STAFF ANALYSIS

The subject structure was constructed in 1940 and designed by Albert Anis in the Art Deco style of architecture. The mid-block structure consists of 5 retail bays with a marble tile clad upper façade and an inset band of undulating glass blocks. Recently, a number of tenants have requested to install signage on the existing marble tile. Staff advised the applicant to develop a signage program which would not damage or adversely impact this important original historic material.

The applicant is currently proposing a signage program that includes brushed aluminum reverse channel letters mounted on top of a raceway. This raceway is proposed project from the existing metal trim above the storefront windows. Because the letters are reverse channel (halo lit) a back plate for each letter will be required for the lighting to function properly. Staff would note that a similar signage program has been successfully implemented at the 420 Lincoln Road Building located across the street.

Example of a sign on the 420 Lincoln Road Building

Staff has no objection to the proposed signage program as it has been designed in a manner which will have no adverse impact of the existing Contributing building or the surrounding historic district.

RECOMMENDATION

In view of the foregoing analysis, staff recommends the application be **approved** subject to the conditions enumerated in the attached draft Order, which address the inconsistencies with the aforementioned Certificate of Appropriateness criteria.
