Re: Crown Castle Letter of Intent for the Installation of a Distributed Antenna System (“DAS”) within Design Districts in the City of Miami Beach

Dear Mr. Murphy:

Crown Castle NG East LLC (“Crown Castle”) seeks to place a DAS network in the City of Miami Beach (the “City”), which will consist of placing fiber optic cable (underground) and stealth nodes (utility poles containing telecommunications infrastructure) within the right of way. In order to meet the network coverage objectives of our client, Crown Castle must place some of this infrastructure within historic districts in the City. This letter will serve as support for each of those applications.

Description of the Project

As stated above, Crown Castle seeks to place a DAS network in Miami Beach in order to enhance the network capacity of its client, which is a wireless carrier. The carrier has significant capacity issues in Miami Beach. In order to solve these capacity issues, several DAS nodes must be placed in Design Districts within the City.

Below is a brief description of the locations:

- Crown Node 5_18 located at 211 Alton Road, Miami Beach, FL

Description of the Equipment

Crown Castle has worked with the staff of Miami Beach Planning Department for two years to find a design for DAS nodes which would both meet the network objectives of its client and meet the city’s aesthetic and safety concerns about placing DAS nodes in Design Districts. After much discussion and the recent passage of a new telecommunications ordinance by the City Commission addressing the installation of such technology in the City, Crown Castle has

developed a stealth node which will function as both a street light pole and a telecommunications pole. An existing street light will be removed and replaced with a functioning DAS stealth street light pole which will not require additional ground equipment installed in the right of way.

Conclusion

Crown Castle has worked diligently with City staff to meet all of their concerns about placing DAS infrastructure within the city, including the Design and Historic Districts. Crown Castle believes it has satisfied all of the City's concerns and accordingly requests that the Design Review Board approve its applications for the installation of DAS infrastructure within certain Design Districts in the City.

Sincerely,

Wanda Melton

Re: Design Review Board Application for the installation of Distributed Antenna System Utility Pole
Crown Castle Node 5_18 located at 211 Alton Road, Miami Beach, FL
33139

Dear Mr. Murphy:

Crown Castle NG East LLC ("Crown Castle") respectfully submits this letter to the City of Miami Beach (the "City") regarding an application seeking Design Review Board (the "Board") review and approval for a Distributed Antenna System ("DAS") utility pole within the City. As part of the application package, the Board requires an explanation whenever a proposed DAS utility pole or node (such poles are referred to in the telecommunications industry as "nodes") cannot be collocated. A "collocated" node would be a node placed on a pole or other infrastructure already existing in the right of way. This letter explains why the application package referred to above is for a "stand-alone" DAS node rather than a collocated node.

As you know, Florida Statutes, Section 337.401(3), allows Crown Castle, as a communications services provider, to place its communications facilities within the right of way subject to reasonable and non-discriminatory regulation by the City. Although Crown Castle collocates its DAS facilities whenever possible on poles and other infrastructure already existing in the right of way, in this case Crown Castle engineers examined each potential collocation site and determined that there was not a suitable collocation site which would have provided the wireless coverage for the intended target of each node. In other words, the possible sites upon which Crown Castle might collocate the particular DAS node was too far away, was not in a location which would be able to provide the additional wireless capacity each node was intended to provide, or was not a site for which Crown had rights to attach. Therefore, in each of these instances, Crown Castle is proposing a stand-alone DAS stealth pole. The particular node location above was determined by Crown Castle engineers to be the preferred location as it provides additional capacity to both the intended target while taking into account aesthetic and traffic safety criteria.

Please do not hesitate to call or contact me with any further questions or to discuss this matter.

Sincerely,

A handwritten signature in blue ink that reads 'Wanda Melton'.
