

Advancements in battery technology and other improvements have triggered a rapid increase in electric vehicle (EV) use here and across the nation. In Florida alone, EV ownership has increased 300% since 2013, making it the fourth largest EV state in the country.¹ And, the adoption of EVs shows no sign of slowing down. Automotive manufacturers continue to produce more and better vehicles than ever before – currently more than 20 battery-electric models in all. For the first time, the average battery-range for all new 2019 EV models is expected to exceed 200 miles.
