I dont have time to talk about in detail
However this can be further broken up into more phases

The playground and artificial turf can be phased. Also it should be so we don't have a shut down park for longer than necessary.
The playground can be purchased as I designed it with approved vendors that parks department already have on a list so it can be purchased immediately.
It is a stand alone scope and the fact we are 3 years in the process is horrible.

Do not waste anymore time.

Ask them why only now are they proposing a phased solution when finance told them back in January or February to come up with a solution.

Hold them accountable and let's make this happen
