

## Reportable Diseases Frequency Report ?

The frequency report below is based on [reportable disease information](#) received by the Florida Department of Health as mandated under Section 381.0031, Florida Statutes, and Rule 64D-3.029, Florida Administrative Code. Depending on report criteria, counts include confirmed and/or probable cases that have occurred in Florida among Florida residents. This report does not include cases of AIDS, HIV infection, sexually transmitted diseases, or tuberculosis. Also if there are no cases for your selection, you will see an empty grid.

### Report Criteria

**Note: For maximum performance, limit your selections for counties, diseases and specify a short date range.**

\* - indicates required field.

\* **Counties:** [Click to Select Counties](#) Alachua, Baker, Bay, Bradford, Brevard, Broward, Calhoun, Charlotte, Citrus, Clay, Collier, Columbia, DeSoto, Dixie, Duval, Escambia, Flagler, Franklin, Gadsden, Gilchrist, Glades, Gulf, Hamilton, Hardee, Hendry, Hernando, Highlands, Hillsborough, Holmes, Indian River, Jackson, Jefferson, Lafayette, Lake, Lee, Leon, Levy, Liberty, Madison, Manatee, Marion, Martin, Miami-Dade, Monroe, Nassau, Okaloosa, Okeechobee, Orange, Osceola, Palm Beach, Pasco, Pinellas, Polk, Putnam, Santa Rosa, Sarasota, Seminole, St. Johns, St. Lucie, Sumter, Suwannee, Taylor, Union, Volusia, Wakulla, Walton, Washington

\* **Report Date Range:**   through  

 Reportable Disease Frequency Report - data was last updated on 07/12/2022 (yyyy-mm-dd) 

County	Counts
 122	
Broward	77
Collier	1
Lake	1
Miami-Dade	21
Monroe	1
Orange	6
Palm Beach	5
Pinellas	6
Polk	2
Santa Rosa	1
Seminole	1

**Note:**

Data presented here are from Merlin, Florida's web-based reportable disease surveillance system. Data in this report are aggregated by the date the case was reported to the Bureau of Epidemiology, Florida Department of Health. Cases are assigned to Florida counties based on the county of residence at the time of the disease identification, regardless of where they became ill or were hospitalized, diagnosed, or exposed. Disease reporting is an ongoing process. Numbers displayed are preliminary and will fluctuate up or down over time as case reports undergo further investigation and validation. Counts include confirmed and probable cases. Summaries of reportable disease data are produced weekly, monthly, and annually and are located on the Bureau of Epidemiology's [Data and Publication page](#). More detailed information on interpreting data can be found in the Introduction Section of the [Annual Morbidity Statistics Reports](#) (AMSR) and final disease counts are found in the AMSR. For questions, please contact the Bureau of Epidemiology at (850) 245-4401.
