Commercial Dog Washing Stations and More

APWs

Our flagship models. These units come in five different varieties and can be programmed to generate revenue or act as a free amenity unit. Owners can set their own rates or use our standard \$10 for 12 minutes configuration. Every unit measures differently in size and has a separate list of features. Use our [interactive guide](#) to help you decide which model is best for you!

Modular Buildings

Our Modular Buildings offer all of the convenience of our APW models with the addition of a fully enclosed bay. These buildings are fully air conditioned for the summer months and heated for those cold winter months. Our buildings also feature a vacuum for sucking up all of the excess water left on your pet after a wash. Modular buildings come in two sizes, a single (8' x 13'), and a double (8' x 21').

Awnings

Built to the same high standards as our aluminum powder coated units, these awnings offer protection from the elements while washing your pet. Our awnings make a great addition to an APW unit and they can be powder coated to match your unit. Alternately, choose another to add some contrast and make your unit pop!

CUSTOMIZATION

Part of what makes our All Paws Pet Wash units so unique is the ability to customize your self serve pet wash unit free of charge.

Choose a color, send us your logo and we'll help you create your one-of-a-kind pet wash to match your existing business's branding.

How Does it Work?

It's simple! Once you have decided that you're purchasing a unit, All Paws Pet Wash requires a 30% down payment and render approval before commencement of your build. After we receive your down payment, one of our graphic designers will reach out to you via email or by phone. We will request some basic information from you such as unit color preference (does not apply to Stainless Steel models), logos, URL's, etc. After we have all the information we need, designers will whip up a rendering of your unit and email it to you. If you have a problem or question about the rendering, want something added / omitted, let the designer know and we'll send another rendering. This process will repeat until you're satisfied with the way your pet wash looks. After we get verbal approval from you, building of your unit will commence! Depending on our work load at our Garden Prairie facility, your unit will take 4-6 weeks to build.

Splash Guard & Door

Instant Water Heater

Credit Card Swipers

Vending Machine with Tre

Credit Card Swiper Options

We prefer working with either CryptoPay or USA Technologies to fulfill your credit card needs.

CryptoPay

USA Tech

The CryptoPay swiper and coordinator allow customers to swipe credit cards as long as you have an internet connection on site. The coordinator can be located within 50' of your pet wash (the closer, the better) and the swiper and coordinator interact wirelessly.

The USA Tech solution works best for owners who do not have an active internet connection on site. This option WILL require a monthly fee to operate.

**If you would like to implement another credit card option, additional installation charges may apply.*
