

# MIAMI BEACH

## PLANNING DEPARTMENT

### Staff Report & Recommendation

### Design Review Board

TO: DRB Chairperson and Members

DATE: October 02, 2019

FROM: Thomas R. Mooney, AICP  
Planning Director

SUBJECT: DRB19-0449  
**302 West DiLido Drive**

An application has been filed requesting Design Review Approval for the construction of a new two-story single-family residence to replace an existing two-story architecturally significant pre-1942 residence including one or more waivers.

#### **RECOMMENDATION:**

Approved with conditions

#### **LEGAL DESCRIPTION:**

Lot 11 of Block 2, of Di Lido Island, according to the Plat Thereof, as Recorded in Plat Book 8, Page 36, of the Public Records of Miami-Dade County, Florida; Together with an eight (8) foot strip contiguous to same in bay.

#### **SITE DATA:**

Zoning: RS-3  
Future Land Use: RS  
Lot Size: 11,069 SF  
Lot Coverage:  
Existing: 2,625 SF / 24%  
Proposed: 2,933 SF / **26%**  
Maximum: 3,321 SF / 30%  
Unit size:  
Existing: 4,078 SF / 36.8%  
Proposed: 5,532 SF / **49.9%**  
Maximum: 5,634 SF / **50%**  
**2<sup>nd</sup> Floor to 1<sup>st</sup>: 102%\***

**\*DRB WAIVER**

Height:  
Proposed: 24'-0" flat roof  
Maximum: 24'-0" flat roof

Grade: +4.52' NGVD  
Base Flood Elevation: +9.00' NGVD  
Difference: 4.48' NGVD

Adjusted Grade: +6.76' NGVD  
30" (+2.5') Above Grade: +9.26' NGVD  
First Floor Elevation: +12.00' NGVD  
(BFE+3' FB)  
Side Yard Elevations Min: 6.56' Max: 7.02'  
Read Yard Elevations Min: 6.56' Max: 12'

#### **EXISTING STRUCTURE:**

Year: 1936  
Architect: Russel Pancoast  
Vacant: No  
Demolition: Total demolition

#### **SURROUNDING PROPERTIES:**

East: One-story 1936 residence  
North: One-story 1952 residence  
South: One-story 1947 residence  
West: Biscayne Bay

#### **THE PROJECT:**

The applicant has submitted revised plans entitled "302 WDL Residence", as prepared by **[STRANG] Architecture**, dated August 05, 2019.

The applicant is proposing to construct a new two-story residence on a waterfront lot on the western side of DiLido Island.

The applicant is requesting the following waiver(s):

1. The second floor's physical volume exceeds 70% of the first floor in accordance with Section 142-105(b)(4)(c).

**COMPLIANCE WITH ZONING CODE:**

A preliminary review of the project indicates that the application, as proposed, appears to be inconsistent with the following sections of the City Code:

1. For two story homes with an overall lot coverage of 25% or greater, the physical volume of the second floor shall not exceed 70% of the first floor of the main home, exclusive of any enclosed required parking area and exception from this provision may be granted **through DRB approval** in accordance with the applicable design review criteria. **The applicant is requesting a 2<sup>nd</sup> Floor Volume to 1<sup>st</sup> of 102% with a 26% lot coverage which will require a waiver from the DRB.**
2. Unit size diagram and calculations shall be revised to include area of covered terrace exceeding 10'-0" from building wall.
3. The concrete slab, associated with mechanical equipment, within the interior (north) yard shall not be closer than five feet to the interior side lot line, as per section 142-1132(f).
4. If the proposed pool equipment contains a pool heater, then the equipment must follow the setback allowances under Section 142-1132 (f) Central air conditioners, in which case the equipment (and pad) must be no closer than five feet to an interior side property line.

The above noted comments shall not be considered final zoning review or approval. These and all zoning matters shall require final review and verification by the Zoning Administrator prior to the issuance of a Building Permit.

**COMPLIANCE WITH DESIGN REVIEW CRITERIA:**

Design Review encompasses the examination of architectural drawings for consistency with the criteria stated below with regard to the aesthetics, appearances, safety, and function of the structure or proposed structures in relation to the site, adjacent structures and surrounding community. Staff recommends that the following criteria are found to be satisfied, not satisfied or not applicable, as hereto indicated:

1. The existing and proposed conditions of the lot, including but not necessarily limited to topography, vegetation, trees, drainage, and waterways.  
**Not Satisfied; the applicant is requesting one (1) design waiver from the Board.**
2. The location of all existing and proposed buildings, drives, parking spaces, walkways, means of ingress and egress, drainage facilities, utility services, landscaping structures, signs, and lighting and screening devices.  
**Not Satisfied; the applicant is requesting one (1) design waiver from the Board.**

3. The dimensions of all buildings, structures, setbacks, parking spaces, floor area ratio, height, lot coverage and any other information that may be reasonably necessary to determine compliance with the requirements of the underlying zoning district, and any applicable overlays, for a particular application or project.  
**Not Satisfied; the applicant is requesting one (1) design waiver from the Board.**
4. The color, design, selection of landscape materials and architectural elements of Exterior Building surfaces and primary public interior areas for Developments requiring a Building Permit in areas of the City identified in section 118-252.  
**Not Satisfied; the applicant is requesting one (1) design waiver from the Board.**
5. The proposed site plan, and the location, appearance and design of new and existing Buildings and Structures are in conformity with the standards of this Ordinance and other applicable ordinances, architectural and design guidelines as adopted and amended periodically by the Design Review Board and Historic Preservation Boards, and all pertinent master plans.  
**Not Satisfied; the applicant is requesting one (1) design waiver from the Board.**
6. The proposed Structure, and/or additions or modifications to an existing structure, indicates a sensitivity to and is compatible with the environment and adjacent Structures, and enhances the appearance of the surrounding properties.  
**Not Satisfied; the applicant is requesting one (1) design waiver from the Board.**
7. The design and layout of the proposed site plan, as well as all new and existing buildings shall be reviewed so as to provide an efficient arrangement of land uses. Particular attention shall be given to safety, crime prevention and fire protection, relationship to the surrounding neighborhood, impact on contiguous and adjacent Buildings and lands, pedestrian sight lines and view corridors.  
**Satisfied**
8. Pedestrian and vehicular traffic movement within and adjacent to the site shall be reviewed to ensure that clearly defined, segregated pedestrian access to the site and all buildings is provided for and that all parking spaces are usable and are safely and conveniently arranged; pedestrian furniture and bike racks shall be considered. Access to the Site from adjacent roads shall be designed so as to interfere as little as possible with traffic flow on these roads and to permit vehicles a rapid and safe ingress and egress to the Site.  
**Satisfied**
9. Lighting shall be reviewed to ensure safe movement of persons and vehicles and reflection on public property for security purposes and to minimize glare and reflection on adjacent properties. Lighting shall be reviewed to assure that it enhances the appearance of structures at night.  
**Not Satisfied; a lighting plan has not been submitted.**
10. Landscape and paving materials shall be reviewed to ensure an adequate relationship with and enhancement of the overall Site Plan design.  
**Satisfied**

11. Buffering materials shall be reviewed to ensure that headlights of vehicles, noise, and light from structures are adequately shielded from public view, adjacent properties and pedestrian areas.  
**Satisfied**
12. The proposed structure has an orientation and massing which is sensitive to and compatible with the building site and surrounding area and which creates or maintains important view corridor(s).  
**Not Satisfied; the applicant is requesting one (1) design waiver from the Board.**
13. The building has, where feasible, space in that part of the ground floor fronting a street or streets which is to be occupied for residential or commercial uses; likewise, the upper floors of the pedestal portion of the proposed building fronting a street, or streets shall have residential or commercial spaces, shall have the appearance of being a residential or commercial space or shall have an architectural treatment which shall buffer the appearance of the parking structure from the surrounding area and is integrated with the overall appearance of the project.  
**Satisfied**
14. The building shall have an appropriate and fully integrated rooftop architectural treatment which substantially screens all mechanical equipment, stairs and elevator towers.  
**Satisfied**
15. An addition on a building site shall be designed, sited and massed in a manner which is sensitive to and compatible with the existing improvement(s).  
**Not Applicable**
16. All portions of a project fronting a street or sidewalk shall incorporate an architecturally appropriate amount of transparency at the first level in order to achieve pedestrian compatibility and adequate visual interest.  
**Satisfied**
17. The location, design, screening and buffering of all required service bays, delivery bays, trash and refuse receptacles, as well as trash rooms shall be arranged so as to have a minimal impact on adjacent properties.  
**Not Applicable**
18. In addition to the foregoing criteria, subsection 118-104(6)(t) of the City Code shall apply to the design review board's review of any proposal to place, construct, modify or maintain a wireless communications facility or other over the air radio transmission or radio reception facility in the public rights-of-way.  
**Not Applicable**
19. The structure and site complies with the sea level rise and resiliency review criteria in Chapter 133, Article II, as applicable.  
**Not Satisfied; see below**

**COMPLIANCE WITH SEA LEVEL RISE AND RESILIENCY REVIEW CRITERIA**

Section 133-50(a) of the Land Development establishes review criteria for sea level rise and resiliency that must be considered as part of the review process for board orders. The following is an analysis of the request based upon these criteria:

- (1) A recycling or salvage plan for partial or total demolition shall be provided.  
**Not Satisfied**  
**A recycling plan shall be provided as part of the submittal for a demolition/building permit to the building department.**
- (2) Windows that are proposed to be replaced shall be hurricane proof impact windows.  
**Satisfied**
- (3) Where feasible and appropriate, passive cooling systems, such as operable windows, shall be provided.  
**Satisfied**
- (4) Resilient landscaping (salt tolerant, highly water-absorbent, native or Florida friendly plants) shall be provided, in accordance with Chapter 126 of the City Code.  
**Satisfied**
- (5) The project applicant shall consider the adopted sea level rise projections in the Southeast Florida Regional Climate Action Plan, as may be revised from time-to-time by the Southeast Florida Regional Climate Change Compact. The applicant shall also specifically study the land elevation of the subject property and the elevation of surrounding properties.  
**Satisfied**
- (6) The ground floor, driveways, and garage ramping for new construction shall be adaptable to the raising of public rights-of-ways and adjacent land and shall provide sufficient height and space to ensure that the entry ways and exits can be modified to accommodate a higher street height of up to three (3) additional feet in height.  
**Satisfied**
- (7) In all new projects, all critical mechanical and electrical systems shall be located above base flood elevation. Due to flooding concerns, all redevelopment projects shall, whenever practicable, and economically reasonable, move all critical mechanical and electrical systems to a location above base flood elevation.  
**Satisfied**
- (8) Existing buildings shall be, where reasonably feasible and economically appropriate, elevated up to base flood elevation, plus City of Miami Beach Freeboard.  
**Not Applicable**
- (9) When habitable space is located below the base flood elevation plus City of Miami Beach Freeboard, wet or dry flood proofing systems will be provided in accordance with Chapter of 54 of the City Code.  
**Not Applicable**
- (10) In all new projects, water retention systems shall be provided.  
**Not Satisfied**

- (11) Cool pavement materials or porous pavement materials shall be utilized.

**Not Satisfied**

- (12) The project design shall minimize the potential for a project causing a heat island effect on site.

**Not Satisfied**

**STAFF ANALYSIS:**

**DESIGN REVIEW**

The applicant is proposing to construct a new two-story residence on a waterfront parcel on the western side of DiLido Island that will replace an existing pre-1942 architecturally significant two-story residence, designed by Russel Pancoast and built in 1936. The restrained design is under the maximum zoning thresholds for lot coverage and unit size, but requests one design waiver from the Board. The design floor elevation of the new residence is proposed at base floor elevation (9) plus three (3) feet of free board, or +12.00' NGVD.

The proposed residence is designed in a tropical modern style. The architecture is comprised of rectilinear volumes that are richly clad in warm tropical wood tones and natural stones, contrasted with horizontal banding of architectural board-formed concrete and painted stucco. Each façade of the home is a compilation of solid walls and fenestration that are shaded by deep eyebrows and screening. Staff must commend the architect on the amount of architectural attention given to each of the elevations. The structure has an "L" shaped floor plate, with the stem running along the northern edge of the developable lot and the leg terminating at the rear of the site. On the ground floor, the communal spaces are housed at the rear of the site plan—the leg—overlooking the rear yard and bay, while the private and utilitarian rooms are sited within the stem. Such a configuration allows for the southern portion of the site to function, for the most part, as an expansive garden—seamlessly blending indoor and outdoor spaces. The main entrance / foyer of the home is located in the middle portion of the site plan, accessed through an outdoor entry court via a covered breezeway within the garden.

The one requested design waiver pertains to the second floor to first floor ratio of the home. The volume of second floors are restricted to 70% of the first floor when the lot coverage is 25% or greater, unless a waiver is sought by the DRB. As designed, the lot coverage of the home is 26% and its second floor is proposed nearly coterminous with the ground floor, containing 102 percent of the volume of the first floor. When reviewing the second floor volume rule, staff believes that the greater 2<sup>nd</sup> to 1<sup>st</sup> floor ratio request proposed is commensurate with design proposed. The architect has designed the larger part of the south side of the house as an outdoor garden. The design also exhibits a sensitivity to its neighbors by increasing the setbacks of its second floor volume, specifically within the front yard where the second floor portion of the residence is setback 53'-0". Furthermore, the proposed residence is located within the RS-3 zoning district, where an increase of up to 4'-0" in height can be requested through a waiver, and the architect has purposefully kept the home's height at 24'-0" understanding the importance of translating the proportions between the first and second floor, a prominent mid-century characteristic. Staff finds that the design of the home successfully minimizes its impact on adjacent neighbors and the design is only 1% over the lot coverage which, if reduced by 166 SF would exempt the volume from the requirement for a waiver. As such, is supportive of the increased second floor ratio waiver.

In summary, the architect has arrived at an architectural residential design that is elegantly executed, befitting of its neighborhood, as well as responsive to the inherent tropical nature of South Florida. Based on this analysis, staff recommends that the design of the replacement home be approved as designed.

**RECOMMENDATION:**

In view of the foregoing analysis, staff recommends the application be **approved**, subject to the conditions enumerated in the attached Draft Order, which address the inconsistencies with the aforementioned Design Review and Sea Level Rise criteria.

**DESIGN REVIEW BOARD**  
**City of Miami Beach, Florida**

MEETING DATE: October 02, 2019

FILE NO: DRB19-0449

PROPERTY: **302 West DiLido Drive**

APPLICANTS: 302W@DiLido, LLC C/O Barnes International

LEGAL: Lot 11 of Block 2, of Di Lido Island, according to the Plat Thereof, as Recorded in Plat Book 8, Page 36, of the Public Records of Miami-Dade County, Florida; Together with an eight (8) foot strip contiguous to same in bay.

IN RE: The Application for Design Review Approval for the construction of a new two-story single-family residence to replace an existing two-story architecturally significant pre-1942 residence including one or more waivers.

**ORDER**

The City of Miami Beach Design Review Board makes the following FINDINGS OF FACT, based upon the evidence, information, testimony and materials presented at the public hearing and which are part of the record for this matter:

**I. Design Review**

- A. The Board has jurisdiction pursuant to Section 118-252(a) of the Miami Beach Code. The property is not located within a designated local historic district and is not an individually designated historic site.
- B. Based on the plans and documents submitted with the application, testimony and information provided by the applicant, and the reasons set forth in the Planning Department Staff Report, the project as submitted is inconsistent with Design Review Criteria 1, 2, 3, 4, 5, 6, 9, and 19 in Section 118-251 of the Miami Beach Code.
- C. Based on the plans and documents submitted with the application, testimony and information provided by the applicant, and the reasons set forth in the Planning Department Staff Report, the project as submitted is inconsistent with Sea Level Rise Criteria 1, 10, 11 and 12 in Section 133-50(a) of the Miami Beach Code.
- D. The project would be consistent with the criteria and requirements of Section 118-251 and/ or Section 133-50(a) if the following conditions are met:
  - 1. Revised elevation, site plan, and floor plan drawings for the proposed new home at 302 West DiLido Drive shall be submitted, at a minimum, such drawings shall incorporate the following:
    - a. The required 70% limitation for the second floor volume **shall be** waived as proposed and shall not be increased at time of permitting, in a manner to be

reviewed and approved by staff consistent with the Design Review Criteria and/or the directions from the Board.

- b. The concrete slab, associated with mechanical equipment, within the interior (north) yard shall not be closer than five feet to the interior side lot line, as per section 142-1132(f).
  - c. The concrete slab for mechanical equipment shall comply with the required 5'-0" interior side setback, as per section 142-1132(f).
  - d. The final design details and color selection of the bronze aluminum louvers finish shall be submitted, in a manner to be reviewed and approved by staff consistent with the Design Review Criteria and/or the directions from the Board.
  - e. The final design details and finish selection of the keystone shall be submitted, in a manner to be reviewed and approved by staff consistent with the Design Review Criteria and/or the directions from the Board.
  - f. The final design details and finish selection of the exposed concrete shall be submitted, in a manner to be reviewed and approved by staff consistent with the Design Review Criteria and/or the directions from the Board.
  - g. The final design details and finish selection of the ipe wood siding shall be submitted, in a manner to be reviewed and approved by staff consistent with the Design Review Criteria and/or the directions from the Board.
  - h. The final color selection of the painted finish over smooth stucco, shall be submitted, in a manner to be reviewed and approved by staff.
  - i. The final design details of the exterior materials and finishes shall be submitted, in a manner to be reviewed and approved by staff consistent with the Design Review Criteria and/or the directions from the Board.
  - j. The final design details and finish selection of the mechanical pad screen enclosure submitted, in a manner to be reviewed and approved by staff consistent with the Design Review Criteria and/or the directions from the Board.
  - k. A copy of all pages of the recorded Final Order shall be scanned into the plans submitted for building permit, and shall be located immediately after the front cover page of the permit plans.
  - l. Prior to the issuance of a Certificate of Occupancy, the project Architect shall verify, in writing, that the subject project has been constructed in accordance with the plans approved by the Planning Department for Building Permit.
2. A revised landscape plan, prepared by a Professional Landscape Architect, registered in the State of Florida, and corresponding plans shall be submitted to

and approved by staff. The species, type, quantity, dimensions, spacing, location and overall height of all plant material shall be clearly delineated and subject to the review and approval of staff. At a minimum, such plans shall comply with Chapter 26-Landscape Requirements of the Miami Beach Code and shall incorporate the following:

- a. Prior to the issuance of a building permit, the applicant shall submit a tree protection plan for all trees to be retained on site. Such plan shall be subject to the review and approval of staff, and shall include, but not be limited to a sturdy tree protection fence installed at the dripline of the trees prior to any construction.
- b. In order to identify, protect and preserve mature trees on site, which are suitable for retention and relocation, a Tree Report prepared by a Certified Tree Arborist shall be submitted for the mature trees on site.
- c. Any tree identified to be in good overall condition shall be retained and protected in their current location if they are not in conflict with the proposed home, or they shall be relocated on site, if determined feasible, subject to the review and approval of staff. A tree care and watering plan also prepared by a Certified Arborist shall be submitted prior to the issuance of a Building Permit or Tree Removal/Relocation Permit. Subsequent to any approved relocation, a monthly report prepared by a Certified Arborist shall be provided to staff describing the overall tree performance and adjustments to the maintenance plan in order to ensure survivability, such report shall continue for a period of 18 months unless determined otherwise by staff.
- d. Existing trees to be retained on site shall be protected from all types of construction disturbance. Root cutting, storage of soil or construction materials, movement of heavy vehicles, change in drainage patterns, and wash of concrete or other materials shall be prohibited.
- e. The architect shall substantially increase the amount of native canopy shade trees within the site, in a manner to be reviewed and approved by staff consistent with the Design Review Criteria and/or the directions from the Board.
- f. The proposed and existing trees located within the swale shall be subject to the review and approval of Green Space and CIP.
- g. Street trees shall be required within the swale at the front of the property if not in conflict with existing utilities, in a manner to be reviewed and approved by the Public Works Department.
- h. The applicant shall install street trees adjacent to the subject property consistent with the City's Street Tree Master Plan or similar to existing species along the street, in a manner to be reviewed and approved by staff consistent with the Design Review Criteria and/or the directions from the

Board, and root barriers shall be installed along the sidewalk in conjunction with structural soils.

- i. Any existing plant material within the public right-of-way may be required to be removed, as the discretion of the Public Works Department.
- j. A fully automatic irrigation system with 100% coverage and an automatic rain sensor in order to render the system inoperative in the event of rain. Right-of-way areas shall also be incorporated as part of the irrigation system.
- k. The utilization of root barriers and/or Silva Cells, as applicable, shall be clearly delineated on the revised landscape plan.
- l. The applicant shall verify, prior to the issuance of a Building Permit, the exact location of all backflow preventers and all other related devices and fixtures. The location of backflow preventers, Siamese pipes or other related devices and fixtures, if any, and how they are screened with landscape material from the right-of-way, shall be clearly indicated on the site and landscape plans, and shall be subject to the review and approval of staff.
- m. The applicant shall verify, prior to the issuance of a Building Permit, the exact location of all applicable FPL transformers or vault rooms. The location of any exterior transformers and how they are screened with landscape material from the right-of-way shall be clearly indicated on the site and landscape plans and shall be subject to the review and approval of staff.
- n. Prior to the issuance of a Certificate of Occupancy, the Landscape Architect or the project architect shall verify, in writing, that the project is consistent with the site and landscape plans approved by the Planning Department for Building Permit.

**In accordance with Section 118-262, the applicant, or the city manager on behalf of the City Administration, or an affected person, Miami Design Preservation League or Dade Heritage Trust may seek review of any order of the Design Review Board by the City Commission, except that orders granting or denying a request for rehearing shall not be reviewed by the Commission.**

## **II. Variance(s)**

- A. No variance(s) were filed as part of this application.

## **III. General Terms and Conditions applying to both 'I. Design Review Approval' and 'II. Variances' noted above.**

- A. Upon the issuance of a final Certificate of Occupancy or Certificate of Completion, as applicable, the project approved herein shall be maintained in accordance with the plans approved by the board, and shall be subject to all conditions of approval herein, unless otherwise modified by the Board. Failure to maintain shall result in the issuance of a Code Compliance citation, and continued failure to comply may result in revocation of the Certificate of Occupancy, Completion and Business Tax Receipt.

- B. During construction work, the applicant will maintain gravel at the front of the construction site within the first 15'-0" of the required front yard to mitigate disturbance of soil and mud by related personal vehicles exiting and entering the site, and with an 8'-0" high fence with a wind resistant green mesh material along the front property line. All construction materials, including dumpsters and portable toilets, shall be located behind the construction fence and not visible from the right-of-way. All construction vehicles shall either park on the private property or at alternate overflow parking sites with a shuttle service to and from the property. The applicant shall ensure that the contractor(s) observe good construction practices and prevent construction materials and debris from impacting the right-of-way.
- C. If applicable, a Construction Parking and Traffic Management Plan (CPTMP) shall be approved by the Parking Director pursuant to Chapter 106, Article II, Division 3 of the City Code, prior to the issuance of a Building Permit.
- D. A recycling/salvage plan shall be provided as part of the submittal for a demolition/building permit, in a manner to be reviewed and approved by staff.
- E. All applicable FPL transformers or vault rooms and backflow prevention devices shall be located within the building envelope with the exception of the valve (PIV) which may be visible and accessible from the street.
- F. A copy of all pages of the recorded Final Order shall be scanned into the plans submitted for building permit, and shall be located immediately after the front cover page of the permit plans.
- G. The Final Order shall be recorded in the Public Records of Miami-Dade County, prior to the issuance of a Building Permit.
- H. Satisfaction of all conditions is required for the Planning Department to give its approval on a Certificate of Occupancy; a Temporary Certificate of Occupancy or Partial Certificate of Occupancy may also be conditionally granted Planning Departmental approval.
- I. The Final Order is not severable, and if any provision or condition hereof is held void or unconstitutional in a final decision by a court of competent jurisdiction, the order shall be returned to the Board for reconsideration as to whether the order meets the criteria for approval absent the stricken provision or condition, and/or it is appropriate to modify the remaining conditions or impose new conditions.
- J. The conditions of approval herein are binding on the applicant, the property's owners, operators, and all successors in interest and assigns.
- K. Nothing in this order authorizes a violation of the City Code or other applicable law, nor allows a relaxation of any requirement or standard set forth in the City Code.

IT IS HEREBY ORDERED, based upon the foregoing findings of fact, the evidence, information testimony and materials presented at the public hearing, which are part of the record for this matter, and the staff report and analysis, which are adopted herein, including the staff
