DESIGN ELEMENTS**

The design aesthetic of the driveway folly is inspired by the 1950'-1960's architecture of Morris Lapidus most notably depicted on Lincoln Road. The reinforced concrete follies or "doodles", as Lapidus referred to them, depicted whimsical and striking designs that stem from extravagant scales and unique forms such as "geometric mushrooms and armadillo shells." The smooth, curvilinear forms of this proposed folly structure connect the soft, curvilinear forms of the proposed residence to the rich architectural history of Miami Beach. In this way, the entry structure becomes the architectural threshold between the historic city and the new residence.
