RE: RFQ 2018-141-ND, Professional Architectural and Engineering Services for Capital Renewal and Replacement Projects, Engineering – Mechanical, Electrical & Plumbing

Dear Ms. Delgado and Members of the Selection Committee,

This letter is a follow-up to our submission submitted to the City of Miami Beach on May 7 relative to On-Call Mechanical/Electrical/Plumbing (MEP) Engineering Services. We understand that Ross & Baruzzini is being considered as a candidate for award of the On-Call Contract.

We wanted to inform the City of Miami Beach that our local resources have changed since we submitted our Proposal:

- Our local office remains strong in the security, communications and technology disciplines and our firm will continue to offer these services from our local office.
- We no longer have mechanical, electrical and plumbing (MEP) resources in our local office; but do have these resources within our headquarters in St. Louis.

We remain interested in the contract relative to security, communications and technology focused projects; but without local MEP resources it may be in your best interest to consider firms with local MEP resources for projects that are MEP focused.

We thought it best to inform the City of Miami Beach of this change in local resources since our submission and understand any ramifications relative to selection of firms for the contract.

Respectfully,

Michael E. Shea, AIA
Senior Vice President, Government Market
