Ensuring waterproof coverage when louvres are in fully closed position

Each channel on louvre drain the water through four blind gutters connected with columns

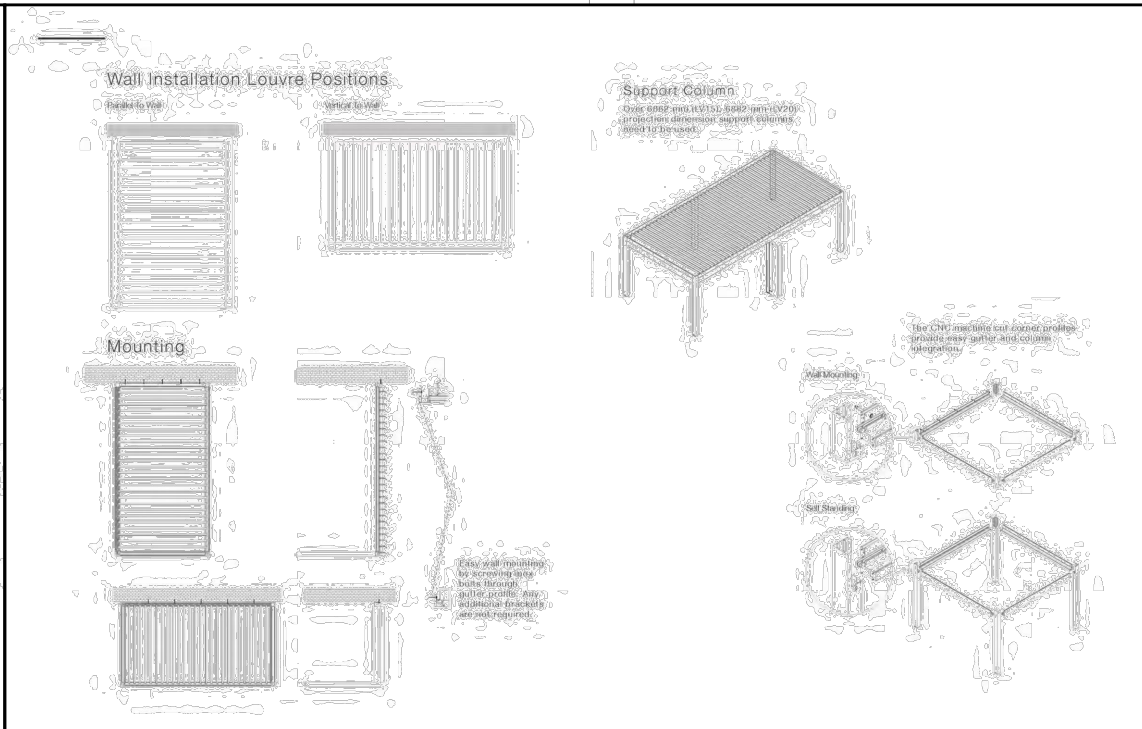

Functional post engraved on louvre channels provides maximum protection from water seeping

Slightly opening of louvre creates natural air flow for cooling on axes

Protecting from sun exposure while ensuring air ventilation under the system

Wall Installation Louvre Positions  
Back to wall / Face to wall

Support Column  
Clearance 600mm (24") minimum, 800mm (32") maximum depending on support system. Consult KOB KARP.

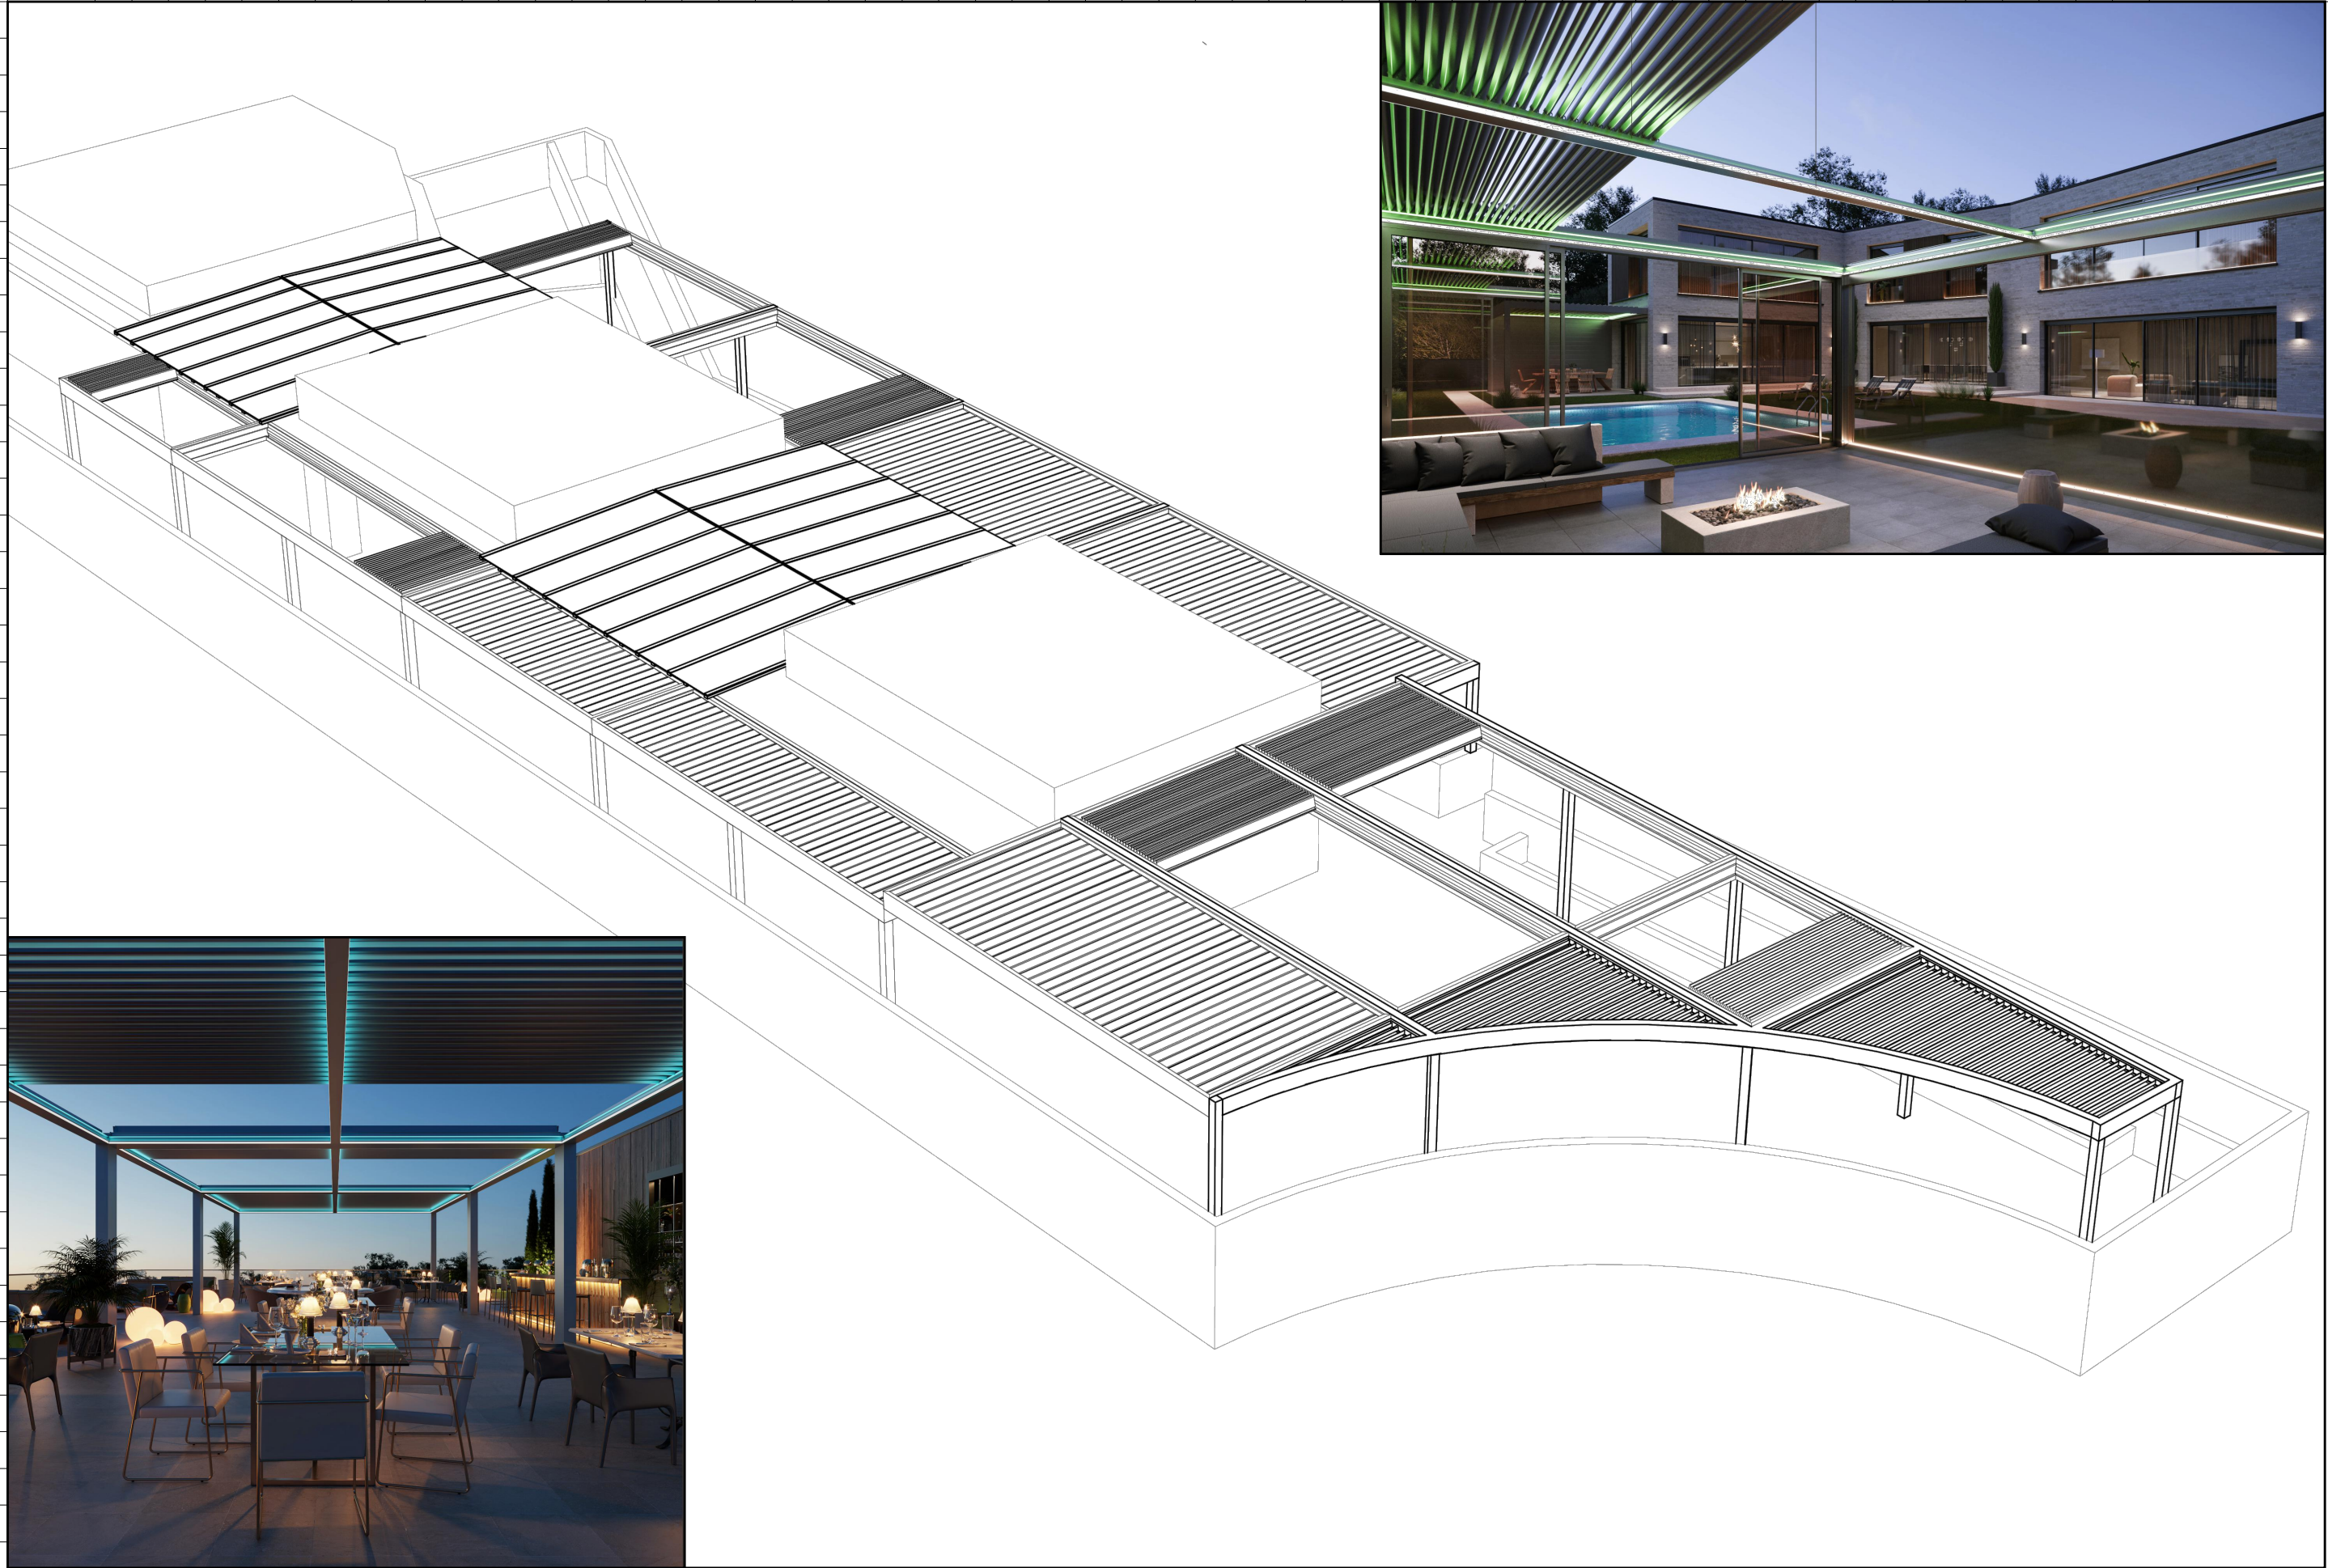

Mounting

The CH1 mounting rail system provides a secure and reliable connection between the louvre and the support column.

Use of stainless steel screening and bolts through louvre channels with stainless steel mounting brackets (not included).
