420 Jefferson Avenue

Miami Beach, FL 33139

Table of Contents

CONCEPT

The vision is to bring a world-class private school to the City of Miami Beach. This is a temporary location, while a permanent location is being constructed. The curriculum will combine a variety of schools of thought for project based learning, including traditional, Montessori, STEM, and languages. This will truly be a school for the families of South of Fifth neighborhood. Currently, families with young children must travel north of 5th Street, to Fisher Island, or leave Miami Beach for their child to attend a private school. The proposed location is strategically located between a residential neighborhood, businesses, and offices. The property, and proposed design, will foster a safe environment for growth and development of the child.

The school will be the entire third-floor of the existing office building. A portion of the ground floor parking lot will be repurposed with a custom outdoor play area. The school will effectively utilize the previous office space with a wellness room, quiet space, technology room, arts & crafts work room, and a library.

STUDENT CAPACITY

The temporary school will have a limited enrollment of ten (10) to fifteen (15) students. This is a temporary location for the students, while a larger, long-term site is constructed. The ages of the students will be between four (4) and six (6) years old.

DROP-OFF/ PICK-UP

The hours of operation will be between 7:00 AM and 3:00 PM. Although, classes will not begin until 9:00 AM. This intentionally permits sufficient drop-off and pick-up time. Students will be permitted to arrive between 7:00 AM and 9:00 AM, and pick-up will being at 1:00 PM.

Drop-off and pick-up will occur entirely within the private, gated parking lot. Parents have the option to drop-off and pick-up the students under the existing structure within five (5) designated spaces or park in one of the on-site parking spaces and walk their child to the third-floor. All vehicular traffic will enter from Jefferson Avenue and exit onto 4th Street. Due to the limited number of students, large drop-off and pick-up time frames, and number of available parking spaces, there will be no vehicle queuing onto the abutting roadways. Additionally, as the school is located in close proximity to a variety of residential and business uses, the expectation is that the majority of parents and guardians will bike and walk to drop-off and pick-up the children.

STAFFING

Due to the temporary nature of the school at this location and limited number of students, the staff will be composed as follows:

- Two (2) full-time teachers
- One (1) full-time school administrator
- One to two (1-2) part-time staff members

ACCESS & SECURITY

Access to the third-floor will be restricted during the school hours, and limited to the stairs and lobby entrance area. Drop-off and pick-up will be strictly located within the gated parking lot. Parents and guardians will be provided access to the property through the mechanical gate on Jefferson Avenue. Staff will have secured access between the main common area and lobby area with a keycard or fingerprint, as well as to the play area on the ground floor. The third-floor and ground floor play area will be equipped with video surveillance throughout.

DELIVERIES & COLLECTIONS

The following procedures will be implemented to ensure minimal impact on local residents and neighboring businesses:

All deliveries and refuse will occur within four (4) designated parking spots within the private parking lot. Deliveries will only be accepted between the hours of 7:00 AM to 5:00 PM. Due to the nature of the use as a modestly sized school, the quantity and frequencies of deliveries will be limited. Refuse will take place during the City's regularly scheduled times for this property.

MEMORANDUM

To: Firat Akcay
City of Miami Beach

Cc: Josiel Ferrer-Diaz, E.I., City of Miami Beach

From: Adrian K. Dabkowski, P.E., PTOE
Cory D. Dorman, P.E.

Date: April 16, 2019

Subject: 224 2nd Street
Interim Pre-School Operations

The purpose of this memorandum is to summarize the operations of the interim pre-school location proposed as part of the 224 2nd Street redevelopment in Miami Beach, Florida. The proposed interim pre-school will temporarily be located at 420 Jefferson Avenue in Miami Beach, Florida. A location map, existing site plan, and existing site photos are included in Attachment A. The site is currently occupied by an existing office building with 47 parking spaces. The proposed interim pre-school will be a tenant at the interim location for one (1) year and operate with a maximum enrollment of ten (10) students from four (4) to six (6) years of age.

The proposed interim pre-school is expected to operate from 7:00 A.M. to 3:00 P.M. Note that the pre-school will operate with a student arrival drop-off and dismissal pick-up range rather than a specific arrival and dismissal time. This is expected to allow parents and guardians the flexibility to drop-off and pick-up students based on their schedule. The morning arrival drop-off period is expected to be from 7:00 A.M. to 9:00 A.M. and the afternoon dismissal pick-up period is expected to be between 1:00 P.M. to 3:00 P.M. Please note that other tenants at the existing office building typically arrive after 9:00 A.M. and depart after 3:00 P.M. The on-site parking spaces provided as part of the existing office building will be utilized for student drop-off/pick-up operations and access to the site will be provided by a proximity card and/or key-fob. Vehicle are expected to enter the site from Jefferson Avenue just south of 5th Street and exit the site onto 4th Street just west of Jefferson Avenue.

Re: Accessibility at 420 Jefferson

Dear Ms. Salas

As the architects for the tenant improvements to the third and fourth level of 420 Jefferson on Miami Beach we have [illegible] the [illegible] of this space [illegible] whenever feasibly possible to improve conditions for people with disabilities. These improvements include:

accessible path of travel to all functional spaces in the improved space	$5,200
accessible work stations at all built in conditions	$4,300
accessible doors and doors and door hardware at all locations	$4,100
visual fire annunciation equipment	$1,600
accessible signage	$800
accessible lounge area (2)	$7,200
fully accessible toilet rooms (2)	$3,100
new accessible fixtures in existing toilet rooms	$1,350
accessible drinking fountains (2)	$1,100
Total	$28,700

The permit cost for construction of these improvements is $100,000 and we will consider that we have allocated over 20% of the improvement cost toward improving accessibility conditions.

Sincerely,

Todd B. Tragash

HVAC NOTES

1. [illegible]

2. [illegible]

3. [illegible]

4. [illegible]

5. COORDINATE LOCATIONS, SIZES & OPENINGS W/OTHER TRADES ON THE JOB. A/C CONTRACTOR SHALL PROVIDE THE COMPLETE DUCT SYSTEM W/TURNING VANES AT ALL ELBOWS, SPLITTERS AND DAMPERS AS REQUIRED. A/C CONTRACTOR SHALL USE THE BEST PRACTICES OF THE TRADE IN THE FABRICATION AND INSTALLATION OF THE SYSTEM.

6. ALL HVAC UNITS EXCEPT FOR HVAC SYSTEM #7, ARE EXISTING TO REMAIN AS INDICATED ON HVAC SCHEDULE. PROVIDE ALL NECESSARY SERVICE AND REPAIRS TO THE EXISTING HVAC SYSTEMS IN ORDER TO ACHIEVE OPTIMUM OPERATING CONDITIONS. HVAC SYSTEM #7 SHALL BE A NEW TRI-ZONE TYPE DUCTLESS SPLIT SYSTEM WITH THREE INDOOR DUCTLESS AIR HANDLING UNITS TIED TO A SINGLE ROOFTOP CONDENSING UNIT AS SHOWN. SEE HVAC SCHEDULE FOR ADDITIONAL INFORMATION.

DESIGN CONDITIONS:

	OUTDOOR	INDOOR
WINTER/HEATING	40 DEGREES F.	70 DEGREES F.
SUMMER/COOLING	91 DEGREES F. DRY BULB 79 DEGREES F. WET BULB	75 DEGREES F. MAX. 50% RH

7. ALL TEMP. CONTROLS SHALL BE VIA EXISTING / RELOCATED CENTRAL T'STATS. MOUNT ALL RELOCATED T'STATS AT 5'-0" A.F.F. WHERE SHOWN ON PLANS.

8. ALL CEILING DIFFUSERS & R/A GRILLES SHALL BE NEW AS SPECIFIED IN HVAC LEGEND. ALL DIFFUSERS SHALL BE EQUIPPED W/ HIDDEN OPPOSED BLADE DAMPERS. PROVIDE GASKETS ON ALL DIFFUSERS. VERIFY FINISHES AND EXACT MOUNTING LOCATIONS OF ALL DIFFUSERS W/ARCH.

9. PROVIDE MANUAL VOLUME DAMPERS SET FOR CFM QUANTITIES INDICATED ON HVAC PLANS. ALL O/A INTAKE DUCTS & ASSOCIATED FIRE/SMOKE DAMPERS AT CHASE PENETR. ARE EXISTING.

10. LIMIT FLEXIBLE DUCT LENGTHS AT DIFFUSER BRANCHES IN SOFFITS TO 5'-0" MAX.

FRESH AIR INTAKE REQUIREMENTS (PER ASHRAE)

OCCUPANCY OF SPACE SERVED BY HVAC #1 : 16 PEOPLE
20 CFM / PERSON OF O/A INTAKE REQUIRED
20 CFM / PERSON X 16 PEOPLE = 320 CFM

OCCUPANCY OF SPACE SERVED BY HVAC #2 : 13 PEOPLE
20 CFM / PERSON OF O/A INTAKE REQUIRED
20 CFM / PERSON X 13 PEOPLE = 260 CFM

OCCUPANCY OF SPACE SERVED BY HVAC #3 : 13 PEOPLE
20 CFM / PERSON OF O/A INTAKE REQUIRED
20 CFM / PERSON X 13 PEOPLE = 260 CFM

OCCUPANCY OF SPACE SERVED BY HVAC #4 : 13 PEOPLE
20 CFM / PERSON OF O/A INTAKE REQUIRED
20 CFM / PERSON X 13 PEOPLE = 260 CFM

OCCUPANCY OF SPACE SERVED BY HVAC #5 : 13 PEOPLE
20 CFM / PERSON OF O/A INTAKE REQUIRED
20 CFM / PERSON X 13 PEOPLE = 260 CFM

OCCUPANCY OF SPACE SERVED BY HVAC #6 : 13 PEOPLE
20 CFM / PERSON OF O/A INTAKE REQUIRED
20 CFM / PERSON X 13 PEOPLE = 260 CFM

ELECTRICAL NOTES

1. General
   A. All work performed under this contract shall comply with all national, state and local codes having jurisdiction and with, the requirements of the utility companies whose services shall be used. All modifications required by these codes shall be made by this contractor without additional charge.
   B. Drawings: Refer to all drawings for coordination of the electrical work.
   C. Arrange and pay for all permits, licenses, inspections and tests. Obtain the required certificates and present to owner.
   D. Guarantee: The completed installation shall be fully guaranteed against defective materials and/or improper workmanship for minimum of one year for material and labor.
2. Contractor is directed to review the building plans and specifications for limitations of constructions, identifications of materials and products, definition of workmanship. This contractor shall include his bid proposal all costs necessary for a complete and operational installation and shall visit the job site prior to a bid date.
3. Contractor needs to establish a field liason with project supervisor, prior to commencing work.
4. All required insurance shall be provided for protection against public liability and property damage for duration of the work.
5. It shall not be the intent of these plans and/or specifications to show every minor detail of construction. The electrical contractor shall be expected to furnish and install all items for a complete electrical system and provide all requirements necessary for equipment to be placed in proper working order.
6. Electrical contractor shall not scale drawings. Contractor shall refer to architectural plans and elevations for exact location of all equipment unless otherwise noted.
7. All conduit runs are shown diagrammatically. Exact routing shall be determined in the field, unless otherwise noted.
8. Electrical contractor shall visit the job site and verify all conditions, locations, dimensions and counts as shown and/or noted on the drawings. This shall include any and all fabrications prior to installations.
9. As a minimum, all equipment shall meet applicable standards for the type of equipment and intended use, of the following:
   a. American National Standards Institute (ANSI)
   b. Illuminating Engineer's Society (IES)
   c. American Society for Testing and Materials (ASTM)
   d. National Electrical Manufacturer's Association (NEMA)
   Note: These standards are subordinate to codes, and standards set by UL.
10. All electrical equipment, devices, wire, ect. shall be listed, for the intended use, with Underwriter laboratories, Inc. (UL), where standards have been established by UL.
11. As-built drawings shall be furnished to the owner upon completion of work.
12. Wiring devices to be spec grade.
13. Where more than one devices is indicated at any location, these shall be ganged under one common cover plate.
14. Contractor shall coordinate with electric and telephone utility for service entrance location and any other requirements.
15. All connections to ground rods shall be made with UL approved welded connections, unless noted otherwise.
16. Provide a fuse holder and fuse in the primary side of each ungrounded conductor for all ballasts.
17. Unless noted as existing, all equipment, wiring, devices, etc. shall be new.
18. Contractor shall guarantee all materials and workmanship free from defects for a period of not less than (1) year from date of acceptance, unless indicated of specified otherwise.
19. Correction of any defects shall be completed without additional charge and shall include replacement or repair of any other phase of the installation which may have been damaged thereby.
20. Electrical contractor shall provide temporary service for use of all trades as required for construction.
21. Temporary wiring to be removed by contractor.
22. Electrical contractor shall verify requirements, exact location and type or outlet for all electrical fixtures, appliances and equipment.
23. Shop drawings: Coordinate with owner or architect.
24. All wiring to have 600 volt insulation, type TW, THW, THWN, for branch circuits and type THW, THN for main feeders or as specified.
25. Design is based on copper conductor. Wire size #10 and smaller type "TW", wire size #8 and larger type "THW" or as specified.
26. Wire ways shall be sized as required, per NEC, unless otherwise noted.
27. All feeder, subfeeder and branch circuits shall be properly phase balanced.
28. All conductors shall be in conduits. All conduits shall be intermediate (IMC) or rigid galvanized steel (RGS) except that: (a) poly vinyl chloride (PVC) conduits may used in concrete slabs at underground provided elbows and riser are RGS; (b) electrical metallic tubing (EMT) may be used in or on walls or ceilings where not subject to mechanical damage, damp conditions or corrosive conditions; (c) liquid tight flexible conduits where required; (d) flexible metallic conduit where required in dry locations. All conduit hazardous areas (per NEC) shall meet the requirements of NEC Chapter.
29. Apply bitumastic coating to all metallic conduits in slabs or underground.
30. Electrical contractor shall verify circuit protective device rating for equipment prior to construction.
31. Provide fuse recommended by equipment manufacturer.
32. Furnish and install disconnect switches and wiring for air conditioning systems as per manufacturer recommendations. Controls are to be supplied by air conditioning contractor.
33. Install power and control wiring and required control components for air condition systems as shown/noted on these drawings and per other applicable drawings/instructions see A/C drawings.
34. Electrical contractor to run control wires for HVAC system as per HVAC drawings.
35. No conduits to be run in ductwork.
36. All electrical wiring must be in conduit (no Romex, BX, etc. is permitted unless specific permission is obtained from owner, engineering or local inspector).

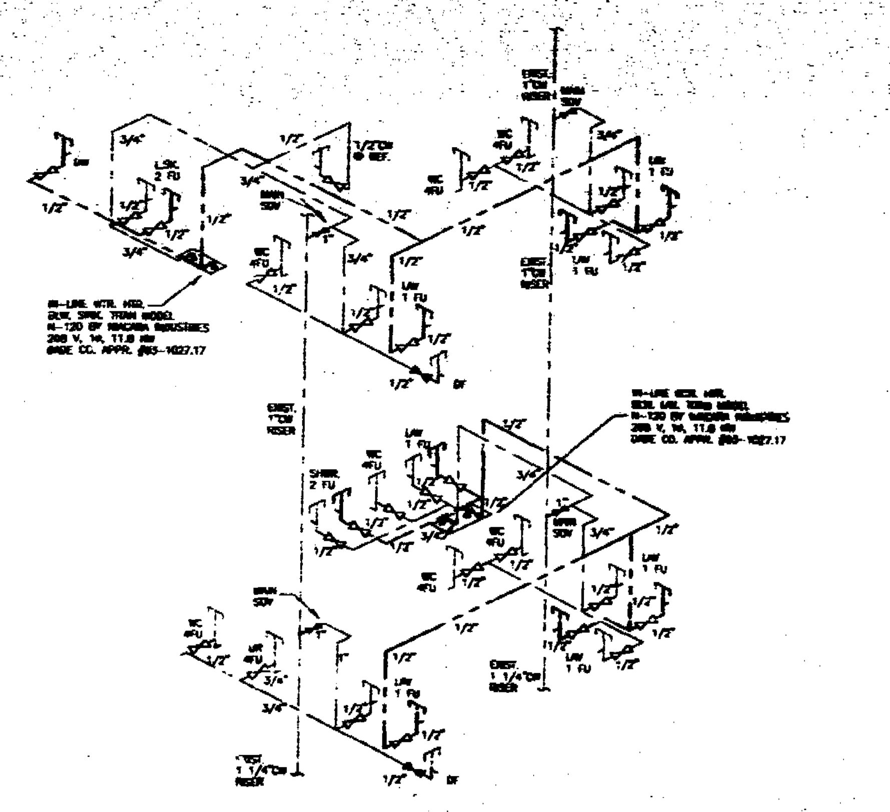
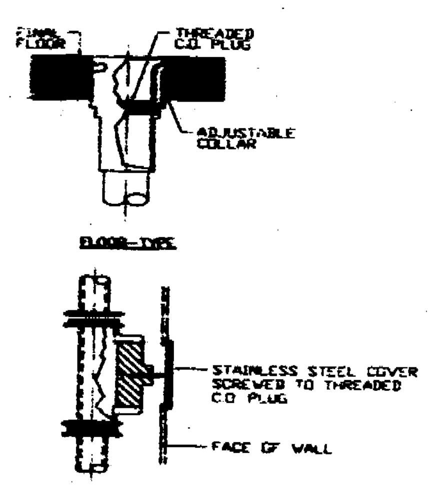
SANITARY RISER DIAGRAM
N.T.S.



DOMESTIC RISER DIAGRAM
N.T.S.



TYPICAL CLEANOUT DETAILS
N.T.S.

DOMESTIC WATER PIPING

1. UNDERGROUND GALVANIZED STEEL PIPE, SCHEDULE 40 SCREWED (ASTM A120-78) WITH MALLEABLE IRON FITTING GALVANIZED TO MATCH PIPE. ANSI B16.3-71, ASTM A197-47 OR CAST IRON FLANGED FITTINGS (ANSI B16.1). PIPE SHALL BE PROTECTED WITH COAT OF BITUMINOUS COMPOUND. COPPER TUBING TYPE K ASTM B88-75, ACCEPTED ALTERNATE. ALL COPPER PIPING BLW. GROUND SHALL BE SLEEVED.

2. ABOVE GROUND GALVANIZED STEEL PIPE, SCHEDULE 40 SCREWED. (ASTM A120-78) WITH MALLEABLE IRON FITTINGS GALVANIZED TO MATCH PIPE. ANSI B16.3-71, ASTM A197-47 OR CAST IRON FLANGED FITTINGS (ANSI B16.1). COPPER WATER TUBING, TYPE L, ASTM B88-75 WITH WROUGHT COPPER FITTINGS, ANSI B16.22-73.

3. PIPE HANGERS AND SUPPORTS: PROVIDE ADJUSTABLE HANGERS, INSERTS BRACKETS, ROLLS, CLAMPS AND SUPPLEMENTARY STEEL AS REQUIRED FOR PROPER SUPPORT OF PIPE LINES. HANGERS SHALL ALLOW FOR EXPANSION AND CONTRACTION OF PIPE LINES AND COVERING TO RUN CONTINUOUSLY THROUGH HANGERS.

4. SPACING AND SIZES.

A. HORIZONTAL CARBON STEEL PIPE

PIPE SIZE	ROD DIAMETER	MAXIMUM SPACING
UP TO 1-1/4"	3/8"	8'
1-1/2" & 2"	3/8"	10'

B. HORIZONTAL COPPER PIPING

PIPE SIZE	ROD DIAMETER	MAXIMUM SPACING
UP TO 1"	3/8"	6'
1-1/4" & 1-1/2"	3/8"	6'
2"	3/8"	8'

PLUMBING NOTES

1. ALL PLUMBING WORK SHALL BE PERFORMED IN ACCORDANCE WITH THE LATEST EDITION OF THE "SOUTH FLORIDA BUILDING CODE", CHAPTER 46, LOCAL ORDINANCE AND IN COMPLIANCE WITH "FLORIDA ENERGY EFFICIENCY CODE FOR BUILDING CONSTRUCTION.

2. CONTRACTOR TO VERIFY AT SITE LOCATION THE ELEVATION AND SIZE OF EXISTING WATER AND SEWER MAINS FOR CONNECTION OF NEW SERVICES BEFORE INSTALLATION OF ANY PIPING.

3. UNDERGROUND METAL PIPING SHALL BE PROTECTED WITH COAT OF BITUMINOUS COMPOUND ("BITUMASTIC" OR EQUAL) BEFORE COVERING. ALL UNDERGROUND COPPER PIPING SHALL BE FULLY SLEEVED.

4. PROVIDE SHUT-OFF AND VACUUM BREAKER TO ALL HOSE BIBBS AND FAUCETS WITH HOSE-END CONNECTION.

5. ALL FIXTURES SHALL BE PROTECTED AGAINST WATER HAMMER WITH AIR CHAMBERS OR SHOCK ABSORBERS.

6. PLUMBING FIXTURES SHALL BE "AMERICAN STANDARD" OR APPROVED EQUAL. ALL FIXTURE TRIM SHALL BE CHROME PLATED. FIXTURES SHALL BE PROVIDED WITH SUPPORTS, HANGERS, E.T.C.

7. WASTE LINES SHALL SLOPE 1/8" PER FOOT. UNLESS OTHERWISE NOTED.

8. PROVIDE FULLY ACCESSIBLE CLEANOUTS ON SANITARY AND ANY WASTE PIPING AT EVERY CHANGE OF DIRECTION AND AT BOTTOM OF STACKS. CLEAN OUT LOCATION AND SIZES ON HORIZONTAL LINES SHALL BE ACCORDING TO CODE.

9. VENT LINES SHALL EXTEND 6" MIN. ABOVE ROOF AND FLASHED WITH LEAD OR CONNECTED TO EXISTING VENT LINES.

10. ALL FLOOR DRAINS SHALL HAVE TRAP PRIMERS TO PROTECT THE SEAL OF THE TRAP.

11. PROVIDE CONTROL VALVES TO ALL MAINS ENTERING THE BUILDING, RISERS, BRANCHES, GROUPS OF FIXTURES, AND TO EACH PIECE OF EQUIPMENT.

OFFICE COPY
CITY OF MIAMI BEACH
APPROVED FOR PERMIT BY THE FOLLOWING:

PIPING MATERIALS

1. SANITARY WASTE, VENT AND STORM DRAIN:
BELOW GROUND: "CAST IRON", SERVICE WEIGHT, PIPE, & FITTINGS ACCORDING TO ASTM A-74 HUB & SPIGOT OR,
ABOVE GROUND: "CAST IRON", SOIL PIPE, "HUBLESS", ACCORDING TO CISPI-301-78, ASTM A-74, WITH STAINLESS STEEL SHIELD AND CLAMPS OVER NEOPRENE SEALING SLEEVE.
ALTERNATE: THE PLUMBING CONTRACTOR MAY ELECT, IF APPROVED BY OWNER, TO USE THE FOLLOWING MATERIAL SPECIFICATION FOR WASTE, VENT AND STORM DRAIN SYSTEM: POLYVINYL CHLORIDE (PVC) PIPE & FITTINGS (SCHEDULE 40). MATERIAL SHALL COMPLY WITH D-1784 TYPE 1, GRADE 1 COMPOUND. PIPE SHALL COMPLY WITH ASTM D-1785.

FITTIINGS SHALL COMPLY WITH ASTM D-2467 SOCKET TYPE. SOLVENT CEMENT SHALL COMPLY WITH D-2564

2. CONDENSATE DRAINS FROM AIR CONDITIONING UNITS: "PVC" SCHEDULE 40 PIPE & FITTINGS.

3. DOMESTIC WATER ABOVE GROUND: TYPE L COPPER PIPE WITH WROUGHT COPPER SOLDERED JOINT FITTINGS. TYPE K COPPER BELOW GROUND, FULLY SLEEVED, PIPE ACCORDING TO ASTM B-42. TUBE ACCORDING TO ASTM B 88. ALTERNATE FOR UNDERGROUND PIPE: CAST IRON WATER PIPE ACCORDING TO ANSI A 21.6. STEEL PIPE (SCHEDULE 40, GALVANIZED) ACCORDING TO ASTM A120-68.

4. ALL CONTROL VALVES FOR DOMESTIC WATER SHALL BE CAST BRASS OR B-80 BRONZE GATE VALVES.

5 PROVIDE DIELECTRIC FITTINGS FOR JOINING DISSIMILAR METALS

NOTES/COMMENTS

I am sending this information to you for review before we submit revisions based on you comments.

You requested that I show handicapped parking signs on the plans and elevations. I have shown locations and heights of handicapped parking signs on the plan and an elevation of this sign in accordance with the Florida Accessibility guidelines.

You requested that we provide a detail for the curb ramp. I have shown an enlarged plan detail of this ramp with information in accordance with Florida Accessibility Guidelines.

You requested that we show the second exit as accessible. I have revised the drawings to show a total of two entrances which are clearly accessible.

You requested that we show that the opening force on accessible doors meets Accessibility requirements. I have indicated that all exterior doors are set to require 8.5 lbs. of force. There are no interior doors for this improvement.

I feel that these clarifications will bring this improvement to full compliance with accessibility requirements. Please call me to discuss.

3526 NORTH MIAMI AVENUE MIAMI, FLORIDA 33127
305-571-1511 FAX 305-571-1821

GENERAL NOTES:

1. AS PER FLORIDA ACCESIBILITY CODE FOR BUILDING CONSTRUCTION, OCTOBER 1997 EDITION, EACH ACCESIBLE PARKING SPACE MUST BE PROMINENTLY OUTLINED WITH BLUE PAINT, AND MUST BE CLEARLY DISTINGUISHABLE AS A PARKING SPACE DESIGNATED FOR PERSONS WITH DISABILITIES AND MUST BE POSTED WITH A PERMANENT ABOVE GRADE SIGN BEARING THE INTERNATIONAL SYMBOL OF ACCESIBILITY MEETING THE REQUIREMENTS OF COLOR AND DESIGN APPROVED BY THE DEPARTMENT OF TRANSPORTATION, 4.30.7 AND THE CAPTION "PARKING BY DISABLED PERMIT ONLY" INDICATING THE PENALTY FOR ILLEGAL USE OF THIS SPACE. SEE 2/S1b.

2. THE FORCE NECCESARY TO OPEN DOORS MUST BE 8.5 LBS. FOR EXTERIOR DOORS AND 5 LBS FOR INTERIOR DOORS.

H.V.A.C. NOTES

1. ALL WORK SHALL BE AS PER S.F.B.C. AND NFPA

2. ALL FIBERGLASS DUCTWORK SHALL BE 1" THICK, WITH VAPOR BARRIER

3. DUCT WORK SHALL BE FABRICATED AND INSTALLED IN ACCORDANCE WITH MANUFACTURER'S SPECIFICATIONS & ACCORDING TO ASHRAE & SMACNA STANDARDS

4. DUCT DIMENSIONS ARE IN INCHES AND CORRESPOND TO INSIDE DIMENSIONS WIDTH x [illegible]HT. DUCT SYSTEM SHALL COMPLY WITH NFPA STD. NO. 90A AND/OR 90B. DUCTWORK AND MATERIALS SHALL BE CLASS 1 MATERIALS IN ACCORDANCE WITH U.L. 181 TESTS

5. COORDINATE LOCATIONS, SIZES & OPENINGS W/OTHER TRADES ON THE JOB. A/C CONTRACTOR SHALL PROVIDE THE COMPLETE DUCT SYSTEM W/TURNING VANES AT ALL ELBOWS, SPLITTERS AND DAMPERS AS REQUIRED. A/C CONTRACTOR SHALL USE THE BEST PRACTICES OF THE TRADE IN THE FABRICATION AND INSTALLATION OF THE SYSTEM

6. ALL SUPPLY AIR AND RETURN AIR GRILLES/DIFFUSERS SHALL BE NEW, AND SHALL BE LOCATED AND BALANCED IN ORDER THAT THEY DELIVER THE REQUIRED CFM TO THE ENTIRE ROOM EVENLY & DRAFT FREE TO MAINTAIN THE FOLLOWING DESIGN CONDITIONS:

INSIDE	OUTSIDE	RELATIVE HUMIDITY
COOLING - 76 DB	90 DB - 79 WB	50% TO 60%

7. ALL TEM. CONTROLS TO BE VIA CENTRALIZED T'STATS. MOUNT T'STATS AT 5'-0" A.F.F. WHERE SHOWN ON PLAN.

8. ALL NEW GRILLES AND DIFFISURES TO BE ALUMINUM CONSTRUCTION. DIFFUSERS SHALL HAVE HIDDEN OPPOSED BLADE DAMPERS. PROVIDE GASKETS ON ALL GRILLES & DIFFUSERS.

9. VERIFY / COORD. ALL S/A & R/A GRILLE TYPES / FINISHES WITH INTERIOR DESIGNER.

10. PROVIDE OUTSIDE AIR INTAKE VIA WALL GRILLE ON EXTERIOR WALL AS SHOWN ON PLANS

11. FIRE DAMPERS : PROVIDE UL LABELED FUSIBLE LINK FIRE DAMPERS WHEREVER SUPPLY OR RETURN DUCTS PENETRATE FLOORS, FIRE WALLS, FIRE PARTITIONS OR WHEREVER REQUIRED BY GOVERNING CODES. MEET ALL FIRE DAMPER REQUIREMENTS. PROVIDE SUITABLE ACCESS TO FIRE DAMPERS. DAMPERS SHALL BE AIR BALANCE MODEL 119BL OR 319BLV

12. ALL SYSTEMS, DEVICES, AND EQUIPMENT IDENTIFIED AS EXISTING ON PLANS SHALL BE FIELD VERIFIED PRIOR TO PROCEEDING WITH THE WORK; ANY DEVIATION FROM THE CONDITIONS STATED AS EXIST. SHALL BE REPORTED TO THE PRJECT ARCH./ENGINEER FOR FURTHER EVALUATION

STORM DRAINAGE CALCULATIONS:

(A) TOTAL AREA TO BE DRAINED : 11,100 SQ.FT. (0.255 ACRES)
(C) COEFFICIENT OF RUNOFF : 0.90
RAINFALL INTENSITY : 0.062 GAL/MIN/SQFT

Q = A X C X I

Q = 11,100 SQFT. X 0.90 X 0.062 GAL/MIN/SQFT

Q = 619.4 GAL/MIN.

FOR 1 1/2 MINUTE RETENTION = 619.4 X 1.5 = 929 GAL.

USE A 950 GAL. CONCRETE TANK.

USE A 12"⌀ WELL
SLOPE OF DRAINAGE LINES SHALL BE 1/8" PER FT

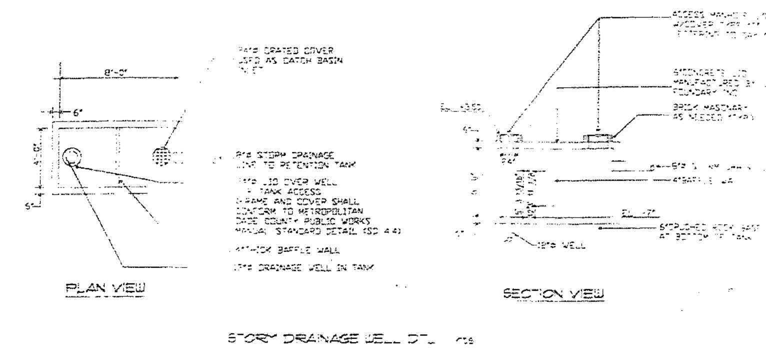
RETENTION TANK

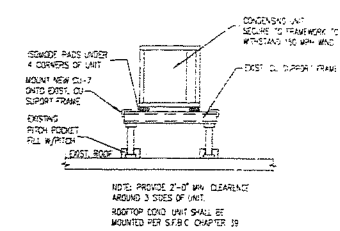
VOLUME = L X W X H

CONCRETE TANK

GAL (CU. FT./7.48 GAL.) ---- 950 / 7.48 = 127 CU.FT.
TANK RETENTION VOLUME, V= 8.0 X 4.0 X 4.0 = 128 CU.FT.

TANK DIMENSIONS : LENGTH = 8'-0"
WIDTH = 4'-0"
RETENTION HEIGHT = 4'-0"
COMPLETE TANK DEPTH = 6'-0"





Cond. Unit Mounting Detail nts

FIRE SPRINKLER NOTES:

ALL FIRE SPRINKLER PIPING AND SPRINKLER HEAD DISTRIBUTION TO BE AS PER THE REQUIREMENTS OF THE NATIONAL FIRE CODE CHAPTER 13R, THE STATE FIRE MARSHALL AND THE AUTHORITIES HAVING LOCAL JURISDICTION. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO DESIGN THE SYSTEM HYDRAULICALLY, AND SUBMIT HYDRAULIC CLACS. FOR REVIEW & APPROVAL IN COMPLIANCE WITH ALL GOVERNING AGENCY CRITERIA, AND TO VERIFY THE PROPER WATER PRESSURES AND QUANTITIES TO INSURE THE PROPER OPERATION OF THE SYSTEM. THE SPRINKLER HEADS SHALL BE PENDANT TYPE, UPRIGHT HEADS (OR SIDE WALL HEADS ONLY WHERE IMPRACTICAL TO USE UPRIGHT), CHROME PLATED IN ALL FINISHED AREAS, AND BRASS PLATED IN UNFINISHED AREAS. ALL PIPING TO BE CONCEALED IN ALL FINISHED AREAS. ECUTCHEON PLATES ARE TO BE CHROME PLATED, AND BE FURNISHED AS TWO PIECE IN ALL LAY-IN CEILINGS TO FACILITATE REMOVAL OF CEILING TILES AFTER THE INSTALLATION

1. THIS BUILDING HAS A COMPLETE SPRINKLER SYSTEM THROUGHOUT

2. THE ENTIRE SYSTEM SHALL COMPLY WITH NFPA (13A) AND LOCAL MECHANICAL AND FIRE CODES

3. LOCATE EXIST. SPRINKLER HEADS AND DROPS AS INDICATED ON CEILING PLAN. PROVIDE ADDITIONAL HEADS AS MAY BE REQUIRED BY CODE AND COORDINATE ALL WITH EXISTING STRUCTURE AND SYSTEM. ALL SPRINKLER HEADS TO BE BUILDING STANDARD. INSTALL AS PER N.F.P.A.

DETAIL – ROOF AC C.U. LOCATION

ELECTRICAL NOTES

1 General
  A. All work performed under this contract shall comply with all national, state and local codes having jurisdiction and with the requirements of the utility company whose services shall be used. All modifications required by these codes shall be made by this contractor without additional charge.
  B. Drawings: Refer to all drawings for coordination of the electrical work.
  C. Arrange and pay for all permits, licenses, inspections and tests. Obtain the required certificates and present to owner.
  D. Guarantee: The complete installation shall be fully guaranteed against defective materials and/or workmanship for minimum of one year [illegible]
2 Contractor is directed to review the building plans and specifications for [illegible] of constructions, specifications of materials and products, definition of workmanship. This contractor shall include in his proposal all costs necessary for a complete and operational installation and shall visit the job site prior to a bid date.
3 Contractor needs to establish a field liaison with project supervision prior to commencing work.
4 All required insurance shall be provided for protection against bodily [illegible] and property damage for duration of the work.
5 It shall not be the intent of these plans and/or specifications to show every minor detail of construction. The electrical contractor shall be expected to furnish and install all items for a complete electrical system and provide all requirements necessary for equipment to be placed in proper working order.
6 Electrical contractor shall not scale drawings. Contractor shall refer to architectural plans and elevations for exact locations of all equipment unless otherwise noted.
7 All conduit runs are shown diagrammatically. Exact routing shall be determined in the field, unless otherwise noted.
8 Electrical contractor shall visit the job site and verify all conditions, locations, dimensions and counts as shown and/or noted on the drawings. This shall include any and all [illegible] prior to installations.
9 As a minimum, all equipment shall meet applicable standards for the type of equipment and intended use, of the following:
  a. American National Standards Institute (ANSI)
  b. Illuminating Engineers Society (IES)
  c. American Society for Testing and Materials (ASTM)
  d. National Electrical Manufacturer's Association (NEMA)
Note: These standards are subordinate to codes and standards set by [illegible]
10 All electrical equipment, devices, wire, etc. shall be listed, for the intended use, with Underwriters Laboratories, Inc. (U.L.), where standards have been established by U.L.
11 As built drawings shall be furnished to the owner upon completion of work.
12 Wiring devices to be spec. grade.
13 Where more than one devices is indicated at any [illegible], these shall be ganged under one common cover plate.
14 Contractor shall coordinate with electric and telephone utility for service entrance location and any other requirements.

GENERAL LANDSCAPE NOTES :

1. All Plant material to be Florida No. 1 or better. Florida Department of Agriculture Grades and Standards, Parts I & II 1973, 1975 respectively.
2. Landscape Plans to be installed in compliance and accordance with all local codes.
3. Planting Plan will take precedence over plant lists in case of any discrepancies. L. Contractor is responsible to verify all quantities and shall notify the Landscape Architect for direction.
4. Contractor to locate and verify all underground and above ground utilities prior to digging and installation.
5. No changes to the plans are to be made without the prior consent of the Landscape Architect.
6. All plant material is subject to availability at the time of installation. Substitutions may be made after consultation with the Landscape Architect.
7. All landscape areas to receive 100% coverage-50% overlap with an automated irrigation system, refer to irrigation plan. The system is to provide a stain/rust free system and a rain sensor.
8. Entire site to receive a 2" blanket of Planting Soil. All planting beds to receive 50/50 planting soil mix (50% Everglades Peat/50% clean sand) minimum 6" deep. All tree holes to be backfilled around and under the rootball with planting soil mix (refer to planting details).
9. All planting beds and tree saucers to receive Cypress Mulch grade "A" - 2" deep. Finish grade of mulch to be 1" below pavement edges (Typ.) refer to landscape details.
10. All trees and palms to be guyed and staked in a good workmanlike manner. No nail staking permitted (refer to planting details)
11. Sod to be St Augustine Flora-Tam solid sod unless otherwise noted, and laid with alternating and abutting joints. Sod to be installed over 2" min. of planting soil.
12. All shrubs and groundcovers to be guaranteed for a period of 6 months, trees and palms to be guaranteed for a period of 1 year.
13. All planting beds are to be weed and grass free until final acceptance.
14. All plant material to fertilized at time of installation following manufacturer's recommendations, submit sample for approval.
15. All trees and palms in sod areas are to receive a mulched ring of 2' diameter.
16. Trees of at least 10' to have a min. caliper of 2" at D.B.H.
17. All 1 gal. Material to have a min. spread of 12", 3 gal. 20-24" spread.
18. Landscape Contractor to visit and familiarize himself with the scope of the work prior to submitting a bid.
19. Landscape Contractor to coordinate his work with the General Contractor, Irrigation Contractor and Electrical Contractor.

...ing 15, and in industrial occupancies as provided in Chapter 28.

Solid treads and solid landing floors provide a visual barrier to shield the user's view of the vertical drop beneath the stair. Persons with fear of height are more comfortable using such stairs. Grated and expanded metal treads and landings might catch a user's heel and present a tripping hazard. Noncombustible grated stair treads are permitted in areas not accessed by the general public, such as catwalks and gridirons in theaters, roofs of basement areas in private and factories and other industrial occupancies.

5-2.2.3.8 Stairs shall be arranged so as to provide easy ... without egress to a public way. Stairs that ... shall be arranged so the ... and discharge shall be ... clear at the level of exit ... by partitions, doors or other effective means.

Exception: Stairs that continue ... might serve beyond the ... of exit discharge need not be ... provided adequate safeguards ... that change is obvious.

Figure 5-24 illustrates a stair design intended to minimize the possibility of persons traveling on stairs underestimating the continuing pull the exit discharge level, or egress at the basement level when the stair ends but allows them ... the discharge, and having ... their egress to the ... exit discharge. The basic ... provided to provide the user with the cue that the level of discharge has been reached, such as a parapet, railings, gate, or other physical barrier that effectively interrupts the flow of travel, paving a pathway to portions of concourses not to be part of the ...

5-2.2.4 Guards and Handrails.

5-2.2.4.1 Guards. Means of egress ... stairs, ramps, ... landings, corridors, passageways, floor or roof openings, ... open sides, ramps, or ... that are more than 30 in. (76 cm) above the floor or grade below shall be provided with guards to prevent falls over the main body.

Exception: Existing ... meeting the requirements of ... 7-4.3 shall be permitted to serve as guards.

Paragraph 5-2.2.4.1 requires stairs which historically have not required rails, handrails to be provided with guards on any open sides of the stair. The minimum 42-in. (107-cm) high guard, in place of the minimum 34-in. (86-cm) handrail, is required to prevent the 95 percentile male from falling over the rail upon striking the side of a stair. Although there is no evidence that there are sufficient anecdotal incidents to show the need for this requirement. The exception exempts existing stairs in recognition that the guard was not previously required and would be an unjustified burden to provide ... retrofit.

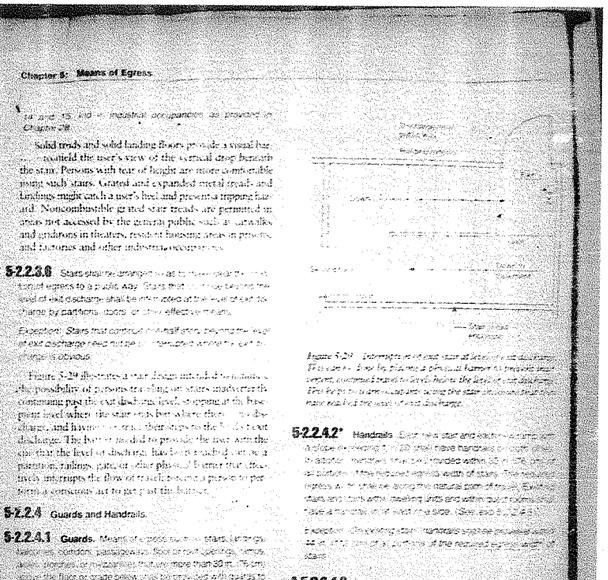

Figure 5-24 ... stairs at least ... wide shall ... [illegible] ... [illegible] ... [illegible]
