Re: Design Review Board Application for the installation of Small Wireless Facilities at the following node and address location:  
Crown Castle Fiber LLC Node FL6490BA - 1055 19th St, Miami Beach, FL, 33139

Dear Mr. Murphy:

Crown Castle Fiber LLC ("Crown Castle") respectfully submits this letter to the City of Miami Beach (the "City") regarding an application seeking Design Review Board (the "Board") review and approval of small wireless facilities within the City. This letter is in reference for a small wireless facility attachment to a utility pole already existing in the right of way, and an electrical meter pedestal within proximity.

As you know, Florida Statutes Section 337.401 allows Crown Castle, a communications services provider, to place its communications facilities within the right of way. Crown Castle collocates its small wireless facilities whenever possible on poles and other infrastructure already existing in the right of way. In this instance, there was not a viable existing Miami Beach streetlight pole in which to place the small wireless facility. Therefore, Crown is proposing to install the small wireless facility on an existing FPL utility pole. FPL will not allow the electrical meter to be placed directly on the pole due to safety hazard. Crown will be installing the electric meter pedestal within proximity of the existing utility pole.

The particular location referenced above was determined by Crown Castle engineers to be the preferred location as it provides additional capacity to both the intended target while taking into account aesthetic and traffic safety criteria.

Please do not hesitate to call or contact me with any further questions or to discuss this matter.

Sincerely,

A handwritten signature in black ink, appearing to read 'Lisette Mauri', with a long horizontal flourish extending to the right.
