STAFF ANALYSIS

The applicant is requesting approval for the installation of a fountain/sculpture located within the recently completed 34th Street Parking lot. The fountain, a work of art by design house Studio Job, is located within the landscaped area at the eastern portion of the site. Staff has no objection to the proposed location. Staff does however, have a concern relative to fountain portion of the sculpture. Specifically, staff does not believe that the fountain will function as intended due to the consistently strong winds this location experiences. Further, staff believes there will be significant maintenance challenges associated with the water feature component. Consequently, staff recommends elimination of the operable fountain including the basin, consistent with the image in the plans labeled "picture of the Faena Fountain without the basin".

RECOMMENDATION

In view of the foregoing analysis, staff recommends the application be **approved** subject to the conditions enumerated in the attached draft Order, which address the inconsistencies with the aforementioned Certificate of Appropriateness criteria.
