjustment as determined as a result of a change in wholesale water rates as billed by WASD.

- (5) *[Example of calculation.]* An example of the calculation of the determination of the Purchased Water Pass-Through Adjustment and the corresponding change to the Purchased Water Pass-Through Rate is illustrated in the following table:

THE FOLLOWING TABLE NEEDS TO BE UPDATED:

	Line No.	Formula Reference	Amount

Adjusted Purchased Water Pass-Through Rate (\$/1,000 gallons)	11=9+10	APWTR	\$1.97

Pass-Through Adjustment Charges. The Applicable Rates as may be further adjusted automatically in the future by the implementation of the provisions as contained in this Appendix A and which are then in effect shall be increased or decreased by the city by applying a pass-through adjustment factor established in accordance with this subsection (the "Pass-Through Factor") to the then effective Applicable Rates for increases or decreases in the Applicable Costs. All Applicable Rates so adjusted (the "Pass-Through Rates") shall be charged by the city's water system.

- (1) *Adjustment Schedule.* The implementation of Pass-Through Rates for any month associated with a change in Applicable Costs ("Cost Recovery") shall be placed into effect automatically and shall occur without a public hearing. Nothing herein shall preclude the city from making additional changes to the monthly water user rates for service.
- (2) *Applicable Rates.* The water base facility, water consumption charges, and Purchased Water Pass-through Rate referenced in subsection 110-166(a) shall be subject to Cost Recovery.
- (3) *Applicable Costs.* Only the following cost categories qualify as Applicable Costs for Cost Recovery:
 - (i) All increases or decreases in the percentage charge of the Department of Environmental Resources Management.
 - (ii) All increases or decreases in the application of any tax or tax equivalents, including any payment in lieu of tax imposed by the city on its water system.
 - (iii) All other cost increases incurred by the water system as a result of any regulatory changes or requirements imposed by any regulatory agency having jurisdiction over the utility system operations (a "Regulator").
- (4) *Calculation of Pass-Through Factor.* The Pass-Through Factor shall be calculated using the following formula:

$$PTF = ARR/ER$$

Where:

PTF = The Pass-Through Factor used for Cost Recovery to determine the monetary adjustment in the Applicable Rates. The PTF represents the estimated annual increase in the Applicable Costs, expressed as a percentage of the most recent historical revenues derived from the Applicable Rates for the most recently completed fiscal year.

ARR = Additional Required Revenue equal to the estimated annual change in the Applicable Costs that will affect the overall cost of providing water system services as determined by the city.

ER = The total actual revenues earned by the Enterprise System from the Applicable Rates for the potable water system as reported in the city for the most recently completed fiscal year.

- (5) *Determination of Pass-Through Rates.* The Pass-Through Rates shall be determined based on the Pass-Through Factor applied uniformly to the Applicable Rates in effect, and shall be rounded to the nearest cent. The Pass-through application shall be based on the following formula:

$$\text{PTR} = (\text{AR})(1 + \text{PTF})$$

Where:

PTR = The Pass-Through Rates that are to be placed in effect for the current fiscal year through application of the Pass-Through Factor.

AR = The Applicable Rates in effect immediately prior to the application of the Pass-Through Factor.

PTF = The Pass-Through Factor as determined by the city to recover the net change in Applicable Costs.

Except as otherwise provided, the monthly user rates established in subsections 110-167(a) for the water system and 110-168(a) for the sanitary sewer system (collectively, the "applicable rates") as shown in Appendix A and as may be further adjusted automatically in the future by implementation of the provisions of this section and which are then in effect shall be increased by the city each year by applying the price index factor established for that year in accordance with this subsection (the "price index factor") to the then applicable rates to offset the effects of inflation on the cost of operating and maintaining the system. The Rate Index shall never be less than 0.0%. All applicable rates so adjusted (the "indexed rates") shall be implemented by the city.

- (1) *Adjustment schedule.* Each implementation of indexed rates ("rate indexing") shall be placed into effect automatically and shall occur without a public hearing. Rate indexing shall not be employed more than once in any fiscal year. Any indexed rates based on the operating and maintenance expenses for the most recently completed fiscal year shall be implemented as of October 1st of the subsequent fiscal year. Nothing herein shall preclude the city from making additional changes to the water or wastewater rates for service.
- (2) *Applicable rates.* The water base facility charge and water consumption charges referenced in subsection 110-167(a) for the water system and sanitary sewer base facility charge and sanitary sewer consumption charges referenced in subsection 110-168(a) for the sanitary sewer system shall be subject to rate indexing. The purchased water pass-through rate and the purchased sanitary sewer pass-through rates as referenced in the respective subsections shall not be subject to rate indexing.
- (3) *Calculation of price index factor.* The price index factor shall be determined based on the actual reported financial results as contained in the annual comprehensive annual financial report and the records for the most recently completed fiscal year preceding the determination of the rate index (the "calculation period"). By way of example, the rate index to be applied on October 1, 2019 would be based on the actual financial results for the 12 months ended September 30, 2018. The price index factor shall be calculated using the following formula:

$$\text{PIF} = \frac{([\text{OP} - (\text{PWE} + \text{PSE} + \text{PT})] * \text{EPI})}{[(\text{ER} - \text{PTR}) / (1 - (\text{DF} + \text{T} + \text{O}))]}$$

Where:

PIF = The price index factor used for rate indexing to determine the monetary adjustment in the applicable rates. The PIF represents the estimated increase in operation and maintenance expenses during the calculation period that is subject to inflation, expressed as a percentage of applicable rates revenues earned during the calculation period. The amount of the rate index increase is a component of any additional revenue required by the utility system to

ensure compliance with the bond covenants and fiscal requirements of the utility system (the "additional required revenue").

OP = The total expenses, paid or accrued, for the operations, maintenance, and repair of the water and wastewater systems as reported in the comprehensive annual financial report and other financial records for the city for the calculation period after excluding: (a) allowances for depreciation and amortization expense; and (b) capitalized salaries and other overhead related to the city's capital improvement program (CIP). Such total expenses as adjusted for the stated exclusions are hereinafter referred to as the "operating expenses".

PWE = That component of the operating expenses (OP) that represent the cost of purchased water service from WASD for the calculation period, adjusted to include the fee paid to the Department of Environmental Resources Management (DERM) which is based on a percent of rate revenues billed by the city for this component of expense.

PSE = That component of the operating expenses (OP) that represent the cost of purchased sanitary sewer service from WASD for the calculation period, adjusted to include the fee paid to the Department of Environmental Resources Management (DERM) which is based on a percent of rate revenues billed by the city for this component of expense.

PT = The sum of all other components of the operating expenses (OP) for the Calculation Period for which increases in those components may be recovered separately as a pass-through adjustment pursuant to subsections 110-167(d) for the water system and 110-168(a) for the wastewater system.

EPI = The Consumer Price Index - All Urban Consumers. Miami-Fort Lauderdale-West Palm Beach (Series ID: CUURS35BSA0), as published by Bureau of Labor Statistics (the "effective price index") reported for the month of December of the preceding calendar year compared to the index reported for the immediately preceding month of December. By way of example, the effective price index published by Bureau of Labor Statistics - All Urban Consumers, Miami-Fort Lauderdale-West Palm Beach, as of December 2017 was 258.238 and as of December 2018 was 265.731 or a change of 2.90% which shall be applied to the applicable operating expenses reported for fiscal year 2018.

ER = The total actual revenues earned by the utility system from the applicable rates as reported in the comprehensive annual financial reports and other financial records for the calculation period.

PTR = The total actual revenues earned by the utility system during the calculation period from the application of i) the purchased-water pass-through rate; ii) the purchased-wastewater pass-through rate; and iii) any other expense that was categorized as a pass-through expense and separately evaluated.

(4) *Price index calculation example.*

- (i) An example of the calculation of the Price Index Factor based on reported fiscal year 2015 information is illustrated in the following table:

- (ii) Determination of indexed rates. The indexed rates shall be determined based on the price index factor applied uniformly to the applicable rates in effect and shall be rounded to the nearest cent. The determination shall be based on the following formula:

$$IR = (AR)(1 + PIF)$$

Where:

IR = The indexed applicable rates that are to be placed in effect in the current fiscal year through application of the price index factor.

AR = The applicable rates in effect immediately prior to the application of the price index factor.

PIF = The price index factor determined for the calculation period.

The first automatic adjustments as allowed under this annual adjustment reference shall become effective on October 1, 2019.

[D] = Pass-Through of Purchased Wholesale Sanitary Sewer Charges. The Purchased Sanitary Sewer Pass-Through Rate, which is applied to all sanitary sewer consumers being billed for sewer service, shall be increased or decreased by the city by applying a pass-through adjustment factor for any change in the rates charged to the city for wholesale wastewater treatment and disposal services purchased from WASD (the "Sanitary Sewer Pass-Through Adjustment") to the Purchased Sanitary Sewer Pass-Through Rate charged by the city.

- (1) *Adjustment schedule.* The implementation of the adjustment to the Purchased Sanitary Sewer Pass-Through Rate for any month that a change in wholesale sanitary sewer rates by WASD is effectuated ("Sewer Cost Recovery") shall occur without a public hearing. Sewer Cost Recovery shall be employed each time that WASD adjusts the average annual wholesale sanitary sewer rates that are billed to the city. Any adjustment to the Purchased Sanitary Sewer Pass-Through Rate based on the determination of the change in wholesale rates shall be implemented in the month immediately following the determination of the Purchased Sanitary Sewer Pass-Through Adjustment. The Purchased Sanitary Sewer Pass-Through Rate as shown on Appendix A and as may be further adjusted automatically in the future by the implementation of the provisions of this section and which are then in effect shall be increased or decreased by the city by applying a Purchased Sanitary Sewer Pass-Through Adjustment established in accordance with this subsection to the then effective Purchased Sanitary Sewer Pass-Through Rate prior to such application. Nothing herein shall preclude the city from making additional changes to the monthly sanitary sewer user rates for service.
- (2) *Applicability of Purchased Sanitary Sewer Rates.* The Purchased Sanitary Sewer Pass-Through Rate shall be in addition to any sewer consumption rates for all retail and wholesale customers that are billed for wastewater treatment and disposal services by the city. The following are the customers that shall be subject to the application of the Purchased Sanitary Sewer Pass-Through Rate and shall be subject to the pass-through for changes in the cost of purchased wastewater treatment and disposal services from WASD (the "Applicable Customers"):
 - (i) The retail water customer classes that are billed the sewer consumption charge referenced in this section.
 - (ii) All separate utilities or local governments that may receive wholesale sewer service provided by the city currently or in the future which is not considered as retail customers.
- (3) *Calculation of Purchased Sanitary Sewer Pass-Through Adjustment.* The Purchased Sanitary Sewer Pass-Through Adjustment shall be calculated using the following formula:

$$\text{PSPTA} = ((\text{IWWC} - \text{PWWC}) * (1/(1-(\text{DF} + \text{T} + \text{O}))))$$

Where:

PSPTA = The Purchased Sanitary Sewer Pass-Through Adjustment to be used for Sewer Cost Recovery to determine the monetary adjustment in the Purchased Sanitary Sewer Pass-through Rate to be applied the Applicable Customers. The PSPTA represents the respective dollar increase or decrease to account for changes in average annual wholesale wastewater rates charged by WASD to the city that is added or subtracted, respectively to the Purchased Sanitary Sewer Pass-Through Rate.

IWSC = The increased average annual wholesale or purchased sanitary sewer rate charged by WASD expressed on a dollar per 1,000-gallons basis that became effective for the month immediately after the PWSC.

PWSC = The prior average annual wholesale or purchased sanitary sewer rate charged by WASD expressed on a dollar per 1,000-gallons basis immediately prior to the billing of the adjusted wholesale or purchased sewer rate by WASD.

DF = The fee paid to the Department of Environmental Resources Management (DERM) which is based on a percent of rate revenues billed by the city.

T = Any and all taxes or tax equivalents that may be paid by the sewer system that is based on revenues billed by the city, including any payment in lieu of tax imposed by the city on its sanitary sewer system.

O = Any and all charges that may be paid by the city on behalf of the sanitary sewer system that is based on revenues billed by the city, including any funding of renewals and replacement fund deposits that is determined as a percent of revenues billed.

- (4) *Determination of Purchased Sanitary Sewer Pass-Through Rate.* The Purchased Sanitary Sewer Pass-Through Rate shall be determined based on the addition or subtraction of the Purchased Sanitary Sewer Pass-Through Adjustment to the rates in effect immediately preceding such adjustment and shall be rounded to the nearest cent. The Purchased Sanitary Sewer Pass-Through Adjustment application shall be based on the following formula:

$$APSTR = PSTR + PSPTA$$

Where:

APSTR = The Adjusted Purchased Sanitary Sewer Pass-Through Rate that is to be placed in effect after the application of the Purchased Sewer Pass-Through Adjustment to all Applicable Customers billed for wastewater service.

PSTR = The Purchased Sanitary Sewer Pass-Through Rate in effect immediately prior to the application of the PSPTA.

PSPTA = The Purchased Sanitary Sewer Pass-Through Adjustment as determined as a result of a change in wholesale wastewater rates as billed by WASD.

- (5) *[Example of calculation.]* An example of the calculation of the determination of the Purchased Sanitary Sewer Pass-Through Adjustment and the corresponding change to the Purchased Sanitary Sewer Pass-Through Rate is illustrated in the following table:

THE FOLLOWING TABLE NEEDS TO BE UPDATED:

	Line No.	Formula Reference	Amount

Pass-Through Adjustment Charges. The Applicable Rates as shown in Appendix A and as may be further adjusted automatically in the future by implementation of the provisions of this section and which are then in effect shall be increased or decreased by the city by applying a pass-through adjustment factor established in accordance with this subsection (the "Pass-Through Factor") to the Applicable Rates for increases or decreases in the Applicable Costs. All Applicable Rates so adjusted (the "Pass-Through Rates") shall be charged by the city's sanitary sewer system.

- (1) *Adjustment Schedule.* The implementation of Pass-Through Rates for any month associated with a change in Applicable Costs ("Cost Recovery") shall be placed into effect automatically and shall occur without a public hearing. Nothing herein shall preclude the city from making additional changes to the monthly sanitary sewer user rates for service.
- (2) *Applicable Rates.* The sewer base facility, sewer consumption charges, and Purchased Sewer Pass-through Rate referenced in subsection 110-167(a) shall be subject to Cost Recovery.
- (3) *Applicable Costs.* Only the following cost categories qualify as Applicable Costs for Cost Recovery:
 - (i) All increases or decreases in the percentage charge of the Department of Environmental Resources Management.
 - (ii) All increases or decreases in the application of any tax or tax equivalents, including any payment in lieu of tax imposed by the city on its sanitary sewer system.
 - (iii) All other cost increases incurred by the sanitary sewer system as a result of any regulatory changes or requirements imposed by any regulatory agency having jurisdiction over the utility system operations (a "Regulator").
- (4) *Calculation of Pass-Through Factor.* The Pass-Through Factor shall be calculated using the following formula:

$$PTF = ARR/ER$$

Where:

PTF = The Pass-Through Factor used for Cost Recovery to determine the monetary adjustment in the Applicable Rates. The PTF represents the estimated annual increase in the Applicable Costs, expressed as a percentage of the most recent historical revenues derived from the Applicable Rates for the most recently completed fiscal year.

ARR = Additional Required Revenue equal to the estimated annual change in the Applicable Costs that will affect the overall cost of providing sanitary sewer system services as determined by the city.

ER = The total actual revenues earned by the Enterprise System from the Applicable Rates for the sanitary sewer system as reported in the city for the most recently completed fiscal year.

- (5) *Determination of Pass-Through Rates.* The Pass-Through Rates shall be determined based on the Pass-Through Factor applied uniformly to the Applicable Rates in effect and shall be rounded to the nearest cent. The Pass-through application shall be based on the following formula:

$$\text{PTR} = (\text{AR})(1 + \text{PTF})$$

Where:

PTR = The Pass-Through Rates that are to be placed in effect for the current fiscal year through application of the Pass-Through Factor.

AR = The Applicable Rates in effect immediately prior to the application of the Pass-Through Factor.

PTF = The Pass-Through Factor as determined by the city to recover the net change in Applicable Costs.

Except as otherwise provided, the monthly user rates established in subsections 110-167(a) for the water system and 110-168(a) for the sanitary sewer system (collectively, the "applicable rates") as shown on Appendix A and as may be further adjusted automatically in the future by implementation of the provisions of this section and which are then in effect shall be increased by the city each year by applying the price index factor established for that year in accordance with this subsection (the "price index factor") to the then applicable rates to offset the effects of inflation on the cost of operating and maintaining the system. The Rate Index shall never be less than 0.0%. All applicable rates so adjusted (the "indexed rates") shall be implemented by the city.

- (1) *Adjustment schedule.* Each implementation of indexed rates ("rate indexing") shall be placed into effect automatically and shall occur without a public hearing. Rate indexing shall not be employed more than once in any fiscal year. Any indexed rates based on the operating and maintenance expenses for the most recently completed fiscal year shall be implemented as of October 1 of the subsequent fiscal year. Nothing herein shall preclude the city from making additional changes to the water or wastewater rates for service.
- (2) *Applicable rates.* The water base facility charge and water consumption charges referenced in subsection 110-167(a) for the water system and sanitary sewer base facility charge and sanitary sewer consumption charges referenced in subsection 110-168(a) for the sanitary sewer system shall be subject to rate indexing. The purchased water pass-through rate and the purchased sanitary sewer pass-through rates as referenced in the respective subsections shall not be subject to rate indexing.
- (3) *Calculation of price index factor.* The price index factor shall be determined based on the actual reported financial results as contained in the annual comprehensive annual financial report and the records for the most recently completed fiscal year preceding the determination of the rate index (the "calculation period"). By way of example, the rate index to be applied on October 1, 2019 would be based on the actual financial results for the 12 months ended September 30, 2018. The price index factor shall be calculated using the following formula:

$$\text{PIF} = \frac{([\text{OP} - (\text{PWE} + \text{PSE} + \text{PT})] * \text{EPI})}{([\text{ER} - \text{PTR}] * (1 / (1 - (\text{DF} + \text{T} + \text{O}))))}$$

Where:

PIF = The price index factor used for rate indexing to determine the monetary adjustment in the applicable rates. The PIF represents the estimated increase in operation and maintenance expenses during the calculation period that is subject to inflation, expressed as a percentage of applicable rates revenues earned during the calculation period. The amount of the rate index increase is a component of any additional revenue required by the utility system to ensure compliance with the bond covenants and fiscal requirements of the utility system (the "additional required revenue").

OP = The total expenses, paid or accrued, for the operations, maintenance, and repair of the water and wastewater systems as reported in the comprehensive annual financial report and other financial records for the city for the calculation period after excluding: (a) allowances for depreciation and amortization expense; and (b) capitalized salaries and other overhead related to the city's capital improvement program (CIP). Such total expenses as adjusted for the stated exclusions are hereinafter referred to as the "operating expenses".

PWE = That component of the operating expenses (OP) that represent the cost of purchased water service from WASD for the calculation period, adjusted to include the fee paid to the Department of Environmental Resources Management (DERM) which is based on a percent of rate revenues billed by the city for this component of expense.

PSE = That component of the operating expenses (OP) that represent the cost of purchased sanitary sewer service from WASD for the calculation period, adjusted to include the fee paid to the Department of Environmental Resources Management (DERM) which is based on a percent of rate revenues billed by the city for this component of expense.

PT = The sum of all other components of the operating expenses (OP) for the Calculation Period for which increases in those components may be recovered separately as a pass-through adjustment pursuant to subsections 110-167(d) for the water system and 110-168(a) for the wastewater system.

EPI = The Consumer Price Index - All Urban Consumers. Miami-Fort Lauderdale-West Palm Beach (Series ID: CUURS35BSA0), as published by Bureau of Labor Statistics (the "effective price index") as reported for the month of December of the preceding calendar year compared to the index reported for the immediately preceding month of December. By way of example, the effective price index published by Bureau of Labor Statistics - All Urban Consumers, Miami-Fort Lauderdale-West Palm Beach, as of December 2017 was 258.238 and as of December 2018 was 265.731 or a change of 2.90% which shall be applied to the applicable operating expenses reported for fiscal year 2018.

ER = The total actual revenues earned by the utility system from the applicable rates as reported in the comprehensive annual financial reports and other financial records for the calculation period.

PTR = The total actual revenues earned by the utility system during the calculation period from the application of i) the purchased-water pass-through rate; ii) the purchased-wastewater pass-through rate; and iii) any other expense that was categorized as a pass-through expense and separately evaluated.

(4) *Price index calculation example.*

- (i) An example of the calculation of the Price Index Factor based on reported fiscal year 2018 information is illustrated in the following table:

THE FOLLOWING TABLE NEEDS TO BE UPDATED:

	Line No.	Formula Reference	Amount
Total Operating Expenses	1	OP	\$56,906,238

- (ii) Determination of indexed rates. The indexed rates shall be determined based on the price index factor applied uniformly to the applicable rates in effect and shall be rounded to the nearest cent. The determination shall be based on the following formula:

$$IR = (AR)(1 + PIF)$$

Where:

IR = The indexed applicable rates that are to be placed in effect in the current fiscal year through application of the price index factor.

AR = The applicable rates in effect immediately prior to the application of the price index factor.

PIF = The price index factor determined for the calculation period.

The first automatic adjustments as allowed under this annual adjustment reference shall become effective on October 1, 2019.

- [E] = The solid waste collection portion of the rate shall be automatically adjusted, for the period covering the preceding fiscal year, annually, on January 1st, according to the percentage increase or decrease in the consumer price index (CPI), of All Urban Consumers (CPI-U): U.S. city average, under the expenditure category entitled, "Garbage and trash collection (Unadjusted Percent Change)". The CPI adjustment for solid waste collection shall be subject to a maximum annual increase of three percent (3%).

The solid waste disposal portion of the rate shall be automatically adjusted to reflect a pro-rata share of the City's actual pass-through costs for disposal of residential solid waste in a Miami-Dade County disposal site (i.e. to reflect any annual increase in the County's "tipping" fee).

- [F] = In the absence of a formal study recommendation or action by the city commission, the fee or charge shall be administratively increased effective October 1st every five (5) fiscal years. The percentage increase shall be the cumulative percentage increase, if any, in the Consumer Price Index for the Miami-Fort Lauderdale-West Palm Beach, Florida area, all items, all urban consumers, not seasonally adjusted (Series ID: CUURS35BSA0) from December of the calendar year six (6) years ago to December of the preceding calendar year as published by the Bureau of Labor Statistics of the United States Department of Labor. The fee or charge calculated under this method shall be rounded up to the nearest dollar. The first increases under these provisions, if any, shall become effective on October 1, 2024.
