LANDSCAPE SPECIFICATIONS

SCOPE OF WORK:

The scope of work for the Landscape Contractor includes furnishing all plants, materials and equipment and labor needed for installation of plant materials as indicated on plans and/or in these specifications.

2. PLANT MATERIALS:

 $\emph{A}.$ All plant materials shall be nursery grown unless otherwise noted. Abbreviations on plant list:

(indicates clear trunk measurement from top to first branching) O.A. (indicates overall height from top of ball to mid

B. Quality and Size: Plants shall have a habit of growth that is normal for the species and shall be healthy, vigorous and equal or exceed the measurements specified in the plant list which are the minimum acceptable sizes. Plants shall be measured before pruning with branches in normal position. Any necessary pruning shall be done at the time of planting. Requirements for measurements, branching, grading, quality, balling and buriapping of plants in the plant list generally follow the code of standards currently mended by the American Association of Nurserymen inc., in the American Standard of Nursery Stock. Plant materials shall be graded Florida No. 1 or better as outlined under Grades & Standards for nursery plants, requirements specified, but do not have the normal balance of height and spread typical for the respective plant, shall not be accepted. All plants shall be free of weeds or any other objectionable vegetation.

Quantities: All quantities indicated on the plant list are intended as a guide for the bidders and does not relieve the off. Should a discrepancy occur between the bidder's take off and the plant list quantity, the Landscape Architect is to be notified for the clarification prior to the submission of

SubstitutionPlant substitution requests by the Contracto will be considered by the Landscape Architect only upon submission of proof that any plant is not obtainable in the type and size specified. The Landscape Architect shall determine the nearest equivalent replacement in an obtainable size and variety. The unit price of the substitute item shall not exceed the bid item replaced, without approval of the owner.

COMMERCIAL FERTILIZERS:

A. Commercial fertilizer shall conform to ANSI A300 Part2 fertilizer specifications.

E PLANTING SOIL:

Planting soil shall be sandy loam and shall contain a minimum amount of decomposed organic matter. Planting soil shall be free of clay, stones, plants, roots and other foreign materials which may be a hinderance to planting operations or be detrimental to good plant growth. Soil shall be delivered in a loose friable condition and be applied in accordance with the Planting Specifications

Mulches shall not contain sticks larger that 1/4 inch in diameter, stones, or other foreign material that will prevent the eventual decay of the mulch necessary for its complete effectiveness. Mulch shall be applied evenly in a 3" matt. WATER:

Water for planting will be available at the site and will be provided by the Owner. All conditions regarding site water shall be verified by Contractor prior to submission of bids.

PROTECTION OF PLANTS:

4. Root Protection:

Balled and Burlapped Plants: Plants designated "B & B" (balled and burlapped) shall be dug with firm natural balls of earth of sufficient diameter and depth to encompass the fibrous and feeding root system necessary for full recovery All collected plants shall be B&B.

 Container Grown Plants: Plants grown in containers will be accepted as "B & B" providing that all other specified requirements are met. Container grown plants shall meet plant sizes as specified on the plant list and on the Drawings, and shall not be governed by

B. <u>Protection During Transportation</u>: All plant material shall be protected from possible bark injury or breakage of branches. All plants transported by open trucks shall be adequately covered to prevent windburn, drying or damage

C. Protection After Delivery: Plants which cannot be planted immediately on delivery to the site shall be covered of wind and sun. All plants shall be watered as necessary until planted. Storage period shall not exceed seventy—two

D. <u>Protection of Paims (if Applicable)</u>: Only a minimum of fronds shall be removed from the crown of the paim trees to facilitate moving and handling. With the exception of Cabbage

E Protection During Planting: Trees moved by winch or crane shall be thoroughly protected from chain marks, girdling or bark slippage by means of burlap, wood battens,

8. IMPLEMENTATION

A. Layout: Locations of plants and outlines of shrub beds are indicated on the PLAN. All tree, palm, and accent locations shall be staked in the field by the Contractor, so as to satifactorily match the locations indicated on the plan. Any unforseen underground utilities shall be verified by General Contractor and communicated to the L.A. ASAP

8. Soil Preparatiss stall be prepared in accordance with

C. Excavation for Planting: Excavation of plant pits shall be circular in outline and shall extend to the required subgrades as specified hereunder. The minimum depth of plant pits specified below shall be measured from the finish grade. Mass planting beds shall be stripped of all

D. Balled and Burlapped Plants: After final setting, loosen buriap wrappings exposing the top of the root ball, leaving the ball unbroken. Remove excessive amounts of buriap to eliminate voids which may be caused upon decomposition

E. Container Grown Plants: Container grown plants shall, when delivered, have sufficient growth to hold earth intact Plant pits for container materials shall be formed flat on the bottom to avoid air pockets at the bottom of the root balls and containers shall be removed carefully to prevent damage to plant or root system.

E <u>Pit Size</u>s: Minimum diameter (width) and depth of planting pits for balled and burlapped, and container grown l. Diameter — Trees: 18" greater than diameter of ball or

spread of roots. 2. Diameter — Shrube: 6" greater than diameter of ball or

. Depth — Trees and Shrubs: 4" greater than depth of ball or roots to provide 4" of topsoil backfill under the rootball. (Large, heavy trees and shrubs may sit directly on unexcavated pit bottom if it is determined that undue settlement may occur.)

Depth — Vine Groundcovers: Pits shall conform to accepted nursery practice for the particular species and equal the plant pot depth plus one (1) inch.

G.Setting Trees and Shrubs: Unless otherwise specified, all trees and shrubs shall be planted in pits, centered, and set on four inches (4") of compacted planting soil to such depths that the finished grade level of the plant after settlement shall be the same as that at which the plant was grown. They shall be planted upright and faced to give the best appearance or relationship to adjacent structures. No burlap shall be pulled out from under the balls. Platforms, wire, and surplus binding from top and sides of the balls, shall be removed. All broken or frayed roots shall be cut of cleanly. Soil shall be placed and compacted thoroughly, avoiding injury and shall be settled by watering. No filling around trunks will be permitted. After the ground settles, additional soil shall be filled in to the level of the finished grade allowing for three inches (3") of mulch. Form a shallow saucer around each plant by placing a ridge of soil along the edge of the plant pit.

H.Setting Palms: All palms shall be planted in sand, thoroughly washed in during planting operations and with shallow saucer depression left at the soil line for future waterings. Saucer areas shall be top dressed two inches (2") deep with topsoil raked and left in a neat, clean

I Fertilization: All fertilization shall conform to ANSI A300

J. <u>Correct Placement of Granules:</u> Refer to ANSI A300 Part 2 specifications on fertilization

K Pruning: Remove dead and broken branches from all plant materials. Prune to retain typical growth habit of individual species with as much height and spread as is practicable. Make all pruning cuts with a sharp instrument flush with trunk or adjacent branch, in such a manner as to line of growth, will not be permitted and trees will not be poled or topped. Paint all cuts 1/2" in diameter and larger with approved waterproof antiseptic tree paint and remove

L <u>Guying and Staking</u>: Guy all trees 1 - 1 1/2" in caliper and greater in three (3) directions with double strands of No. 12 galvanized wire attached to approved anchore driven below grade. When securing wires to trees, cover a wires which may come in contact with any part of tree with new rubber hose. Place guys not less that 1/3 of the height of tree above finished diameter or more, if possible. All hoses shall be interlocked around tree trunk. Place anchors so that guys are equally spaced and at 45 degree angles to horizontal. Keep guys tight until project completion. In staking palms and broadleaf trees no nails or other fasteners will directly penetrate the trunks. Wood 2 \times 4 battens 12 inches long, separated by a minimum of four (4) layers of burian can be attached to the trunk of the trees with metal banding. Stakes can only be nailed to the wooden

MExcess Excavated Soil: Excess excavated soil shall be disposed of by the Contractor at no additional expense to

9. SOD (When Applicable):

 $A.\,\underline{\rm Soil}\colon$ The contractor shall submit a unit price per cubic yard for the supply and distribution of planting soil as herein before specified, to be applied at a depth of one inch (1") to all areas receiving sod.

Finish (fine) grade all landscape areas, eliminating all bumps, depressions, sticks, stones and other debris to the satisfaction of the Landscape Architect prior to the application of sod. If supplemental topsoil is to be spread, no sod shall be laid until the depth of this soil has been

 ${\mathcal C}$. The sod shall be as called for on the Landscape Drawings, Sod shall be of firm tough texture, having a compact growth of grass with good root development, and shall contain no Bermuda Grass, weeds, or any other objectionable vegetation. The soil embedded in the sod shall be good earth, free from stones and debris and all sod shall be free

D.Before being out and lifted, the sod shall have been mowed at least three times with a lawn mover, with the final mowing not more that seven (7) days before the sod is cut. The sod shall be carefully out into uniform dimensions.

E. Solid sod shall be laid with closely abutting joints with a tamped or rolled, even surface, it shall be the responsibility of the contractor to bring the sod edge in a neat, clean manner to the edge of all paving and shrub areas.

10. CLEAN UP:

Any soil, peat or similar material which has been brough onto any paved areas shall be removed promptly, keeping these areas clean as the work progresses. Upon completio of the planting, all excess soil, stones and debris which has not been previously cleaned up shall be removed from the

1. MAINTENANCE:

 $\emph{A}.$ Maintenance shall begin immediately after each plant is planted and shall continue until all planting has passed final inspection and acceptance. Maintenance shall include watering, weeding, cultivating, removal of dead materials, resetting plants to proper grades or upright positions and restoration of the planting saucer and any other necessary operations. Proper protection to lawn areas shall be provided and any damage resulting from planting operations shall be repaired promptly.

C.In the event of the threat of serious damage resulting from insects of disease prior to final acceptance, the plants shall be treated by preventative or remedial measures approved for good horticultural practice at no additional cost to the

2. INSPECTION AND ACCEPTANCE:

4. Inspection: Inspection of work to determine completion of contract, exclusive of the possible replacement of plants, will be made by the Owner and /or Landscape Architect, at

B. Acceptance: After inspection, the contractor will be notified by the Owner and/or Landscape Architect of the acceptance of all plant material and workmanship. exclusive of the possible replacement of plants subject to

3. GUARANTEE AND REPLACEMENT:

A Guarantee: The Contractor, as part of his Contract, shall furnish a written guarantee warranting all materials, workmanship and plant materials, except sod, for a period of six (6) months from the time of completion and acceptance. All plant materials shall be alive and in satisfactory condition and growth for each specific kind of plant at the end of the guarantee period. Where vandalism le agreed by the Landscape Architect as the cause for replacement, the Contractor shall not be responsible for replacement during the six month guarantee after final

*Trees and Paims shall be guaranteed for twelve (12)

B. Sod shall be guaranteed for a two (2) month period, dating from final acceptance and any lawn care which becomes necessary during the completion period will be the responsibility of the Contractor to ensure a vigorous strand

GENERAL NOTES

Contractor shall notify all necessary utility companies 48 hours minimum prior to digging for verification of all underground utilities, irrigation and all other obstructions and coordinate with Owner's Representative prior to initiating operations. Drawings are prepared according to the best information available at the time of preparing these documents.

Contractor shall familiarize himself/herself with existing site conditions prior to initiating planting. All existing site furnishings, paving, landscape and other elements to remain shall be protected from any damage unless otherwise noted.

Report any discrepancies between the construction drawings and field conditions to JBD Design, inc. immediately.

Landscape contractor shall coordinate all work with related contractors and with the general construction of the project in order not to impede the progress of the work of others or til Contractor's own work.

The location of the landscape holding area will be identified by the owner's representative. The contractor shall adhere to the access routes to and from the holding area without disrupting or impeding access to the site by others.

7. All plant material shall be in full and strict accordance to Florida No. 1 grade, according to the "Grades and Standards for Nursery Plants", (latest edition) published by the Florida Department Agriculture and Consumer Services, the project manual and/or specifications. Plant materials shall exceed in some instances some specifications if necessary to meet the minimum requirements of others.

All container and caliper sizes noted on plant list are minimum. Increase size if necessary to conform to plant size and specifications.

Any tree with a trunk formed "V" shape crotch and co-dominent leaders will be rejected. Typically, shrub and groundcover plantings are shown as mass planting beds. Plants shall be placed on a triangular spacing configuration (staggered spacing). Plant center to center dimensions (O.C.) are listed under "Comments" on the plant list.

Landscape Contractor shall field stake the location of all plant material prior to initiating installation for the review and approval of the Owner's Representative and/or Landscape Architect.

Landscape Contractor shall field adjust location of plant material as necessary to avoid damage to all existing underground utilities and/or existing above ground elements. All changes required shall be completed at the Contractor's expense and shall be coordinated with the Owner's Representative and/or the Landscape and/or the Landscape and/or the Landscape and/or the Landscape.

Contractor shall mulch all new plant material throughout and completely to depth specified.

Any substitutions in size and/or plant material must be approved by the Landscape Architect. All plants will be subject to approval by Landscape Architect and/or Owner's Representative before planting can begin.

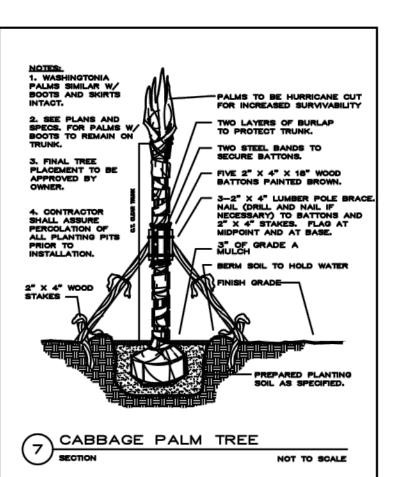

Contractor shall refer to the landscape planting details, plant list, general notes and the specifications for further and complete landscape planting instructions.

Landscape Contractor shall coordinate all planting work with irrigation work. Landscape Contractor shall be responsible for all hand watering as required by Owner's Representative to supplement irrigation watering and rainfall. Landscape Contractor shall be responsible for hand watering in all planting areas, regardless of the status of existing or proposed irrigation.

Landscape Contractor shall clean the work areas at the end of each working day. Rubbish and debris shall be collected and deposited off—site daily. All materials, products and equipment shall be stored in an organized fashion as directed by the Owner's Representative.

Landecape Contractor shall regrade all areas disturbed by plant removal, relocation and/or installation work. Landecape Contractor shall replace (by equal size and quality) any and all existing plant material disturbed or damaged by plant removal, relocation, and/or installation work.

19. Landscaping shall be permitted in easements only with the written permission of the easement holder. The written permission shall specify those responsible for replacing disturbed planting areas and shall be submitted to the County. Written permission to plant in easements shall be filed with the land records applicable to the site.
