Mr. James G. Murphy
Miami Beach Planning Department
Miami Beach City Hall
1700 Convention Center Drive
Miami Beach FL 33139

SUBJECT: Sprint Spectrum LP Letter of Intent for the Installation of Small Wireless Facilities within the Design Districts in the City of Miami Beach.

Dear Mr. Murphy:

Sprint Spectrum LP seeks to place a small wireless facilities network in the City of Miami Beach, which consists of placing fiber optic cable right of way. In order to meet the network coverage objectives of our customer, Sprint Spectrum LP must place a portion of this network within the Design Districts in the City. This letter will serve as support for each of those applications.

Project Description:

As stated above, Sprint Spectrum LP seeks to place a small wireless facilities network in Miami Beach in order to enhance the network capacity of its customer, which is a wireless carrier. The carrier has significant capacity issues in Miami Beach. In order to solve these capacity issues, small wireless facility nodes must be placed in the Design Districts within the City.

Below is the Location for each Site:

MI90XS336-H	1226 12 St., Miami Beach, FL 33139
MI90XSL71-H	601 West Ave., Miami Beach, FL 33139
MI90XSM21-E	1236 13 St., Miami Beach, FL 33139
MI90XSM25-F	1230 14 Ct., Miami Beach, FL 33139
MI90XSM43-H	1220 Lincoln Rd., Miami Beach, FL 33139
MI90XSM45-D	1343 Lincoln Rd., Miami Beach, FL 33139

Equipment Description:

Sprint Spectrum LP has worked with the staff of Miami Beach Planning Department to find a location for the small wireless facility nodes, which would both meet the network objectives of its client and meet the city's aesthetic and safety concerns about placing small wireless facility nodes in the Design Districts. After much discussion and the recent passage of a new telecommunications ordinance by the City Commission addressing the installation of such technology in the City, Sprint Spectrum LP has developed a stealth node which will function as both a street light pole and a telecommunications pole. An existing street light will be removed

and replaced with a functioning small wireless facility stealth street light pole, which will not require additional ground equipment installed in the city right of way.

Conclusion:

Sprint Spectrum LP has worked diligently with City staff to meet all their concerns about placing small wireless facilities within the city, including the Design Districts. Sprint Spectrum LP believes it has satisfied all the City's concerns and accordingly requests that the Design Review Board approve its applications for the installation of small wireless facilities within certain Design Districts in the City.

Sincerely,

A handwritten signature in blue ink, appearing to read "Sheryl Zvi".
