

Extend the Functionality of the Bigbelly Platform to Host Small Cell in the City of Miami Beach

Bigbelly's 'Telebelly' platform is a multi-purpose infrastructure with a familiar form factor and ubiquitous placement among city streetscapes. The 'Telebelly' double station features a smart waste unit coupled with a telecom cabinet that conceals Small Cell radio equipment. It includes a modest-height integrated mast that supports a discreet multi-band antenna and is connected with permanent fiber and power.

Bigbelly and Carrier Partners will provide at No Cost to the City...

- Smart Waste System - Hardware, Software, Services
- Telecommunications enclosure and equipment for increased wireless service
- Power and Fiber to individual locations
- Ongoing maintenance of all locations

Telebelly Platform Value to the City of Miami Beach

- All upfront and install costs plus the value of smart waste subscription will be covered, representing approximately \$155 per month
- Bigbelly will also provide an additional 10% revenue share to the City based on all other real estate and access fees
- Combined smart waste plus revenue share, Miami Beach gains value of at least 35% of total revenue received at each Telebelly site
