<b>5. Additional comments or concerns?</b>		
<ul style="list-style-type: none"> <li>• Miami Beach needs live music.</li> <li>• This would be so beneficial!</li> <li>• It would be great to have live music, it is very much needed.</li> <li>• Something that adds to the guest experience but doesn't bother the South of Fifth community. Live entertainment, where it stays within the building and does not cause inconvenience to the community.</li> <li>• The restriction on live music in the South of Fifth area is a shortsighted law. There is no reason that music indoors of a venue or even outdoors should not be allowed as long it is not impacting the residents around the venue. As a South of Fifth resident, I would love to have live music be part of the community here.</li> <li>• Indoor live entertainment should be allowed with certain limitations.</li> <li>• Set decibel limits. Music should be at ambient levels so that patrons can talk freely without having to speak up.</li> <li>• The South of Fifth neighborhood has attracted nationally recognized brands that add great value to Miami Beach. Managed live entertainment will only be a benefit not only to the businesses but an additional amenity to the residents and visitors. This could potentially elevate the experience and create more repeat visits which benefit the business, the patrons, and ultimately the City by generating additional tax revenue.</li> <li>• As long as it is not disturbing the neighbors, allow music with control measures.</li> </ul>
