Re: Sole Source for Honeywell service/installation of Honeywell Fire Alarm, CCTV, Access Control, and Building Management System

Dear Angelo,

The installed Honeywell Fire Detection, Closed Circuit CCTV, Access Control, and Building Management (HVAC Control) Systems are proprietary products of Honeywell Building Automation, installed and serviced by the local Miami branch. The Miami Beach Convention Center is one of many customers who recognizes and values the proprietary solutions.

As a proprietary solution, all of software for the systems is written and maintained by Honeywell, as is the programming in the field controllers. Honeywell technicians and engineers are the only persons with that are factory trained to modify and work on your installed system. This provides your facility with elevated level of security and support.

The current systems noted above, were installed and serviced by factory trained Honeywell technicians. Our technicians have access to all Honeywell literature, technical bulletins, and system update information, as well as support from our Technical Assistance Center (TAC) and Engineering Centers.

Honeywell Building Automation branch offices are the Sole Source provider for the Miami Beach Convention Center's Fire Detection, CCTV, Access Control and Building Management Systems.

Please let me know if have any other questions or if we can be of further service to you.

Sincerely,

Eugene Chamberlain
Honeywell Building Automation
Sr. Account Manager
