I. REQUEST

On September 9, 2014, the Historic Preservation Board directed Planning Department staff to prepare formal Historic Designation Reports for the proposed designation of the North Shore and Normandy Isles local historic districts, with modified boundaries.

At the September 10, 2014 City Commission meeting, the Mayor and City Commission discussed the proposed North Shore and Normandy Isles Local Historic Districts and denied the designations.

At the July 13, 2016 City Commission meeting, the Mayor and City Commission discussed the possibility of creating local historic districts within the boundaries of the North Shore and Normandy Isles National Register Districts and directed the Administration to begin the local designation process for the boundaries recommended in the draft North Beach Master Plan.

On October 11, 2016, the Historic Preservation Board reviewed a Preliminary Evaluation and Recommendation Report relative to the possible designation of the North Shore Historic District and directed staff to prepare a Formal Designation Report for the North Shore Local Historic District, with boundaries as recommended in the draft North Beach Master Plan.

Pursuant to Section 118-591 of the City Code, the City Commission was advised of the action of the Historic Preservation Board via LTC, and as part of a progress report on the demolition moratorium, presented at the October 19, 2016 City Commission meeting.

On December 5, 2016, the Mayor and City Commission modified the boundaries for the proposed North Shore Historic District by removing the portion of the district along Tatum Waterway Drive and Crespi Boulevard.

On September 25, 2017, the Mayor and City Commission adopted Resolution 2017-30013, reaffirming Resolution No. 2016-29608, which adopted the North Beach Master Plan as drafted by Dover, Kohl & Partners and commits to the implementation of the entirety of the Plan. The Resolution adopted on September 25, 2017 contains the following 'Whereas' clause:

WHEREAS, consistent with the Plan, the Mayor and City Commission now feels that it would be in the City's best interest and desires to include the Tatum Waterway area into the North Shore Local Historic District, and continue to create development regulations for the districts that reflect the character of these neighborhoods, while taking into consideration resiliency and sea level rise.

On October 10, 2017, the Historic Preservation Board reviewed an historic designation report for the proposed North Shore Local Historic District, consistent with the boundaries as modified by the City Commission on December 5, 2016 (**MAP 1**). At this meeting, the Board transmitted the historic district designation to the Planning Board and City Commission with a favorable recommendation, and directed staff to prepare a preliminary evaluation expanding the North Shore Local Historic District to include the area along Tatum Waterway/Crespi Boulevard as identified in the North Beach Master Plan.

On November 21, 2017, the Planning Board reviewed the designation report and unanimously approved a motion (7 to 0) to recommend approval of the designation of the proposed North Shore Historic District.

On December 13, 2017, the Mayor and City Commission unanimously approved the designation (7 to 0) of the North Shore Historic District on first reading public hearing and scheduled the second reading public hearing for January 17, 2018.

On December 18, 2017, the Historic Preservation Board reviewed a Preliminary Evaluation and Recommendation Report relative to the possible expansion of the North Shore Historic District and directed staff to prepare a Formal Designation Report for the North Shore Local Historic District Tatum Waterway Expansion. The possible expansion area is generally bounded by 77th Street on the south, Hawthorne Avenue and Crespi Boulevard on the west, 87th Street on the north and Tatum Waterway Drive and Byron Avenue on the east.

On January 17, 2018, the Mayor and City Commission adopted the designation (7 to 0) of the North Shore Historic District on second reading public hearing.

On March 12, 2018, the Historic Preservation Board transmitted the proposed North Shore Historic District Tatum Waterway Expansion to the Planning Board and City Commission with a favorable recommendation (7 to 0).

On March 27, 2018, the Planning Board transmitted the proposed North Shore Historic District Tatum Waterway Expansion to the Planning Board and City Commission with a favorable recommendation (7 to 0).

On April 11, 2018, the Mayor and City Commission approved the designation of the North Shore Historic District Tatum Waterway Expansion on first reading public hearing and scheduled the second reading public hearing for May 16, 2018.

On May 16, 2018, the Mayor and City Commission adopted the designation of the North Shore Historic District Tatum Waterway Expansion on second reading public hearing.

On September 1, 2020, the City Manager initiated the process of re-noticing the designation of the North Shore Historic District Tatum Waterway Expansion to avoid irreparable harm and in an abundance of caution while the City seeks review of the recent circuit court appellate division decision in YTech-180 Units Miami Beach Investment, LLC v. City of Miami Beach (Fla. 11th Cir. Case No. 2018-184-AP-01). Without waiving any right to further challenge the circuit court's decision, without waiving any argument, defense, or claim, and to protect the historic resources at issue, the City will be providing notice in accordance with the circuit court's construction of Section 118-591(f) and Section 118-8 of the City Code of Miami Beach.

The preliminary evaluation and recommendation for the North Shore Historic District Tatum Waterway Expansion was noticed in accordance with Section 118-591(e) of the City Code – entitled "Interim procedures for demolition permits." Section 118-591(e) establishes the following

notice requirement for the Historic Preservation Board when it considers a preliminary evaluation and recommendation: “[t]he planning director, or designee, may prepare and submit to the historic preservation board an evaluation and recommendation for designation at a meeting noticed in a newspaper of general circulation at least five business days in advance of the hearing” Additionally, “[t]he property owner shall be notified in writing, by regular mail sent to the address of the owner on the Miami-Dade County Property Appraiser's tax records, and postmarked at least five business days in advance of the hearing.” Notice of the September 14, 2020 special meeting of the Historic Preservation Board was published in the Miami Herald on September 3, 2020 and a written notice, postmarked on September 2, 2020, was sent by regular mail to all property owners according to the Miami Dade County Property Appraiser’s tax records, within the possible historic district expansion boundaries.

In accordance with its duties under Section 118-591(e), on September 14, 2020, the Historic Preservation Board reviewed a Preliminary Evaluation and Recommendation Report relative to the possible expansion of the North Shore Historic District and directed staff to prepare a Formal Designation Report for the North Shore Local Historic District Tatum Waterway Expansion. The possible expansion area is generally bounded by 77th Street on the south, Hawthorne Avenue and Crespi Boulevard on the west, 87th Street on the north and Tatum Waterway Drive and Byron Avenue on the east. Pursuant to Section 118-591 of the City Code, The City Commission was advised of the action of the Historic Preservation Board via LTC 330-2020.

The City’s presentation of the Historic Designation Report was noticed in accordance with the circuit court’s construction of Section 118-591(f) and Section 118-8 of the City Code. The request to extend the interim procedures for demolition was noticed in accordance with Section 118-164 of the City Code.

On October 13, 2020, the Planning Department presented a Historic Designation Report for the North Shore Local Historic District Tatum Waterway Expansion. During this meeting, the Board approved a motion to extend the interim procedures imposed under Section 118-591(e) of the City Code. Additionally, the Board continued the review of the Historic Designation Report to a date certain of December 8, 2020.

On December 8, 2020, the Historic Preservation Board transmitted the proposed North Shore Historic District Tatum Waterway Expansion to the Planning Board and City Commission with a favorable recommendation (7 to 0) and the Board recognized that the interim procedures in section 118-591(e) shall continue to apply.

On April 27, 2021, the Planning Board held a public hearing and transmitted the ordinance to the City Commission with a favorable recommendation by a vote of 5-1.

II. DESIGNATION PROCESS

The process of historic designation is delineated in Sections 118-591 through 118-593 in Subpart B of the Land Development Regulations of the City Code (Chapter 118, Article X, Division 4). An outline of this process is delineated below.

Step One: A request for designation is made either by the City Commission, the Historic Preservation Board, the City Manager, and/or those other agencies and organizations as listed in the Land Development Regulations of the City Code, or the property owners involved. Proposals for designation shall include a completed application form available from the Planning Department.

Step Two: The Planning Department prepares a preliminary evaluation report with recommendations for consideration by the Board. The Planning Director or the Director's designee may, pursuant to City Code Section 118-591(e), "prepare and submit to the historic preservation board an evaluation and recommendation for designation at a meeting noticed in a newspaper of general circulation at least five business days in advance of the hearing." Additionally, "[t]he property owner shall be notified in writing, by regular mail sent to the address of the owner on the Miami-Dade County Property Appraiser's tax records, and postmarked at least five business days in advance of the hearing."

Step Three: The Historic Preservation Board considers the preliminary evaluation to determine if proceeding with a designation report is warranted. The designation report is an historical and architectural analysis of the proposed district or site. The report:

- 1) describes the historic, architectural and/or archeological significance of the property or subject area proposed for Historical Site or District designation;
- 2) recommends Evaluation Guidelines to be used by the Board to evaluate the appropriateness and compatibility of proposed Developments affecting the designated Site or District; and
- 3) will serve as an attachment to the Land Development Regulations of the City Code.

Step Four: The City Commission is notified of the Board's decision and the initial boundaries proposed for designation. Within 60 days of the vote of the Historic Preservation Board to direct the Planning Department to prepare a designation report, the City Commission may, by a five-sevenths vote, deny or modify the proposed request for designation.

Step Five: The designation report is presented to the Historic Preservation Board at a public hearing. Notice of the public hearing is provided consistent with the circuit court's construction of Section 118-591(f) and Section 118-8 of the City Code. If the Board determines that the proposed site or district satisfies the requirements for designation as set forth in the Land Development Regulations of the City Code, the Board transmits a recommendation in favor of designation to the Planning Board and City Commission.

Step Six: The Planning Board will hold a public hearing on the proposed designation, and shall consider the proposed historic designation as an amendment to the Land Development Regulations of the City Code and, subsequently, transmit its recommendation to the City Commission.

Step Seven: The City Commission may adopt an amendment to the Land Development Regulations of the City Code by a five-sevenths majority vote, which thereby designates the Historic Preservation Site or Historic District after one (1) public hearing for a parcel of land less than ten (10) contiguous acres or after two (2) public hearings for a parcel of land that is more than ten (10) contiguous acres.

III. RELATION TO ORDINANCE CRITERIA

1. In accordance with Section 118-592 in the Land Development Regulations of the City Code, eligibility for designation is determined by the Historic Preservation Board on the basis of compliance with the listed criteria set forth below.
 - (a) The Historic Preservation Board shall have the authority to recommend that properties be designated as historic buildings, historic structures, historic improvements, historic landscape features, historic interiors (architecturally significant public portions only), historic sites or historic districts if they are significant in the historical, architectural, cultural, aesthetic or archeological heritage of the city, the county, state or nation. Such properties shall possess an integrity of location, design, setting, materials, workmanship, feeling or association and meet at least one (1) of the following criteria:
 - (1) Association with events that have made a significant contribution to the history of the city, the county, state or nation;
 - (2) Association with the lives of persons significant in the city's past history;
 - (3) Embody the distinctive characteristics of an historical period, architectural or design style or method of construction;
 - (4) Possesses high artistic values;
 - (5) Represent the work of a master, serve as an outstanding or representative work of a master designer, architect or builder who contributed to our historical, aesthetic or architectural heritage;
 - (6) Have yielded, or are likely to yield information important in pre-history or history;
 - (7) Be listed in the National Register of Historic Places;

- (8) Consist of a geographically definable area that possesses a significant concentration of sites, buildings or structures united by historically significant past events or aesthetically by plan or physical development, whose components may lack individual distinction.
 - (b) A building, structure (including the public portions of the interior), improvement or landscape feature may be designated historic even if it has been altered if the alteration is reversible and the most significant architectural elements are intact and repairable.
2. The proposed North Shore Historic District Tatum Waterway Expansion is eligible for historic designation as it complies with the criteria as specified in Section 118-592 in the Land Development Regulations of the City Code outlined above.

Staff finds that the properties listed as contributing within the proposed North Shore Historic District Tatum Waterway Expansion possess integrity of location, design, setting, materials, workmanship, feeling or association for the following reasons:

The Planning Department has surveyed the 104 buildings located within the boundaries of the proposed North Shore Historic District Tatum Waterway Expansion and has found that 67 of these buildings satisfy the requirements of Section 118-593(a) of the Land Development Regulations of the City Code. The contributing buildings, which possess integrity of their original location, are mainly examples of modest Post-World War II tourist hotels, apartment buildings, and commercial buildings that constitute a distinctive built environment of resort architecture. The proposed North Shore Historic District Tatum Waterway Expansion owes much of its character to the repetition of similar building types and styles within a compact space. The largely multi-residential development grew up almost entirely after World War II, and its planning was largely designed around garden oriented apartment buildings emphasizing the simple modern architectural motifs of mid-century America.

- (a) Further, staff finds the proposed historic district to be eligible for historic designation and in conformance with the designation criteria for the following reasons:

- (1) **Association with events that have made a significant contribution to the history of the city, the county, state or nation.**

The majority of contributing properties within the possible historic district expansion area directly reflect the turn of events in America following World War II. Specifically, 88 of the 104 buildings within the possible historic district expansion were constructed between 1942 and 1965. Unprecedented development followed the American success in WWII when new resort hotels and residential resort architecture were contemplated.

Development during this time was on a scale never before seen in South Florida. This event marks a vitally important historic period in the evolution of resort architecture in Miami Beach and Florida.

Furthermore, Miami Beach played a significant role as a training site and redistribution center for the U.S. Army-Air Forces during World War II. After the war, many veterans who had trained as recruits in Miami Beach returned here to vacation or to make their home.

(3) **Embody the distinctive characteristics of a historical period, architectural or design style or method of construction.**

The apartment buildings that characterize much of the built environment of the possible historic district expansion area exemplify the plasticity and transparency of Moderne architectural styling and the later Post War Modern movements, featuring cubic massing and large glass casement windows which cross-ventilated each unit and were sheltered by projecting concrete eyebrows. Exterior catwalks and outdoor stairways predicted the more functional building types of the postwar period. Often, two buildings were mirrored, or turned at angles in order to create common garden spaces, and better take advantage of the southern exposure. On the interior, a combination of bedrooms and studio apartments featured dinettes, dressing rooms, and streamlined kitchens.

As the district urbanized, it developed an architectural character calibrated to its resort identity, its modest means and its speculative planning. Beginning in the late 1930s, the district was more intensively developed with modern garden apartment building types that sponsored a corresponding urban culture in both the civic and commercial realm. These buildings were adapted to both the narrow lots and local environment conditions with patios, surrounding gardens, porches, loggias, flat roofs with broad overhanging eaves and exterior staircases and catwalks.

These new types, multiplied in large numbers, produce a densely built environment where low-scale buildings allow landscaping to moderate the urban frontages. The scale of architecture along the Tatum Waterway is largely consistent, a product of the fact that a relatively small group of architects constructed much of the area in a short period and literally gave shape to the district. These architects defined a new direction of mid-century modern design in Miami Beach. Their buildings, conditioned to the environmental forces of a hot and humid climate as, well as to the need to distinguish buildings within a competitive environment, led to a daring and unexpected expression of modern themes.

(7) **Be listed in the National Register of Historic Places.**

The properties located within the proposed North Shore Local Historic District Tatum Waterway Expansion are located within the North Shore Historic District, listed on the National Register of Historic Places on November 18, 2009.

- (8) **Consist of a geographically definable area that possesses a significant concentration of sites, buildings or structures united by historically significant past events or aesthetically by plan or physical development, whose components may lack individual distinction.**

Nearly 65% of the 104 buildings located within the proposed North Shore Historic District have been found to possess architectural and historical significance.

3. The historic preservation board shall consider if the historic buildings, historic structures, historic improvements, historic landscape features, historic interiors (architecturally significant public portions only), historic sites, or historic districts comply with the sea level rise and resiliency review criteria in Chapter 133, Article II of the City Code, as applicable, pursuant to Section 118-592.

(a) Criteria for ordinances, resolutions, or recommendations:

- (1) **Whether the proposal affects an area that is vulnerable to the impacts of sea level rise, pursuant to adopted projections.**

The possible historic district expansion area affects properties that are vulnerable to the impacts of sea level rise. The adopted projections are the following:

At Mean High Water, Sea Level Rise is projected to be (NGVD Elevations):

- 2.31 to 2.64 by 2030 (near-term)
- 2.98 to 3.98 by 2060 (mid-term)
- 4.39 to 6.89 by 2100 (long-term)

ESTIMATED from LIDAR and 1995 Partial Building Records indicates the following for the area located to the east of the Tatum Waterway:

- Average Existing Crown of Road – 4.56 NGVD
- Future Crown of Road – 5.26 NGVD
- Average Existing Edge of Pavement – 3.69 NGVD
- Future Edge of Pavement – 5.06 NGVD
- Average Ground Elevation – 3.90 NGVD

ESTIMATED from LIDAR and 1995 Partial Building Records indicates the following for the area located to the west of the Tatum Waterway:

- Average Existing Crown of Road – 4.40 NGVD
- Future Crown of Road – 5.26 NGVD
- Average Existing Edge of Pavement – 3.45 NGVD
- Future Edge of Pavement – 5.06 NGVD
- Average Ground Elevation – 3.96 NGVD

The estimated Lidar data indicates the majority of the subject properties have ground elevations that are currently at a level below the future crown of road elevation.

(2) **Whether the proposal will increase the resiliency of the City with respect to sea level rise.**

In order for the historic district expansion to increase the resiliency of the City, the potential future alterations, proposed adaptive re-use and/or redevelopment of the properties will require review through the Certificate of Appropriateness process to ensure that proposed new construction conforms to the Sea Level Rise criteria outlined in Sections 118-564 and 133-50(a) of the City Code. A suitable level of flexibility will be necessary when reviewing future applications for Certificates of Appropriateness for alterations, demolition, additions to existing buildings and new construction for the properties to meet current and future Building Codes and the City's resiliency standards. As indicated above, future proposed projects located within the proposed historic district expansion will be reviewed on a project specific basis for consistency with Certificate of Appropriateness criteria as well as the Sea Level Rise criteria outline in Sections 118-564 and 133-50(a) of the City Code. Review of proposed future changes within the area in accordance with the adopted Sea Level Rise criteria will ensure that this current proposal for historic designation will increase the resiliency of the City with respect to sea level rise.

(3) **Whether the proposal is compatible with the City's sea level rise mitigation and resiliency efforts.**

To ensure the compatibility of the historic district expansion with the City's sea level rise mitigation and resiliency efforts, project-specific future alterations, proposed adaptive re-use and/or redevelopment will require review through the Certificate of Appropriateness process to ensure that proposed new construction conforms to the Sea Level Rise criteria outlined in Sections 118-564 and 133-50(a) of the City Code. A suitable level of flexibility will be necessary when reviewing future applications for Certificates of Appropriateness for alterations, demolition, additions to existing buildings and new construction for the properties to meet current and future Building Codes and the City's resiliency standards. As indicated above, future proposed projects located within the proposed historic district expansion will be reviewed on a project-specific basis for consistency with

Certificate of Appropriateness criteria as well as the Sea Level Rise criteria outlined in Sections 118-564 and 133-50(a) of the City Code. Review of proposed future changes within the area in accordance with the adopted Sea Level Rise criteria will ensure the compatibility of the proposal with the City's sea level rise mitigation and resiliency efforts.

IV. DESCRIPTION OF BOUNDARIES

The proposed historic district expansion area is generally bounded by 77th Street on the south, Hawthorne Avenue and Crespi Boulevard on the west, 87th Street on the north and Tatum Waterway Drive and Byron Avenue on the east. **(MAP 1)**

V. PRESENT OWNERS

The properties located within the boundaries of the proposed historic district expansion area are held by multiple owners.

VI. PRESENT USE

Multi-family residential is the primary use within the boundaries of the proposed historic district expansion area.

VII. PRESENT ZONING

The established zoning districts within the boundaries of proposed historic district are as follows:

RM-1 Residential Multifamily, Low Intensity

Please refer to the zoning map for more detailed information. **(MAP 2)**

VIII. HISTORICAL BACKGROUND

While the end of World War I spurred the subdivision and planning of North Beach, the majority of the area located within the North Shore Historic District Tatum Waterway Expansion was not subdivided or developed until after World War II. The last major subdivisions in North Beach were developed between 1944 and 1947. The Beach-Bay Subdivision (Harry Sirkin, 1944), Biscayne Beach (Milton and Esther Steinhardt, 1945) and the 17-acre Tatum Waterway Subdivision (Jacob and Claire Freidus' Branch Corporation, 1946) largely completed the planning of the Tatum Waterway area. The Tatum Waterway Subdivision which extends from 77th Street to 81st Street, running from Byron Avenue to the Tatum Waterway, was the last major subdivision to be platted within the City of Miami Beach.¹

¹ "Beach Tract Goes On Sale," The Miami Herald, December 1, 1946, p. c-1.

Prior to the 1940s, the land surrounding the Tatum Waterway was intended to be developed as part of a massive commercial coconut farm on land that extended north up the Florida coast for approximately 100 miles. Henry B Lum purchased this land from the Federal Government prior to the turn of the century for 35 cents per acre.² Along with partners Ezra Osborn and Elnathan T. Field from New Jersey, Lum succeeded in planting only approximately 155,000 coconut palms from Cape Florida to just north of Jupiter. During the time between the early 1900s and the early 1940s, the City's population exploded to approximately 33,000 and land values soared to an assessed value of \$92,600,000.³ The changing economy and demand for housing and tourist lodging following the end of WWII, made the Tatum Waterway area attractive for development.

Figure 1 1941 Aerial Photograph of the Tatum Waterway/North Shore area.

Figure 2 1954 Aerial Photograph of the Tatum Waterway/North Shore area.

IX. ARCHITECTURAL BACKGROUND

The majority of buildings located within the proposed North Shore Historic District Tatum Waterway Expansion area were designed in the Post War Modern style of architecture. These buildings include

² Ibid

³ Ibid

mostly multi-family residential buildings that constitute a distinctive built environment of resort architecture. Stylistically, the architecture ranges from purely functional to highly expressive. The Tatum Waterway neighborhood owes much of its character to the repetition of similar building types and styles within a compact space.

Post War Modern

The Post War Modern style of architecture in South Florida, which spans from approximately 1945 to the mid-1960s, is often interchangeably referred to as Miami Modern (MiMo) or Mid-Century Modern, the latter being a more nationally recognized term. Regardless of name, the historic design impact of this mid-20th century style can be seen today throughout South Florida and beyond. In order to better understand the Post War Modern or style of architecture, it is important to view this architectural movement in the context of the historical, political, social, economic, and technological changes that were taking place during this period worldwide, nationwide, and locally.

The United States emerged as a world power following World War II. After years of deprivation during the Great Depression and wartime, the end of the war brought a sense of joyful optimism to many Americans. The Baby Boom was the result of the eagerness to get this new generation underway, while the legislation of the G.I. Bill helped to provide education and prosperity for war veterans.

Miami Beach played a significant role as a training site and redistribution center for the U.S. Army-Air Forces during World War II. The immediate availability of the City as a training center in 1942 is credited with reducing the length of the war effort by six to eight months and saving the government \$6 million in building costs.⁴ After the war, many veterans who had trained as recruits in

Figure 3 Postcard depicting Army Air Force soldiers marching on Collins Avenue.

Miami Beach returned here to vacation or to make their home. This, in addition to the Cuban Revolution in 1959, which prompted an unprecedented mass immigration of Cubans to Miami, resulted in a need for housing, retail, and services to accommodate the different growing segments of the population increased.

America redirected its enormous industrial capacity from the defense economy back to the domestic economy following the war. There was no longer a perceived need for rationing, conserving, and

⁴ “Army Life on Beach in Second Year,” *Miami Herald*, 19 February 1943.

recycling. The economy was thriving and gave rise to the growing middle class. New electric appliances and gadgets with push buttons began to appear in many households. Air conditioning was introduced as a modern convenience that tremendously added to the comforts of living in Florida. It became especially important because air conditioning allowed for a year-round economy and freed architects from having to adapt their buildings to the hot, humid climate.

It was the beginning of the space age. The first Sputnik was launched in 1957. Rivalry with the U.S.S.R. led to the space race. Futuristic, flamboyant, fun design elements showed up in cars, furniture, and buildings. Automobiles sprouted wings and depicted rocket motifs. The small globe with protruding antennae reminiscent of the Sputnik became a common design detail. Cheese holes, woggles and boomerangs began to appear in architecture everywhere in Miami Beach.

After a hiatus in construction due to World War II, the Post War Modern style picked up where Art Deco left off with the added influences of a booming Post War economy, new technologies, the prevalence of the sophisticated, affordable, and reliable new automobiles, and a feeling of national optimism. The local expression of this style was dubbed Miami Modern or MiMo by the Greater Metropolitan Miami area's Urban Arts Committee in about 2004.

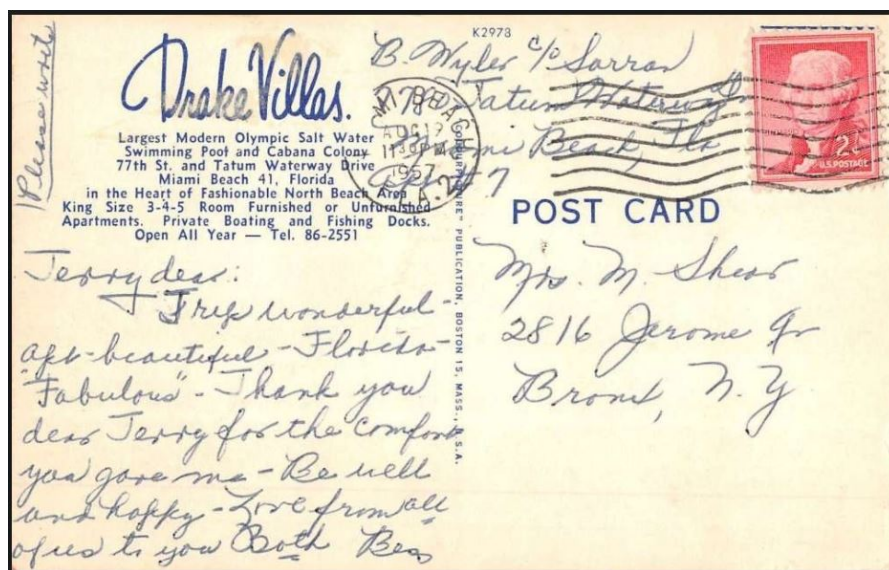

Figure 4 Postcard for Drake Villas located at 77th Street and Tatum Waterway Drive.

The Tatum Waterway area was almost entirely built up after World War II. Buildings emphasized horizontality, exhibiting flat roofs with broad overhanging eaves, echoed by the horizontal projections of the exterior corridors and anchored to the ground with long low planter boxes. Individual windows were grouped together with projecting concrete bands and contrasting textures to create bold patterns.

Space-age design elements were employed in clustered pipe columns and angled roofs that resembled delta wings. Often two or more contrasting materials, such as stone, brick, mosaic tile or patterned stucco were used to create bold designs. In addition, decorative metal railings and concrete screen block were often used to wrap around intimate garden patios which conveyed an architectural sensibility characteristic of the middleclass, tropical resort that flourished in the North Beach area.

Architects adapted to the tropical climate by introducing exterior stairways and corridors permitting natural cross-ventilation to each dwelling. Large numbers of modern, garden-style apartment buildings were built between 1945 and 1963. Generally built on a single lot, most of the apartment buildings were one or two stories in height with front patios and side gardens. On larger lots, the

linear configuration of garden apartments was articulated to form L, C, or J shapes, or featured two mirrored buildings to create generous, private courtyards. The building type adapted to both the narrow lot structure of the city and local environment conditions with patios, surrounding gardens, porches, loggias, flat roofs with broad overhanging eaves and exterior staircases and catwalks. These small garden apartment buildings multiplied in large numbers, produce a densely built environment where low-scale buildings allow landscaping to moderate the urban frontages. The scale of architecture in the district is largely consistent; a product of the fact that so much of the area was constructed in a short period of time by a relatively small group of architects.

Larger assemblages of narrow, single-bar type buildings were also possible. North Shore's most expansive project, the Drake Villas along Tatum Waterway Drive (Donald Smith and Irvin Korach, 1948), was designed to comprise a campus of more than 23 buildings spread out across more than 2,000 linear feet of water frontage. Developed by Jacob Freidus, the developer of the Tatum Waterway Subdivision, the buildings were grouped to frame patios and courts, pool and cabana areas, tennis courts and a solarium. The Drake ensemble was constructed of a single building module that eschewed Miami's vernacular masonry and wood construction, instead employing entirely concrete construction for both walls and floor slabs. About 13 buildings were finally built, and while these buildings were executed by the same architect, they nevertheless provided a great variety of details, particularly in the elaboration of guard rails. (715-725 78th St., 7819-7809 Tatum Waterway Drive)⁵

Architects

Architects, Gilbert M. Fein, Gerard Pitt, Leonard Glasser and Donald G. Smith dominated the new construction, while others like Frank Wyatt Woods, Harry O. Nelson, Joseph DeBrita, and Manfred Ungaro were also quite influential. Together, these architects defined a new direction of Mid-Century Modern design in Miami Beach. Their buildings, conditioned to the environmental forces of a hot and humid climate as well as to the need to distinguish buildings within a competitive environment, led to a daring

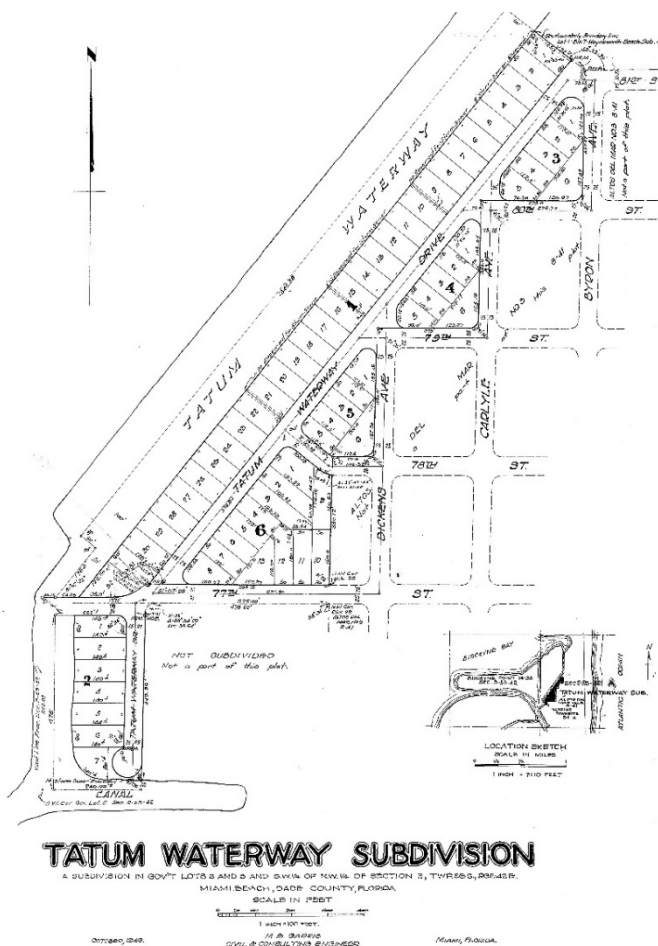

Figure 5 Plat of the Tatum Waterway Subdivision, filed on November 29, 1946.

⁵ "Beach Gets \$5,000,000 Development," The Miami Herald, May 2, 1948.

and unexpected expression of modern themes. While the vast majority of the proposed district can be characterized as Post War Modern, this style nonetheless demonstrates a high degree of continuity with earlier architectural trends, including Vernacular, Mediterranean and Streamline Moderne style buildings.

Several of Miami Beach's distinguished local architects are represented in the potential district expansion area, including the following:

Gilbert M. Fein (1920-2003) was from New York City and studied architecture at New York University. He served in the Army Corps of Engineers during World War II and settled in Miami Beach after the war. He designed hundreds of residential and commercial buildings in South Florida in the new Postwar style, becoming "one of the masters of Modernism." Most of Fein's comfortably livable buildings are unassuming and not prominent landmarks, but some of the better-known are:

Starlite Hotel	750 Ocean Drive
News Café	800 Ocean Drive
Helen Mar Annex	2445 Lake Pancoast Drive
Lake View Apartments	4780 Pinetree Drive
Park Isle Club	780 73 rd Street

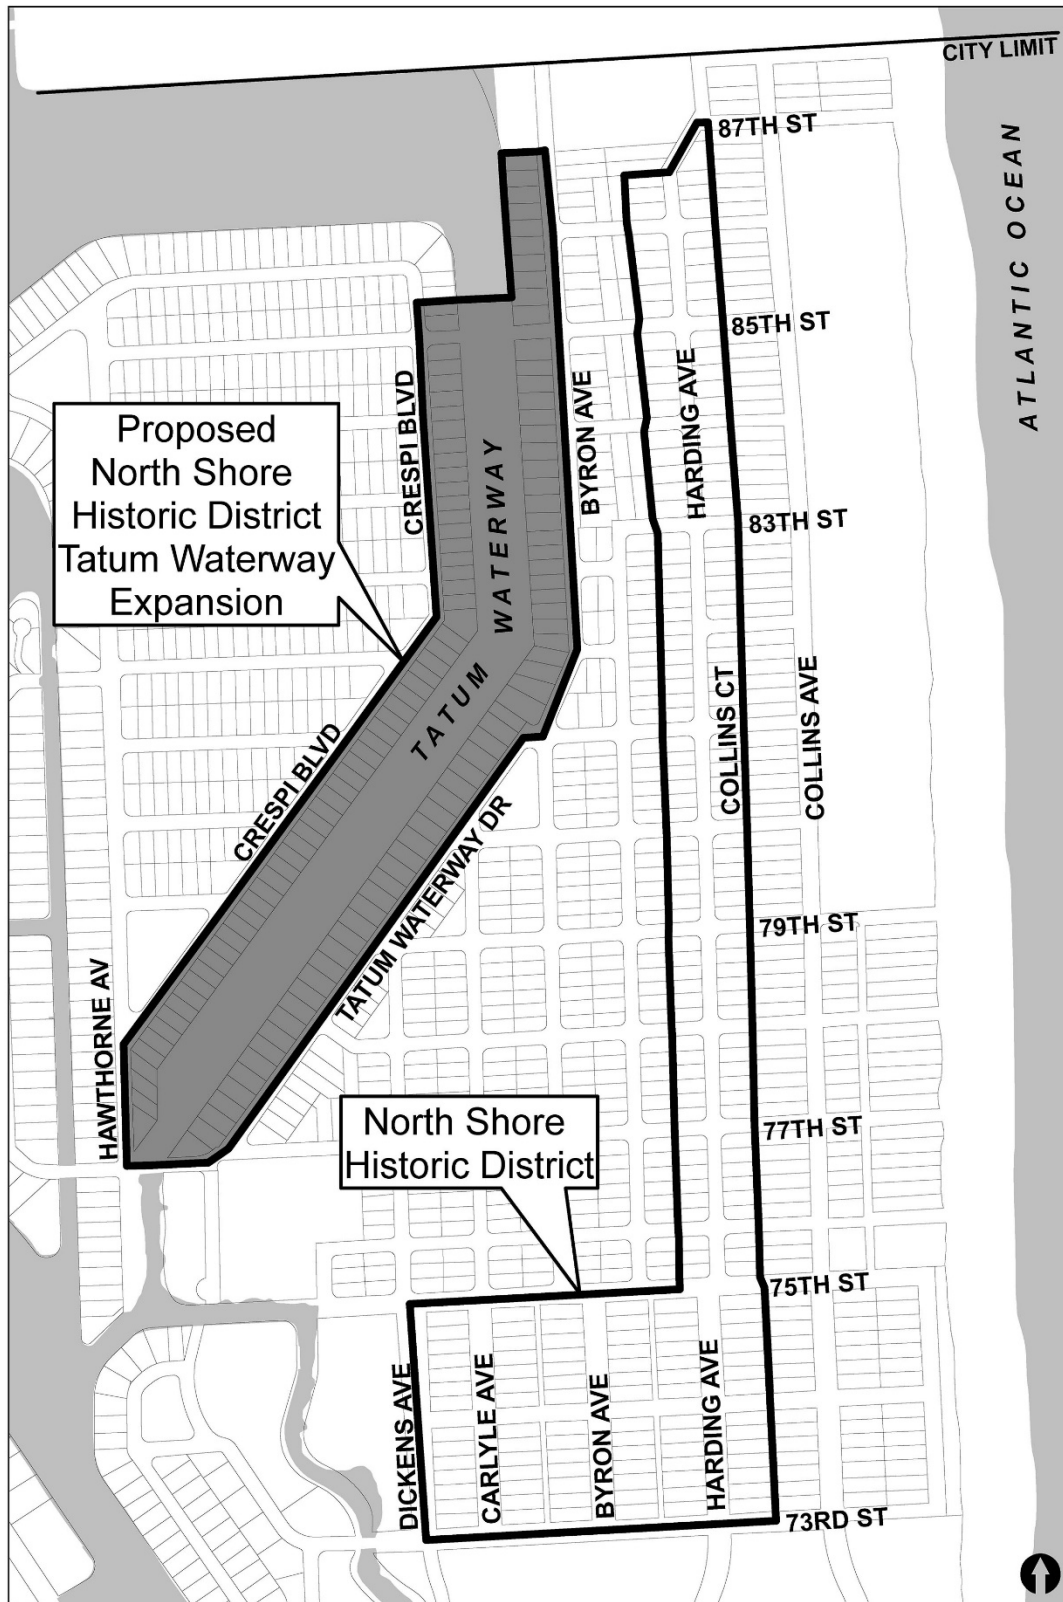

Gerard Pitt (1885-1971) was born in New Rochelle, New York, and graduated from Columbia University in 1907. In his early career he worked in New York City and Detroit. He moved to Miami in 1930 and was in partnership with George L. Pfeiffer, 1940-41. Pitt served as supervising architect for the southeast district of the Florida Hotel Commission from 1935 to 1957. In Miami Beach, he designed dozens of mostly small-scale apartment buildings in Art Deco and Postwar Modern styles from 1940 to the late 1960s, when he was in his 80s. These include:

Lincoln Arms	1800 James Ave.
Miljean	1831 James Ave.
Tropical Gardens	1600 Collins Ave.
Clifton Hotel	1343 Collins Ave.

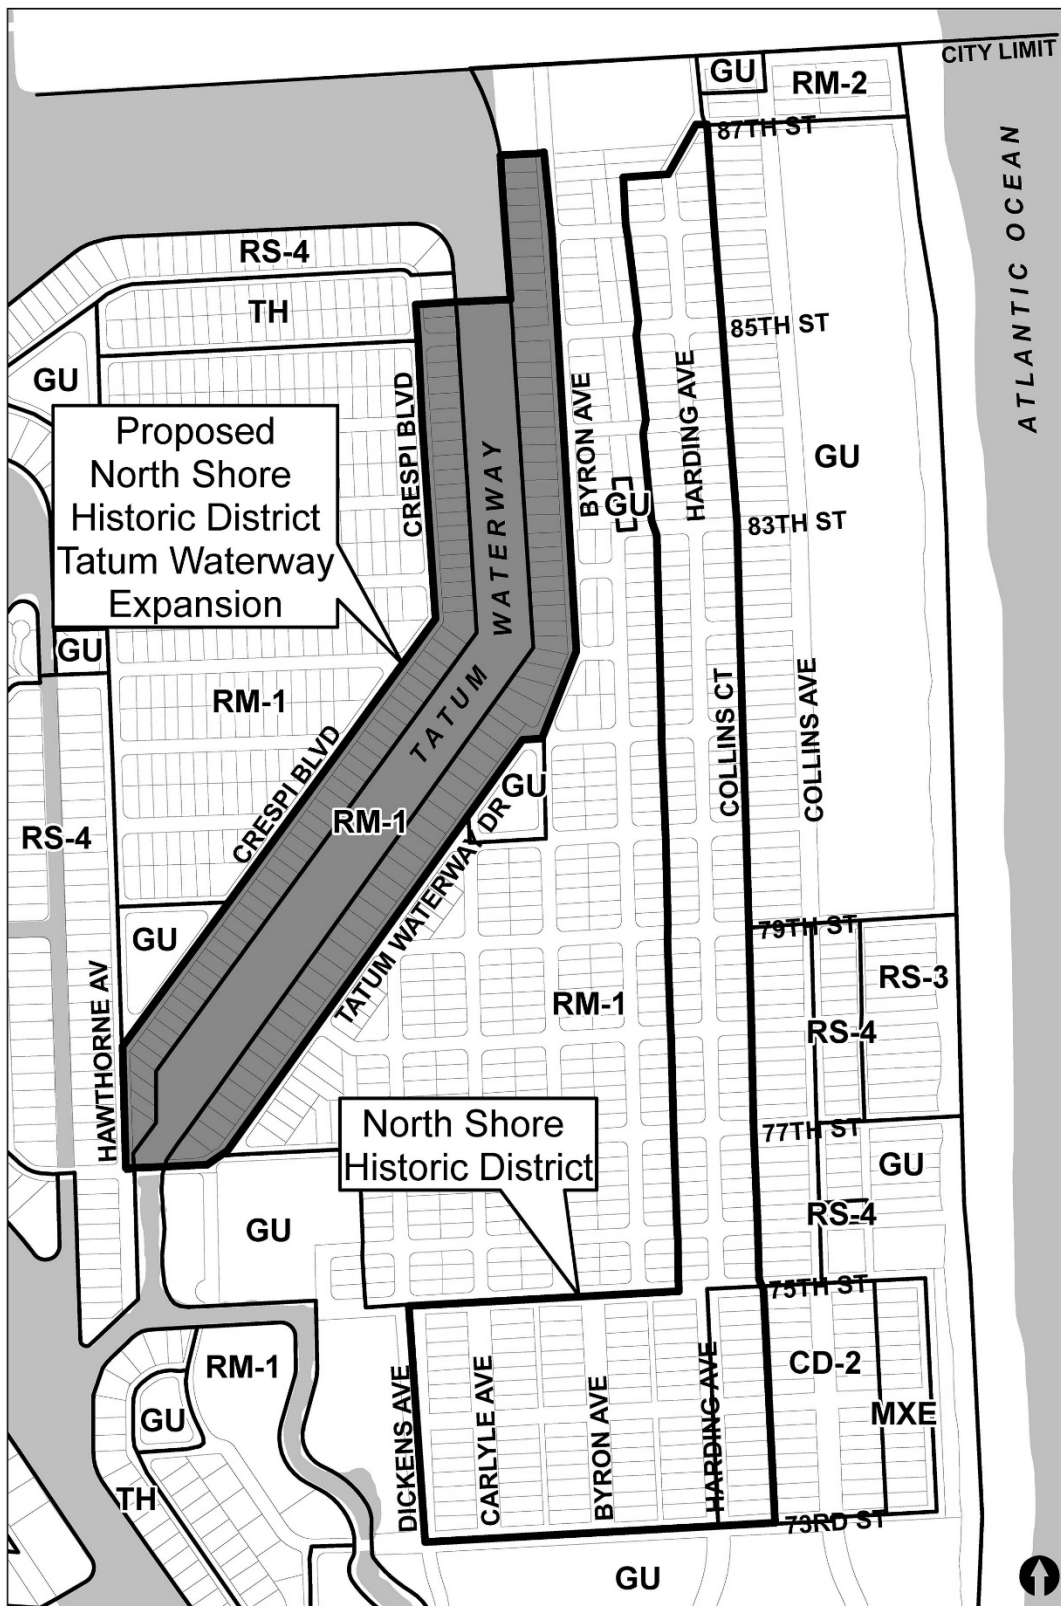

Nathan A. Seiderman (1908–2002) had an office on Normandy Isle and worked mostly in North Beach, designing at least 32 apartment buildings there from 1951 to 1959. He also designed the Fairfax Apartments at 1776 Collins Avenue in 1951. He later moved to Los Angeles, California, and died in 2002.

Donald G. Smith (1906–1967) was born in Indiana and educated at Western Reserve University in Cleveland, Ohio. In 1938, he established a private practice in Miami Beach. The Royal Palm Hotel in Miami Beach was one of his earliest and best works. He also designed the Lynmar Hotel and the Metropole Hotel in South Beach and dozens of small residences and apartment houses throughout the city. In the post-war years he formed a well-known partnership with Irvin Korach.

X. PLANNING DEPARTMENT RECOMMENDATIONS

1. **Criteria for Designation:** The Planning Department finds the proposed North Shore Historic District Tatum Waterway Expansion to be in compliance with the Criteria for Designation listed in Section 118-592 in the Land Development Regulations of the City Code which includes, by reference, the Sea Level Rise and Resiliency Criteria in Chapter 133, Article II, as applicable.
2. **Site Boundaries:** The proposed historic district expansion area is generally bounded by 77th Street on the south, Hawthorne Avenue and Crespi Boulevard on the west, 87th Street on the north and Tatum Waterway Drive and Byron Avenue on the east. **(MAP 1)**
3. **Areas Subject to Review:** The Planning Department recommends that the areas subject to review shall include all exterior building elevations and public interior spaces, site and landscape features, public open spaces and public rights-of-way, and all vacant or parking lots included within the boundaries of the proposed North Shore Historic District Tatum Waterway Expansion. Regular maintenance of public utilities, drainage, and mechanical systems, sidewalks, and roadways shall not require a Certificate of Appropriateness.
4. **Review Guidelines:** The Planning Department recommends that a suitable level of flexibility be considered when reviewing applications for Certificates of Appropriateness to ensure the revitalization and resiliency of this unique and low-lying area and that any decision on an application for a Certificate of Appropriateness shall be based upon compatibility of the physical alteration or improvement with surrounding properties and where deemed applicable in substantial compliance with the following:
 - a. The Secretary of the Interior's Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings, as revised from time to time;
 - b. Other guidelines/policies/plans adopted or approved by resolution or ordinance by the City Commission;
 - c. All criteria as listed under Sections 118-564 and 133-50(a) in the Land Development Regulations of the City Code;
 - d. City of Miami Beach Design Guidelines as adopted by the Joint Design Review/Historic Preservation Board on October 12, 1993, amended June 7, 1994, as may be revised from time to time.
