

MIAMI BEACH

PLANNING DEPARTMENT
Staff Report & Recommendation

Design Review Board

TO: DRB Chairperson and Members

DATE: August 3, 2021

FROM: Thomas R. Mooney, AICP
Planning Director

SUBJECT: DRB21-0671
1060 and 1070 West 47th Street

An application has been filed requesting Design Review Approval for the construction of a new two-story single-family home, to replace two (2) existing architecturally significant pre-1942 residences.

RECOMMENDATION:

Approval with conditions.

LEGAL DESCRIPTION:

Lots 5 and 6, Block 15, of the Nautilus Addition of Miami Beach Bay Shore Co, according to the plat thereof, as Recorded in Plat Book 8, Page 130, of the Public Records of Miami-Dade County, Florida.

SITE DATA:

Zoning: RS-4
Future Land Use: RS
Lot Size: 16,255.38 SF
Lot Coverage:
Proposed: 4,868 SF / 29.94%
Maximum: 4876.6 SF / 30%
Unit size:
Proposed: 7,147 SF / 44.3%
Maximum: 8,128 SF / 50%
Height:
Proposed: 24'-0" flat roof
Maximum: 24'-0" flat roof

Grade: +3.68' NGVD
Base Flood Elevation: +8.00' NGVD
Difference: +4.32' NGVD
Adjusted Grade: +5.84' NGVD
First Floor Elevation: +9.00' NGVD
(BFE+1'fb)
Side Yard Elevations Min:6.56' Max:6.56'

Rear Yard Elevations Min: 6.56' Max: 6.56'

EXISTING PROPERTY:

Year: 1936 / 1937
Architect: Igor B. Polevitsky / Robert M. Little
First Floor Elevation: 5.80' / 5.35' NGVD
Vacant: No
Demolition: Total

SURROUNDING PROPERTIES:

North: One-story 1941 residence / two-story 1934 residence
South: Two-story 1951 residence / one-story 1939 residence
West: One-story 1941 residence
East: Two-story 1937 residence

THE PROJECT:

The applicant has submitted plans entitled "New Single Family Residence – DRB21-0671 Final Submittal", as designed by **Calil Architects**, signed, sealed, and dated May 7, 2021.

The applicant is requesting Design Review Approval for the construction of a new two-story residence to replace two (2) existing two-story pre-1942 architecturally significant residences.

COMPLIANCE WITH ZONING CODE:

A preliminary review of the project indicates that the application, as proposed, appears to be inconsistent with the following sections of the City Code:

- Yards shall comply with Sec. 142-105(b)(8) *Exterior building and lot standards*.
- Maximum elevation for deck in the rear yard shall be 6.56' NGVD. Only stairs to access the first floor from the yard are allowed at higher elevation. As proposed the deck area can encroach up to 25% of the rear yard (5'-0") with an elevation of 8.34' NGVD (adjusted grade + 30") , as projections, but it would have to be as a cantilevered slab with no fill below and the adjacent yard elevation cannot exceed 6.56' NGVD in elevation.
- The maximum elevation in side and rear yards for this property is 6.56' NGVD.
- Open space diagram is missing yard calculations.
- Maximum height of screening for mechanical equipment is 10'-0" from grade elevation and 5'-0" from BFE +1 (9.0' NGVD).
- Fences shall comply with Section 142-106(b) (7) *Fences, walls and gates*.

The above noted comments shall not be considered final zoning review or approval. These and all zoning matters shall require final review and verification by the Zoning Administrator prior to the issuance of a Building Permit.

COMPLIANCE WITH DESIGN REVIEW CRITERIA:

Design Review encompasses the examination of architectural drawings for consistency with the criteria stated below with regard to the aesthetics, appearances, safety, and function of the structure or proposed structures in relation to the site, adjacent structures and surrounding community. Staff recommends that the following criteria are found to be satisfied, not satisfied or not applicable, as hereto indicated:

1. The existing and proposed conditions of the lot, including but not necessarily limited to topography, vegetation, trees, drainage, and waterways.
Satisfied
2. The location of all existing and proposed buildings, drives, parking spaces, walkways, means of ingress and egress, drainage facilities, utility services, landscaping structures, signs, and lighting and screening devices.
Satisfied
3. The dimensions of all buildings, structures, setbacks, parking spaces, floor area ratio, height, lot coverage and any other information that may be reasonably necessary to determine compliance with the requirements of the underlying zoning district, and any applicable overlays, for a particular application or project.

Satisfied

4. The color, design, selection of landscape materials and architectural elements of Exterior Building surfaces and primary public interior areas for Developments requiring a Building Permit in areas of the City identified in section 118-252.

Satisfied

5. The proposed site plan, and the location, appearance and design of new and existing Buildings and Structures are in conformity with the standards of this Ordinance and other applicable ordinances, architectural and design guidelines as adopted and amended periodically by the Design Review Board and Historic Preservation Boards, and all pertinent master plans.

Satisfied

6. The proposed Structure, and/or additions or modifications to an existing structure, indicates a sensitivity to and is compatible with the environment and adjacent Structures, and enhances the appearance of the surrounding properties.

Satisfied

7. The design and layout of the proposed site plan, as well as all new and existing buildings shall be reviewed so as to provide an efficient arrangement of land uses. Particular attention shall be given to safety, crime prevention and fire protection, relationship to the surrounding neighborhood, impact on contiguous and adjacent Buildings and lands, pedestrian sight lines and view corridors.

Satisfied

8. Pedestrian and vehicular traffic movement within and adjacent to the site shall be reviewed to ensure that clearly defined, segregated pedestrian access to the site and all buildings is provided for and that all parking spaces are usable and are safely and conveniently arranged; pedestrian furniture and bike racks shall be considered. Access to the Site from adjacent roads shall be designed so as to interfere as little as possible with traffic flow on these roads and to permit vehicles a rapid and safe ingress and egress to the Site.

Satisfied

9. Lighting shall be reviewed to ensure safe movement of persons and vehicles and reflection on public property for security purposes and to minimize glare and reflection on adjacent properties. Lighting shall be reviewed to assure that it enhances the appearance of structures at night.

Not Satisfied; a lighting plan has not been submitted; however such plan will be required as part of the building permit for the home.

10. Landscape and paving materials shall be reviewed to ensure an adequate relationship with and enhancement of the overall Site Plan design.

Satisfied

11. Buffering materials shall be reviewed to ensure that headlights of vehicles, noise, and light from structures are adequately shielded from public view, adjacent properties and pedestrian areas.

Satisfied

12. The proposed structure has an orientation and massing which is sensitive to and compatible with the building site and surrounding area and which creates or maintains important view corridor(s).
Satisfied
13. The building has, where feasible, space in that part of the ground floor fronting a street or streets which is to be occupied for residential or commercial uses; likewise, the upper floors of the pedestal portion of the proposed building fronting a street, or streets shall have residential or commercial spaces, shall have the appearance of being a residential or commercial space or shall have an architectural treatment which shall buffer the appearance of the parking structure from the surrounding area and is integrated with the overall appearance of the project.
Satisfied
14. The building shall have an appropriate and fully integrated rooftop architectural treatment which substantially screens all mechanical equipment, stairs and elevator towers.
Satisfied
15. An addition on a building site shall be designed, sited and massed in a manner which is sensitive to and compatible with the existing improvement(s).
Not Applicable
16. All portions of a project fronting a street or sidewalk shall incorporate an architecturally appropriate amount of transparency at the first level in order to achieve pedestrian compatibility and adequate visual interest.
Satisfied
17. The location, design, screening and buffering of all required service bays, delivery bays, trash and refuse receptacles, as well as trash rooms shall be arranged so as to have a minimal impact on adjacent properties.
Not Applicable
18. In addition to the foregoing criteria, subsection [118-]104(6)(t) of the city Code shall apply to the design review board's review of any proposal to place, construct, modify or maintain a wireless communications facility or other over the air radio transmission or radio reception facility in the public rights-of-way.
Not Applicable
19. The structure and site complies with the sea level rise and resiliency review criteria in Chapter 133, Article II, as applicable.
Not Satisfied; see below

COMPLIANCE WITH SEA LEVEL RISE AND RESILIENCY REVIEW CRITERIA

Section 133-50(a) of the Land Development establishes review criteria for sea level rise and resiliency that must be considered as part of the review process for board orders. The following is an analysis of the request based upon these criteria:

- (1) A recycling or salvage plan for partial or total demolition shall be provided.

Not Satisfied

A recycling plan shall be provided as part of the submittal for a demolition/building permit to the building department.

- (2) Windows that are proposed to be replaced shall be hurricane proof impact windows.

Satisfied

- (3) Where feasible and appropriate, passive cooling systems, such as operable windows, shall be provided.

Satisfied

- (4) Resilient landscaping (salt tolerant, highly water-absorbent, native or Florida friendly plants) shall be provided, in accordance with Chapter 126 of the City Code.

Satisfied

- (5) The project applicant shall consider the adopted sea level rise projections in the Southeast Florida Regional Climate Action Plan, as may be revised from time-to-time by the Southeast Florida Regional Climate Change Compact. The applicant shall also specifically study the land elevation of the subject property and the elevation of surrounding properties.

Satisfied

- (6) The ground floor, driveways, and garage ramping for new construction shall be adaptable to the raising of public rights-of-ways and adjacent land and shall provide sufficient height and space to ensure that the entry ways and exits can be modified to accommodate a higher street height of up to three (3) additional feet in height.

Satisfied

- (7) In all new projects, all critical mechanical and electrical systems shall be located above base flood elevation. Due to flooding concerns, all redevelopment projects shall, whenever practicable, and economically reasonable, move all critical mechanical and electrical systems to a location above base flood elevation.

Satisfied

- (8) Existing buildings shall be, where reasonably feasible and economically appropriate, elevated up to base flood elevation, plus City of Miami Beach Freeboard.

Not Applicable

- (9) When habitable space is located below the base flood elevation plus City of Miami Beach Freeboard, wet or dry flood proofing systems will be provided in accordance with Chapter of 54 of the City Code.

Satisfied

- (10) In all new projects, water retention systems shall be provided.

Not Satisfied

- (11) Cool pavement materials or porous pavement materials shall be utilized.

Satisfied

- (12) The project design shall minimize the potential for a project causing a heat island

effect on site.

Not Satisfied

STAFF ANALYSIS:

DESIGN REVIEW

The applicant is proposing to construct a new two-story residence on two, unified parcels located on the southern side of West 47th Street, which will replace two existing pre-1942 architecturally significant homes. The design floor elevation of the new residence is proposed at base flood elevation (8' NGVD) plus 1' of free board, or 9' NGVD.

The architect is proposing a modern two-story residence that is predominantly clad in limestone and accented with large bronze windows detailed with horizontal muntins. Influenced by Art Deco, the design features expansive eyebrows, corner windows and prominent metal railings. The most striking aspect of the proposed residence is a glass mosaic finished pool that is sited at the front of the site with associated terrace. The formal entry to the home is on the east side elevation, underneath the carport. Staff is supportive of the design, but recommends a defined pedestrian path from the sidewalk into the site.

RECOMMENDATION:

In view of the foregoing analysis, staff recommends the application be **approved** with conditions, subject to the conditions enumerated in the attached Draft Order, which address the inconsistencies with the aforementioned Design Review and Sea Level Rise criteria.
