### **ANALYSIS**

The Delano Hotel, constructed in 1947 and designed by architect B. Robert Swartburg, is an outstanding example of Art Deco architecture with Post War Modern influences. Notable features include, a sawtooth building form, multi-finned tower and numerous octagonal motifs including portholes and columns. On February 8, 2022, the Board approved a Certificate of Appropriateness for renovation and restoration of the hotel and rear cabana structure.

The applicant is currently requesting approval for several improvements to the easternmost portion of the site; within the oceanfront and dune preservation overlay districts. These districts serve as transitional zones from the developed upland area to the dune and beach. Improvements include the introduction of two new shade structures and landscape and hardscape modifications. Finally, staff would note that the proposed scope of work removes several existing non-conformities within the overlays and the proposed modifications comply with all overlay regulations. As such, staff recommends approval as noted below.

**RECOMMENDATION**

In view of the foregoing analysis, staff recommends the application be **approved** subject to the conditions enumerated in the attached draft Order, which address the inconsistencies with the aforementioned Certificate of Appropriateness criteria.
