PROJECT LIMITS

KEY MAP - LIMITS O

T SECTIONS

PROJECT AREA IS VERY NARROW; PLANTING IS TO PREVAIL. AS THE WIDTH INCREASES TO 6' OR MORE, TREES CAN BE WITH SHRUBS. PLANTING AREAS COULD BE BERMS TO MAKE PLANT HEIGHT MORE DRAMATIC AND EFFECTIVE. PLANTING VARIED WITH TEXTURES AND LAYERS THAT BOTH PROVIDE ADEQUATE BUFFERS AND INTEREST ALONG THE PATH. LARGE TREES TO BE INCLUDED IN CLUSTERS. SHADE TREES ARE PREFERRED OVER PALM PLANTINGS. SECTIONS WIDER THAN 12' LAKING PATH TO BE INCLUDED.

NOTE: VEGETATION IS CONCEPTUAL. IDEAL EFFECT WOULD BE TO MAINTAIN PEDESTRIAN VIEWS TO THE CREEK WHILE BUFFERING SOUND, NOISE, AND LIGHT INTO RESIDENCES ON THE WEST SIDE OF THE CREEK
