RE: Proposed West Avenue and Pennsylvania Avenue Tesla sites

Dear Customer:

Thank you for your recent inquiry.

Per Tariff section 10.6.3, if FPL determines that the transformer is to be located inside of the building, the customer must provide a transformer vault.

Constructability and safety clearance requirements are required to install the transformer as well as 24/7 access to the equipment for maintenance or in an emergency.

Sincerely,

A handwritten signature in black ink, appearing to read "Chanda Young Brown", with a horizontal line extending to the right.
