## HISTORICAL BACKGROUND

- Prior to the turn of the 20<sup>th</sup> Century, much of the land surrounding the Tatum Waterway, was purchased by Henry B. Lum from the Federal Government for 35 cents/acre, for the purpose of establishing a commercial coconut farm that extended from Key Biscayne to Jupiter, Florida.
- While the subdivision and planning of the majority of North Beach began following the end of WWI, the area along the Tatum Waterway was not subdivided or developed until after WWII
- During the early 1940s, the City's population exploded and land values soared. This changing economy and demand for housing following WWII, spurred the planning and subdivision of the land surrounding the Tatum Waterway
- The Tatum Waterway Subdivision was the last major subdivision to be platted in the City (Jacob and Claire Freidus' Branch Corporation, 1946)
