Re: Conditional Use Approval - Fontainebleau Hotel – South Garage and Ballroom Expansion – 4360-4370 Collins Avenue, Miami Beach (the “Property”)

Dear Tom:

This law firm represents Fontainebleau Florida Hotel, LLC (the “Applicant”), the owner of the above-referenced parcel (the “Property”). Please consider this letter the Applicant’s letter of intent in support of the Conditional Use Approval before the City’s Planning Board (“PB”), to allow Accessory Ballrooms and Meeting Rooms associated with the main campus of the Fontainebleau Hotel to occur at the RM-2 parcel across Collins.

Property Description. The Property is between Collins Avenue and Indian Creek Drive between on 43rd Street and 44th Street, and is comprised of approximately 44,714 square feet. The Property is currently used as a surface parking lot to serve the hotel’s operations. The Fontainebleau was originally constructed in 1954 and designed by legendary architect Morris Lapidus. It is located within the Morris Lapidus/Mid-Century Local Historic District, and it is designated as a contributing structure in the City’s Historic Properties Database. While the main hotel campus is in the RM-3 zoning district, the subject Property is located in the RM-2, Residential Multifamily, Medium

Intensity zoning district. The Fontainebleau Hotel most recently opened again in 2008 after an approximately \$1 billion renovation and redevelopment effort.

Proposed Development Program. The Applicant seeks to construct a five-story structure, which will include a grand ballroom, junior ballroom, meeting rooms, a parking garage and a small rooftop area to be primarily used as a pre-function space. The current hotel operation have been limited because of the ill-proportionate allowance of ballroom and meeting spaces in comparison to hotel room keys. Currently, the Fontainebleau lags behind most of its direct competitors and thus has turned significant ballroom and conference business away from Miami Beach over the years. This proposal is intended to address this deficiency and strengthen the hotel's operations and bring more quality events to Miami Beach. Additionally, the new parking garage will be used for employee parking and will address a current need for additional parking for employees.

Satisfaction of Conditional Use Permit Review Criteria. The Applicant's request satisfies the two different sets of review criteria and guidelines as follows:

Conditional Use Standards in Section 118-192(a) of the Code of the City of Miami Beach (the "Code").

(1) The use is consistent with the comprehensive plan or neighborhood plan if one exists for the area in which the property is located.

CONSISTENT – Accessory ballrooms and meeting spaces are consistent with the comprehensive plan as accessory hotel uses and the RM-2 zoning district permits these uses in RM-2 properties that are connected to a hotel through the conditional use process.

(2) The intended use or construction will not result in an impact that will exceed the thresholds for the levels of service as set forth in the comprehensive plan.

CONSISTENT – The proposed use will introduce more parking spaces into the hotel's operation and thus address an existing need for parking in the hotel. Additionally, the additional ballroom and meeting spaces will simply address a need to improve the existing hotel operations. Any impact is expected to be *de minimus* and those not result in any issued as to the levels of service.

(3) Structures and uses associated with the request are consistent with these land development regulations.

CONSISTENT - The structures and uses associated with the Applicant's request for a conditional use permit are consistent with the City's land development regulations (LDRs), pursuant to the code amendment that permits ballrooms and meeting rooms for a hotel to be located in an adjacent RM-2 parcel.

(4) The public health, safety, morals, and general welfare will not be adversely affected.

CONSISTENT - The Applicant proposes an expansion to the existing ballroom and meeting room allocation for the Fontainebleau Hotel. The majority of the uses are fully enclosed and are not expected to negatively impact surrounding areas. Additionally, the small rooftop area will be limited to 11pm and ambient noise with no outdoor entertainment. As a result, no negative impact is expected there either.

(5) Adequate off-street parking facilities will be provided.

CONSISTENT - The proposing parking will meet the City's off-street parking code and will further address an existing need for employee parking and efficiency within the hotel operation.

(6) Necessary safeguards will be provided for the protection of surrounding property, persons, and neighborhood values.

CONSISTENT - The Applicant will carefully control and monitor the music at the establishment, ensuring that the music is contained within the building. Security personnel will also ensure a safe nighttime operation.

(7) The concentration of similar types of uses will not create a negative impact on the surrounding neighborhood. Geographic concentration of similar types of conditional uses should be discouraged.

CONSISTENT - As this is simply an extension of an existing hotel operation, the proposed use will not add to any additional concentration of similar uses in the neighborhood. Further, hotels and their accessory uses are permitted in the RM-2 zoning district.

I. Conditional Use Standards in Section 118-192(b) of the Code of the Code

(1) Whether the proposed business operations plan has been provided, including hours of operation, number of employees, goals of business, and other operational characteristics pertinent to the application, and that such plan is compatible with the neighborhood in which it is located.

CONSISTENT - A detailed operations plan has been submitted with this application.

(2) Whether a plan for the mass delivery of merchandise has been provided, including the hours of operation for delivery trucks to come into and exit from the neighborhood and how such plan will mitigate any adverse impacts to adjoining and nearby properties, and neighborhood.

CONSISTENT - A delivery/loading area has been provided within the parking structure. Additionally, the Applicant is working with the City's Parking Department to identify an appropriate street loading area for large vehicles, as needed.

(3) Whether the scale of the proposed use is compatible with the urban character of the surrounding area and create adverse impacts on the surrounding area, and how the adverse impacts are proposed to be addressed.

CONSISTENT - The proposed use is compatible with the urban character of the surrounding area. While the surrounding area is not the most pedestrian friendly area in Miami Beach, the Applicant has worked with staff and its design professionals to develop inviting landscaped terraces along the ground level perimeter of the structure.

(4) Whether the proposed parking plan has been provided, including where and how the parking is located, utilized, and managed, that meets the required parking and operational needs of the structure and proposed uses.

CONSISTENT - A parking plan has been included in the traffic study and operations plan.

(5) Whether an indoor and outdoor customer circulation plan has been provided that facilitates ingress and egress to the site and structure.

Mr. Thomas Mooney
March 19, 2020
Page 5

CONSISTENT - The primary customers will be hotel guests and circulation will be through the hotel lobby, and entrance to the structure will occur via the pedestrian bridge.

(6) Whether a security plan for the establishment and supporting parking facility has been provided that addresses the safety of the business and its users and minimizes impacts on the neighborhood.

CONSISTENT - There will be on-site security and on-site parking.

(7) Whether a traffic circulation analysis and plan has been provided that details means of ingress and egress into and out of the neighborhood, addresses the impact of projected traffic on the immediate neighborhood, traffic circulation pattern for the neighborhood, traffic flow through immediate intersections and arterials, and how these impacts are to be mitigated.

CONSISTENT - A traffic study has been provided.

(8) Whether a noise attenuation plan has been provided that addresses how noise will be controlled in the loading zone, parking structures and delivery and sanitation areas, to minimize adverse impacts to adjoining and nearby properties.

CONSISTENT - Much of the loading will be within concrete walls so noise impacts will be minimal. Additionally, the intent is for most of these impacts to occur within the Property, further minimizing external impacts. There is no entertainment proposed for the property on the roof deck.

(9) Whether a sanitation plan has been provided that addresses on-site facilities as well as off-premises issues resulting from the operation of the structure.

CONSISTENT - The Applicant will contract with a waste collection company for refuse collection 7 days a week in the morning hours. Internally, staff will police the property and adjoining rights of way to maintain the areas clean and free from debris.

(10) Whether the proximity of the proposed structure to similar size structures and to residential uses creates adverse impacts and how such impacts are mitigated.

CONSISTENT - There are similarly sized structures in the general proximity of the Property. The immediately surrounding structures are primarily hotels. The nearest

Mr. Thomas Mooney
March 19, 2020
Page 6

residential uses are to the west of the Property across Indian Creek and the waterway. The vast majority of the uses are indoors and should have no impact on the residential properties. The uses on the roof will be minimal and limited in hours and intensity. As a result, any impact associated with the roof deck will be minimal.

(11) Whether a cumulative effect from the proposed structure with adjacent and nearby structures arises, and how such cumulative effect will be addressed.

CONSISTENT - The project is not really creating a new use as it is simply expanding the existing Fontainebleau Hotel operation onto a property already owned by the hotel. The area has several other hotels around it but hotel development in this area is expected and encouraged pursuant to the City's land development regulations and the historic character of the area.

Satisfaction of Neighborhood Impact Establishment Review Guidelines.

The application also satisfies the review guidelines provided for neighborhood impact establishments provided for in Section 142-1362 of the City Code, as follows:

- (1) An operational/business plan which addresses hours of operation, number of employees, menu items, goals of business, and other operational characteristics pertinent to the application.**

An operations plan has been submitted as a component of this application

- (2) A parking plan which fully describes where and how the parking is to be provided and utilized, e.g., valet, selfpark, shared parking, after-hour metered spaces and the manner in which it is to be managed.**

A parking plan has been submitted within the Operations Plan. The parking within this parking garage will be for employees only. Guests of the hotel will continue to drop off their cars on the main campus of the hotel.

- (3) An indoor/outdoor crowd control plan which addresses how large groups of people waiting to gain entry into the establishment, or already on the premises will be controlled.**

The Applicant will keep all of queuing required within the hotel and entertainment uses are not proposed on this new expansion. This along with

the Applicant's security plan, will ensure that crowd control is not an issue on the Property.

- (4) A security plan for the establishment and any parking facility, including enforcement of patron age restrictions.**

A security plan has been submitted.

- (5) A traffic circulation analysis and plan which details the impact of projected traffic on the immediate neighborhood and how this impact is to be mitigated.**

A traffic study has been submitted and has been reviewed by the City's Transportation Department and will additionally be reviewed by the City's peer reviewer.

- (6) A sanitation plan which addresses on-site facilities as well as off-premises issues resulting from the operation of the establishment.**

Trash pickup times have been included in the Operational Plan.

- (7) A noise attenuation plan which addresses how noise will be controlled to meet the requirements of the noise ordinance.**

A sound study was not required with this application, as outdoor entertainment is not proposed.

- (8) Proximity of proposed establishment to residential uses.**

The nearest residential uses are to the west of the Property across Indian Creek and the waterway. The vast majority of the uses are indoors and should have no impact on the residential properties. The uses on the roof will be minimal and limited in hours and intensity. As a result, any impact associated with the roof deck will be minimal.

- (9) Cumulative effect of proposed establishment and adjacent pre-existing uses.**

The project is not really creating a new use as it is simply expanding the existing Fontainebleau Hotel operation onto a property already owned by the hotel. The

area has several other hotels around it but hotel development in this area is expected and encourage pursuant to the City's land development regulations and the historic character of the area.

Satisfaction of Mechanical Parking Review Criteria. The Applicant's request satisfies the mechanical parking review criteria and guidelines as described in 130-38(4):

(1) Whether the scale of the proposed structure is compatible with the existing urban character of the surrounding neighborhood.

CONSISTENT - The proposed use is compatible with the urban character of the surrounding area. While the surrounding area is not the most pedestrian friendly area in Miami Beach, the Applicant has worked with staff and its design professionals to develop inviting landscaped terraces along the ground level perimeter of the structure.

(2) Whether the proposed use of mechanical parking results in an improvement of design characteristics and compatibility with the surrounding neighborhood.

CONSISTENT - The proposed use of mechanical parking results in the improvement of design characteristics and compatibility with the surrounding neighborhood. Specifically, the use of the mechanical parking will improve the design by reconfiguring the space allocated to meet the off-street parking requirements. The reconfigured space allows for the introduction of landscaped terraces at the pedestrian level. Furthermore, it is no longer desirable to have large parking structures as personal automobile usage is expected to continue to decrease.

(3) Whether the proposed use of mechanical parking does not result in an increase in density or intensity over what could be constructed with conventional parking.

CONSISTENT - The proposed use of mechanical parking does not result in an increased density or intensity over that which could be constructed with conventional parking methods. The proposed project aims to meet the City's off-street parking requirement and desires to accomplish this with mechanical parking.

(4) Whether parking lifts or mechanisms are located inside, within a fully enclosed building, and not visible from exterior view.

CONSISTENT - The proposed mechanical parking lifts will be located within a fully enclosed building and will not be visible from exterior view.

(5) In cases where mechanical parking lifts are used for self-parking in multifamily residential buildings; whether approval is conditioned upon the proper restrictive covenant being provided limiting the use of each lift to the same unit owner.

CONSISTENT - Not applicable.

(6) In cases where mechanical parking lifts are used for valet parking; whether approval is conditioned upon the proper restrictive covenant being provided stipulating that a valet service or operator must be provided for such parking for so long as the use continues.

CONSISTENT - The proposed mechanical parking lifts will be operated by a valet. Accordingly, a restrictive covenant will be proffered.

(7) Whether a traffic study has been provided that details the ingress, egress and circulation within the mechanical parking facility, and the technical and staffing requirements necessary to ensure that the proposed mechanical parking system does not cause excessive stacking, waiting, or backups onto the public right-of-way.

CONSISTENT - A traffic study has been provided which addresses the details of the mechanical parking facility.

(8) Whether a proposed operations plan, including hours of operation, number of employees, maintenance requirements, noise specifications, and emergency procedures, has been provided.

CONSISTENT - An operations plan has been submitted with the application.

(9) In cases where the proposed facility includes accessory uses in addition to the parking garage, whether the accessory uses are in proportion to the facility as a whole, and delivery of merchandise and removal of refuse, and any additional impacts upon the surrounding neighborhood created by the scale and intensity of the proposed accessory uses, are adequately addressed.

events. The accessory use, and facility as a whole, will be conscientious neighbors and will aim to have minimal impacts on the surrounding neighborhood.

(10) Whether the proximity of the proposed facility to similar size structures and to residential uses creates adverse impacts and how such impacts are mitigated.

CONSISTENT - There are similar size structures in the proposed structure's vicinity. However, the proposed structure is compatible with the area and will not create any adverse impacts.

(11) Whether a cumulative effect from the proposed facility with adjacent and nearby structures arises, and how such cumulative effect will be addressed.

Compliance with Sea Level Rise and Resiliency Review Criteria. Section 133-50(a) of the City Code establishes review criteria for sea level rise and resiliency that must be considered as part of the review process for board orders. The following is an analysis of the request based upon these criteria:

(1) A recycling or salvage plan for partial or total demolition shall be provided.

The Applicant will provide a recycling or salvage plan during permitting, as needed. Demolition will be very limited as the primary site is an at grade parking lot.

(2) Windows that are proposed to be replaced shall be hurricane proof impact windows.

Noted. But the structure is entirely new construction.

(3) Where feasible and appropriate, passive cooling systems, such as operable windows, shall be provided.

Noted.

(4) Whether resilient landscaping (salt tolerant, highly water-absorbent, native or Florida friendly plants) will be provided.

The Applicant's proposed landscape plan is resilient as it will serve to be comprised of native and friendly plants that are highly water-absorbent.

- (5) Whether adopted sea level rise projections in the Southeast Florida Regional Climate Action Plan, as may be revised from time-to-time by the Southeast Florida Regional Climate Change Compact, including a study of land elevation and elevation of surrounding properties were considered.**

The Applicant and its design team have discussed with staff and further considered seal level rise projections and modified elevations in response to the same.

- (6) The ground floor, driveways, and garage ramping for new construction shall be adaptable to the raising of public rights-of-ways and adjacent land.**

The Applicant has worked with its architects and consultants to ensure to ensure that the ground floor, driveways and garage ramping is adaptable to rising elevations where applicable.

- (7) Where feasible and appropriate, all critical mechanical and electrical systems shall be located above base flood elevation.**

All critical mechanical and electrical systems will be located above Base Flood Elevation (BFE).

- (8) Existing buildings shall be, where reasonably feasible and appropriate, elevated to the base flood elevation.**

Noted. But there are no existing buildings on the site.

- (9) When habitable space is located below the base flood elevation plus City of Miami Beach Freeboard, wet or dry flood proofing systems will be provided in accordance with Chapter of 54 of the City Code.**

There is no habitable space located below base flood elevation.

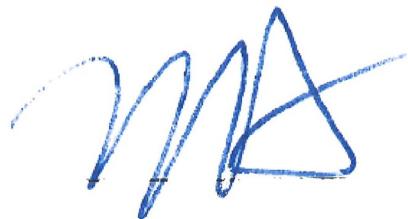

- (10) Where feasible and appropriate, water retention systems shall be provided.**

Noted.

General Correction #1:

- 1- Provide a written response to comments.

RESPONSE: ACKNOWLEDGED

- 2- Are there any utility easement on the site? If so, please identify and note that only sod may be permitted within the easement as per CMB PW Department. Add note on plans in reference to the existence or absence of any easement.

RESPONSE: ACKNOWLEDGED

- 3- Removal of any non-invasive trees with a 6" DBH or greater from private property would require a Tree Removal Permit from CMB Urban Forestry. Removal of any non-invasive trees with a 3" DBH or greater from public property would also require a Tree Removal Permit from CMB Urban Forestry Address mitigation requirements per the most recent code change as part of the proposed landscape plan.

RESPONSE: ACKNOWLEDGED

- 4- The proposed landscape plan shall satisfy or exceed minimum landscape code requirements as prescribed by CMB Code Chapter 126. Include standard CMB Landscape Legend on plans. Landscape legend is available at the following link:

5- <https://www.miamibeachfl.gov/wp-content/uploads/2017/08/Landscape-Legend-Form-7-11-2016.pdf>

RESPONSE: LANDSCAPE LEGEND HAS BEEN ADDED TO THE PLANS, SEE SHEET LP-03

RESPONSE: SILVA CELLS ARE BEING USED ON TREES WHERE ROOTING SPACE IS LIMITED, SEE SHEET LP-01

- 10- Provide a comprehensive Tree Report prepared by a ISA Certified Arborist for any existing tree or palm scheduled for relocation or removal. Site plan modification may be required in order to adequately protect root zone and canopy of trees indentified to be in good health. Every effort shall be made to preserve and protect existing trees identified to be in good health subject to the review and approval of the City of Miami Beach Urban Forester. Applicant shall be responsible for the relocation and maintenance of any trees identified to be in good health to public property for up to one year after relocation.
