Ryan has been involved in the healthcare sector the entirety of his career. Ryan joined The Innova Group in 2013 and in his role as a Consultant, Ryan uses his knowledge of economics and finance to turn client data into actionable plans.

Ryan's focus areas include forecasting, applied health research, and public policy. Clients recognize Ryan's willingness to immerse himself in their unique data, and the flexibility he displays in developing his analysis.

Prior to joining The Innova Group, Ryan worked as a Financing Specialist at the Colorado Medicaid department. In this role, Ryan worked on a team responsible for managing over \$2 billion in supplemental Medicaid payments. Ryan's role included studying and recommending public policies, and calculating payments for nursing facilities, home health, and the Colorado Indigent Care Program. Ryan previously worked as an analyst at a Washington State health insurance company focused on insuring timber industry companies.

Sarah, a senior consultant with The Innova Group in Austin, has 10 years of medical planning experience. She collects and analyzes data to make population, workload, staffing and functional/space programming projections that lead clients to data driven healthcare solutions.

Sarah demonstrates credible knowledge of current healthcare planning and programming concepts, and stays current with trends in healthcare planning. She presents planning concepts professionally to doctors, nurses, medical personnel and hospital management in order to build consensus and facilitate the decision making process.

Sarah is also responsible for leading the planning process by generating planning concepts that are based on our data analysis and projection, and works with the client and project team to implement planning concepts through project completion.
