## Arborist Report for 2192 Alton Road Site Overview:

This site is a vacant lot. The landscaping consists of trees, palms and shrubs. The tree table contains all that are 2 inches or more in diameter at 4.5 feet above ground. CRZ is measured as approximately double the diameter of the tree and TPZ is equal to that. The purpose of this report is to secure permitting to remove tree # 4, 7, 8, 10, 11, 12 and 13.

Tree #1 is a Mahogany tree in the Right of Way. The tree appears healthy and free of disease. There are what appear to be the remnants of nylon straps in the bark. A picture is included.

Tree #2 is a Coconut Palm and a Right of Way tree and is not in front of this property. It appears healthy and free of disease, decay and defect.

Tree # 3 is a Christmas Palm and scheduled for transplant. It appears healthy and free of disease, decay and defect.

Tree #4 is a Strangler Fig and is scheduled for removal. It appears healthy and free of disease, decay and defect.

Tree #5 and 6 are Christmas Palms that appear healthy and free of disease, decay and defect. They are scheduled for transplant.

Tree #7 is cluster of Christmas palms that is in poor condition and appears to have a significant nutrition deficiency. The tree is scheduled for removal.

Tree # 8 and 10 are both Stranger Figs and are scheduled for removal.

Tree #9 is gone.

Tree #11 is an Orange tree that appears healthy but needs fertilization. The tree is scheduled for removal.

Tree #12 is a two trunk Christmas palm that is in fair condition. Fertilization is recommended but the tree is scheduled for removal.

It is requested that TPZ physical dimensions conform to the boundaries of the hardscapes around the trees.

Thank you,
