BACKGROUND

The “Normandy Isles National Register District” was listed on the National Register of Historic Place on November 12, 2008. This district is generally bounded by Biscayne Bay to the south, Ray Street, Rue Notre Dame and Rue Versailles to the west, Normandy Shores Golf Course to the north, and the western bulkhead of Indian Creek to the east.

The “North Shore National Register District” was listed on the National Register of Historic Places on November 18, 2009. This district is generally bounded by 73rd Street to the south, Dickens Avenue, Hawthorne Avenue and Crespi Boulevard to the west, 87th Street to the north, and Collins Court and the eastern bulkhead of the Atlantic Ocean to the east.

Each of these National Register Districts has a designation report, which contains detailed information and data on the history, architecture and building types in the district. Additionally, Planning Department staff is preparing a comprehensive local historic district designation report, for the local district boundaries authorized by the City Commission.

As a point of clarification, a portion of the North Shore National Register District is already designated a local historic district (Harding Townsite Historic District.) Also, a map is provided at the end of the staff report showing the locations of all the districts and subdivisions mentioned in the ordinance.

ANALYSIS

The proposed ordinance would create an overlay for the RM-1 zoning district within the North Beach National Register Districts. The proposed North Beach National Register Conservation District Overlay is comprised of area specific regulations that are intended to incentivize the retention of existing 'Contributing' buildings, as well as ensure that new infill buildings are compatible with their surroundings. The proposed draft ordinance includes specific development regulations for:

- Demolition standards;
- Lot area and width;
- Platted lot aggregation;
- Unit size requirements;
- Off-street parking requirements;
- Building heights and roof-top additions;
- Setbacks;
- Design and resiliency standards;
- Parking design standard.

The proposal varies slightly from a traditional 'Neighborhood Conservation District' (NCD), as the same development regulations and standards that would be part of an NCD would be implemented in the form of a zoning overlay. This overlay would be applicable to the entire boundary of each National Register District that is in a RM-1 zoning district, regardless of whether the property is located inside or outside of a locally designated historic district.

The reason for this approach is to apply consistent standards for new construction within the entirety of the National Register District boundaries, including the areas being considered for local historic designation. This will ensure cohesion of future development within the larger National Register areas.

Additionally, demolition standards, as well as incentives for the retention of 'Contributing' buildings, are proposed. The following is a summary of such demolition standards and incentive proposals, which were contained within the ordinance:

- Demolition of contributing structures within the overlay district shall not be permitted for purposes of creating a vacant lot or a surface parking lot.
- For the demolition of a 'Contributing Building', a demolition permit shall not be issued prior to the review and approval for the new construction or site improvements by the Design Review Board (DRB) or Historic Preservation Board (HPB) as applicable, and until certain minimum criteria are satisfied.
- The minimum and average unit size is reduced for sites containing a 'Contributing' buildings as well as additions to 'Contributing' buildings which are substantially retained and restored.
- For existing apartment, apartment-hotel and hotel buildings, which are classified as

‘Contributing’ and which are being substantially retained, preserved and restored, there is not a parking requirement for the existing structure, and any new additions, whether attached or detached, regardless of the lot width and number of units.

- For properties that contain at least one ‘Contributing’ building, the maximum building height can be up to five stories and 60 feet for the lot depth in excess of 30 feet from the front setback, provided that at least 33% of all the existing ‘Contributing’ buildings, as measured from the front elevation, are substantially retained and restored.
- For rooftop additions located on ‘Contributing’ buildings, any non-conforming interior side or rear setback may be extended to the new construction.
- For properties that contain at least one ‘Contributing’ building, the aggregation of 3 lots may be proposed, provided that at least 33% of all existing ‘Contributing’ buildings, as measured from the front elevation, are substantially retained and restored.

SUMMARY

The initial draft of the overlay ordinance presented to the Land Use and Development Committee (LUDC) on January 18, 2017 was the first step in a comprehensive process for creating tangible development regulations for the larger North Beach National Register areas. As indicated previously, and reiterated on multiple occasions, staff believes that through stakeholder input, including the North Beach Master Plan Steering Committee, residents, property owners and businesses, these regulations have been continually refined.

On January 18, 2017, the item was discussed in detail at the LUDC and substantial public input was provided. Pursuant to this discussion, and the feedback from the LUDC, the following updates were incorporated into the draft ordinance:

- The lot aggregation regulations have been further tightened to only permit the aggregation of a third lot when a contributing building is substantially retained;
- Latitude has been provided for the DRB/HPB to waive roof encroachments of stair and elevator bulkheads.

After the initial discussions at the LUDC, on February 8, 2017, the City Commission authorized the Administration to engage the North Beach Master Planner (Dover-Kohl) in a review and assistance capacity for the conservation overlay district ordinance. Staff engaged Dover-Kohl in this regard, and as part of the evaluation by the North Beach Master Plan Steering Committee. Dover-Kohl participated in staff discussions regarding the ordinance, attended meetings of the North Beach Master Plan Steering Committee, and put together a series of drawings and renderings illustrating existing conditions and the impact of the proposed conservation district regulations. These drawings and illustrations are attached.

On February 24, 2017, the North Beach Master Plan Steering Committee convened and discussed the ordinance proposal and recommended that the following issues be further addressed:

- Further study of the proposal to reduce minimum unit size requirements, particularly the allowance of 300 square feet within contributing buildings;
- Identifying different setback requirements for the various subdivisions and including view corridors for waterfront properties.

On May 10, 2017, the LUDC approved by acclamation a recommendation that the City Commission refer the proposed North Beach Conservation Overlay District Ordinance to the Planning Board, including the following recommendation on parking:

- All parking shall be located at grade; no ramps or parking above the first floor shall be permitted. However, mechanical lifts may be proposed at the first level, provided all lifts are fully screened from view and not visible from adjacent properties, the public ROW or any waterfront;
- All parking and driveway surface areas shall be composed of pervious material such as concrete or grass pavers, set in sand;
- Required wheel stops shall be low profile and not exceed 5 feet in width;
- All parking areas shall meet minimum front and rear yard setback requirements for buildings;
- A maximum of one driveway curb cut per development site may be permitted, and the maximum width of such driveway curb cut shall not exceed 10 feet;
- On waterfront lots, parking areas shall only be secured by substantially open, picket fencing within required front yards and rear waterfront yards;
- Landscaping within view corridors, with the exception of canopy trees, shall be maintained at a height not to exceed 3 feet from sidewalk elevation.

The above noted parking standards would apply regardless of whether parking is required or not.

UPDATE

On June 27, 2017 the Planning Board discussed the proposal, provided feedback and continued the item to July 25, 2017. Since the previous meeting, the Ordinance title has been updated (and re-noticed) to be more descriptive, and the proposed modifications to the parking requirements have been moved from the overlay district to chapter 130, "Offstreet parking requirements". Also, the following minor adjustments were made to the legislation, in accordance with the discussion at the June 27, 2017 meeting:

1. The setbacks for rooftop additions located on 'Contributing' buildings have been clarified. In this regard, such additions may follow any existing non-conforming interior side or rear

setbacks. Additionally, any new ground level addition, whether attached or detached, may also follow an existing non-conforming interior side or rear setbacks, provided at least 33 percent of an existing 'contributing' building, as measured from the front elevation, is substantially retained and restored.

2. The requirement for a non-emergency, convenience stair has been clarified and is now required to access, at a minimum, the first three residential floors.
3. The proposed limitations on curb cuts have been modified to allow more than one curb cut, if approved by the design review board or historic preservation board, as applicable, on a thru-lot, when such lot is accessible from 2 different roadways, or a corner lot.

Finally, a corresponding Comprehensive Plan amendment, to address the proposed reductions in minimum unit size, has also been drafted as a separate ordinance for review (PB 17-0140).

RECOMMENDATION

In view of the foregoing analysis, staff recommends that the Planning Board transmit the Ordinance to the City Commission with a favorable recommendation.
